AIRMAN'S GUIDE

OHIO STATE UNIVERSITY
APR 1 1960

special notices

Retain Airman's Guide Issues: 14#23 & 26; 15#1

Airguide Information p 2
B-66 Gust Survey Program p 62
Navwarning-Oil Burner Charts p 62 - 68
F.I.M. Corrections p 76
VOR/DMET or TACAN Equipped Aircraft p 76
VOR Changeover Points p 77

AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 1200 Z on the above date. For later information consult Teletype NOTAMS.

Radar-Radio Listings page 3

NOTAMS page 34

Special Notices page 55

FEDERAL AVIATION AGENCY

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Inportant or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

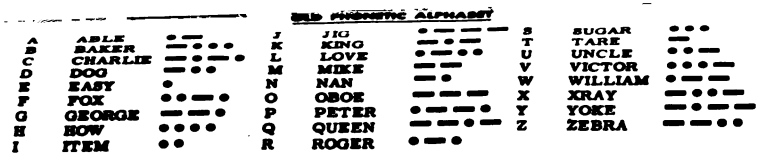
Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.



adjt	adjacent	dptr	departure	jctn	junction
awy	airway				
aprx	approximate	efctv	effective	nmi	nautical miles

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 30, 1959

****

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $3.00, domestic; $2.25 additional for foreign mailing; individual copies vary; this issue 40 cents.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR - RADIO LISTINGS

FSS = Flight Service Station (FAA) (Formerly ATCS)

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal level are monitored continuously. Category II = (No longer in use; formerly applied to VAR). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an FSS, and located too distant from FSS to be monitored with a VHF receiver will fall into Category III. NOTE: Category I, II, III shown by (1), (2), (3) before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities.

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
➔ = New or revised data
■ = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class: (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid; aircraft must have BFO oscillator
D . . . . . Distantly controlled
DME . . . . . Distance Measuring Equipment
DMET . . . . . TACAN compatible DME
FM . . . . . VHF fan marker (100 watts)
GCA . . . . . Ground Controlled Approach System
H . . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH . . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . . . Instrument Landing System (voice on localizer channel)
J . . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM . . . . . VHF fan marker, low powered (5 watts)
LMM . . . . . Compass locator station when installed at middle marker site
LOM . . . . . Compass locator station when installed at outer marker site
MA . . . . . Range (adcock, vertical radiators), power less than 50 watts
MH . . . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . . . Range (loop radiators), power less than 50 watts
MM . . . . . VHF middle marker
MRA . . . . . Range (adcock, vertical radiators), power 50 watts or more, but less than 150 watts
MRL . . . . . Range (loop radiators), power 50 watts or more, but less than 150 watts
OM . . . . . VHF outer marker
RA . . . . . Range (adcock, vertical radiators), power 150 watts or more
RL . . . . . Range (loop radiators), power 150 watts or more
S . . . . . Simultaneous range, homing signal and/or voice
T . . . . . Teletype
TACAN . . . . . UHF omni-directional bearing and distance type facility
TX . . . . . Principal teletype
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF/LMF ranges listed with the same identifier are controlled by the same FSS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE — How and Where

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar.
ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification.
7. Civil aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped civil aircraft entering a United States domestic control area from outside the United States will advise of availability of such equipment when making the first radio report to the United States air traffic control center by adding the word "transponder" to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. * -Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.
(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

AIR NAVIGATION RADIO AIDS

G - Guards

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

REMEMBER!

VFR CRUISING ALTITUDES ARE ODD THOUSANDS PLUS 500 FEET BETWEEN 0° AND 179° MAGNETIC: EVEN THOUSANDS PLUS 500 FEET BETWEEN 180° AND 359° MAGNETIC. CAR 60.32 (a)

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

NEW FSS FREQUENCY: Earlier plans for decommissioning 126.7 mc as a ground-to-air channel have been changed. To accommodate pilots favoring single channel simplex operation, 126.7 mc will remain available indefinitely as a ground-to-air channel. Pilots desiring reply on 126.7 mc must so state in initial call-up. 120.7 mc will continue to be used as the normal FSS ground-to-air reply to aircraft calls on 126.7 mc unless otherwise requested by the pilot.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down, "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

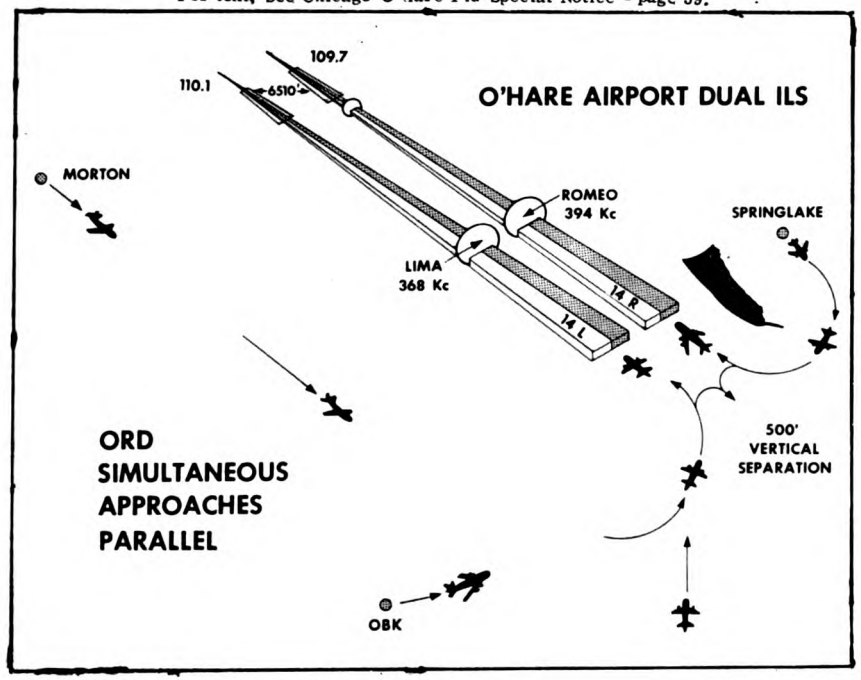
Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Chicago, (Joliet), Ill.	350 kc, 257 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
New York, N.Y.	209 kc
Washington, D.C.	332 kc
Boston, Mass.	382 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Pittsburgh, Penna.	254 kc
Boise, Idaho	359 kc
Cincinnati, Ohio	335 kc
*Wichita, Kansas	332 kc

*Operating on test basis.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.



The locations provided with the above services follows:

FOREIGN EXCHANGE Location	Number	FSS Providing Service
Charlotte, North Carolina	ED 2-7262	Hickory, North Carolina
Burbank, California	TH 6-0400	Los Angeles, California

BE SAFER WITH A FLIGHT PLAN!

For text, see Chicago-O'Hare Fld-Special Notice - page 39.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time. For this list, see page 55 of Airman's Guide Vol. 14, No. 20, dated December 8, 1959.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future.

SPECIAL NOTICE
CALIFORNIA
OCEANSIDE
MARINE CORPS MANEUVER AREA

Maneuvers, including close air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact San Diego, Thermal, Long Beach, Ontario and Los Angeles ATCS for information pertaining to air activity during daylight hours on the maneuver dates.

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

Radar Advisory Areas

a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 02.

b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.

c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas

The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.

a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.

b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information, when possible, and with radar vectors when requested by the pilot. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Oakland, Calif.)
2. VOR/VORTAC Jet Route No. 1 (Oakland, Calif., to Seattle, Wash.)
3. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.)
4. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.
8. VOR/VORTAC Jet Route No. 22 (Lake Charles, La., to Gordonsville, Va.)
9. VOR/VORTAC Jet Route No. 26 (Amarillo, Texas to Joliet, Ill.)
10. VOR/VORTAC Jet Route No. 31 (Dallas, Texas to Chicago, Ill.)
11. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
12. VOR/VORTAC Jet Route No. 37 (Atlanta, Ga., to Spartanburg, S.C.)
13. VOR/VORTAC Jet Route No. 42 (Dallas, Texas to New York, N.Y.)
14. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
15. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
16. VOR/VORTAC Jet Route No. 52 (Dallas, Texas to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala. VOR. (Dallas, Texas-Birmingham, Ala. extension to J52V.)
17. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the intersection of J53V and J81V.)
18. VOR/VORTAC Jet Route No. 53 (Spartanburg, S.C., to Pittsburgh, Pa.)
19. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to Dallas, Tex.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
20. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
21. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
22. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
23. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
24. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
25. ✓
26. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
27. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
28. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)
29. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N.Y.)
30. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
31. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
32. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
33. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U.S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 60 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Effective 10 March 1960.
34. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
35. VOR/VORTAC Jet Route No. 87 (Dallas, Tex., to Houston, Tex.)
36. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
37. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
38. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.) Effective 5 April 1960.

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of

These services should not be considered as providing positive separation. Within the limitation of the service, civil facilities are cautioned to deal with the information with

Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.

2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)

3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)

4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.

5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.

6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.

7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.

8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.

9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.

10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.

11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.

12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.

13. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.

14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.

15. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.

16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 for a distance of 183 n mi.

17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.

18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area) Effective 15 November 1959.

19 Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B.C., Canada RR.

20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass. Effective 17 December 1959.

21 New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
Effective 17 December 1959.

22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOF Effective 17 December 1959.

23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.

VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.) Effective 5 April 1960.

That area 20 n mi either side of a line from Des Moines, Iowa VOR, intersection of

AREAS

d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.

24. Effective 17 December 1959.
Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.

25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 Ukiah, Calif., VOR; V-107 to Red Bluff, Calif., VOR.
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.

26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.

27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.

28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S.-Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

All tracks will be flown at 360 knots true air speed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated. NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Half-moon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.

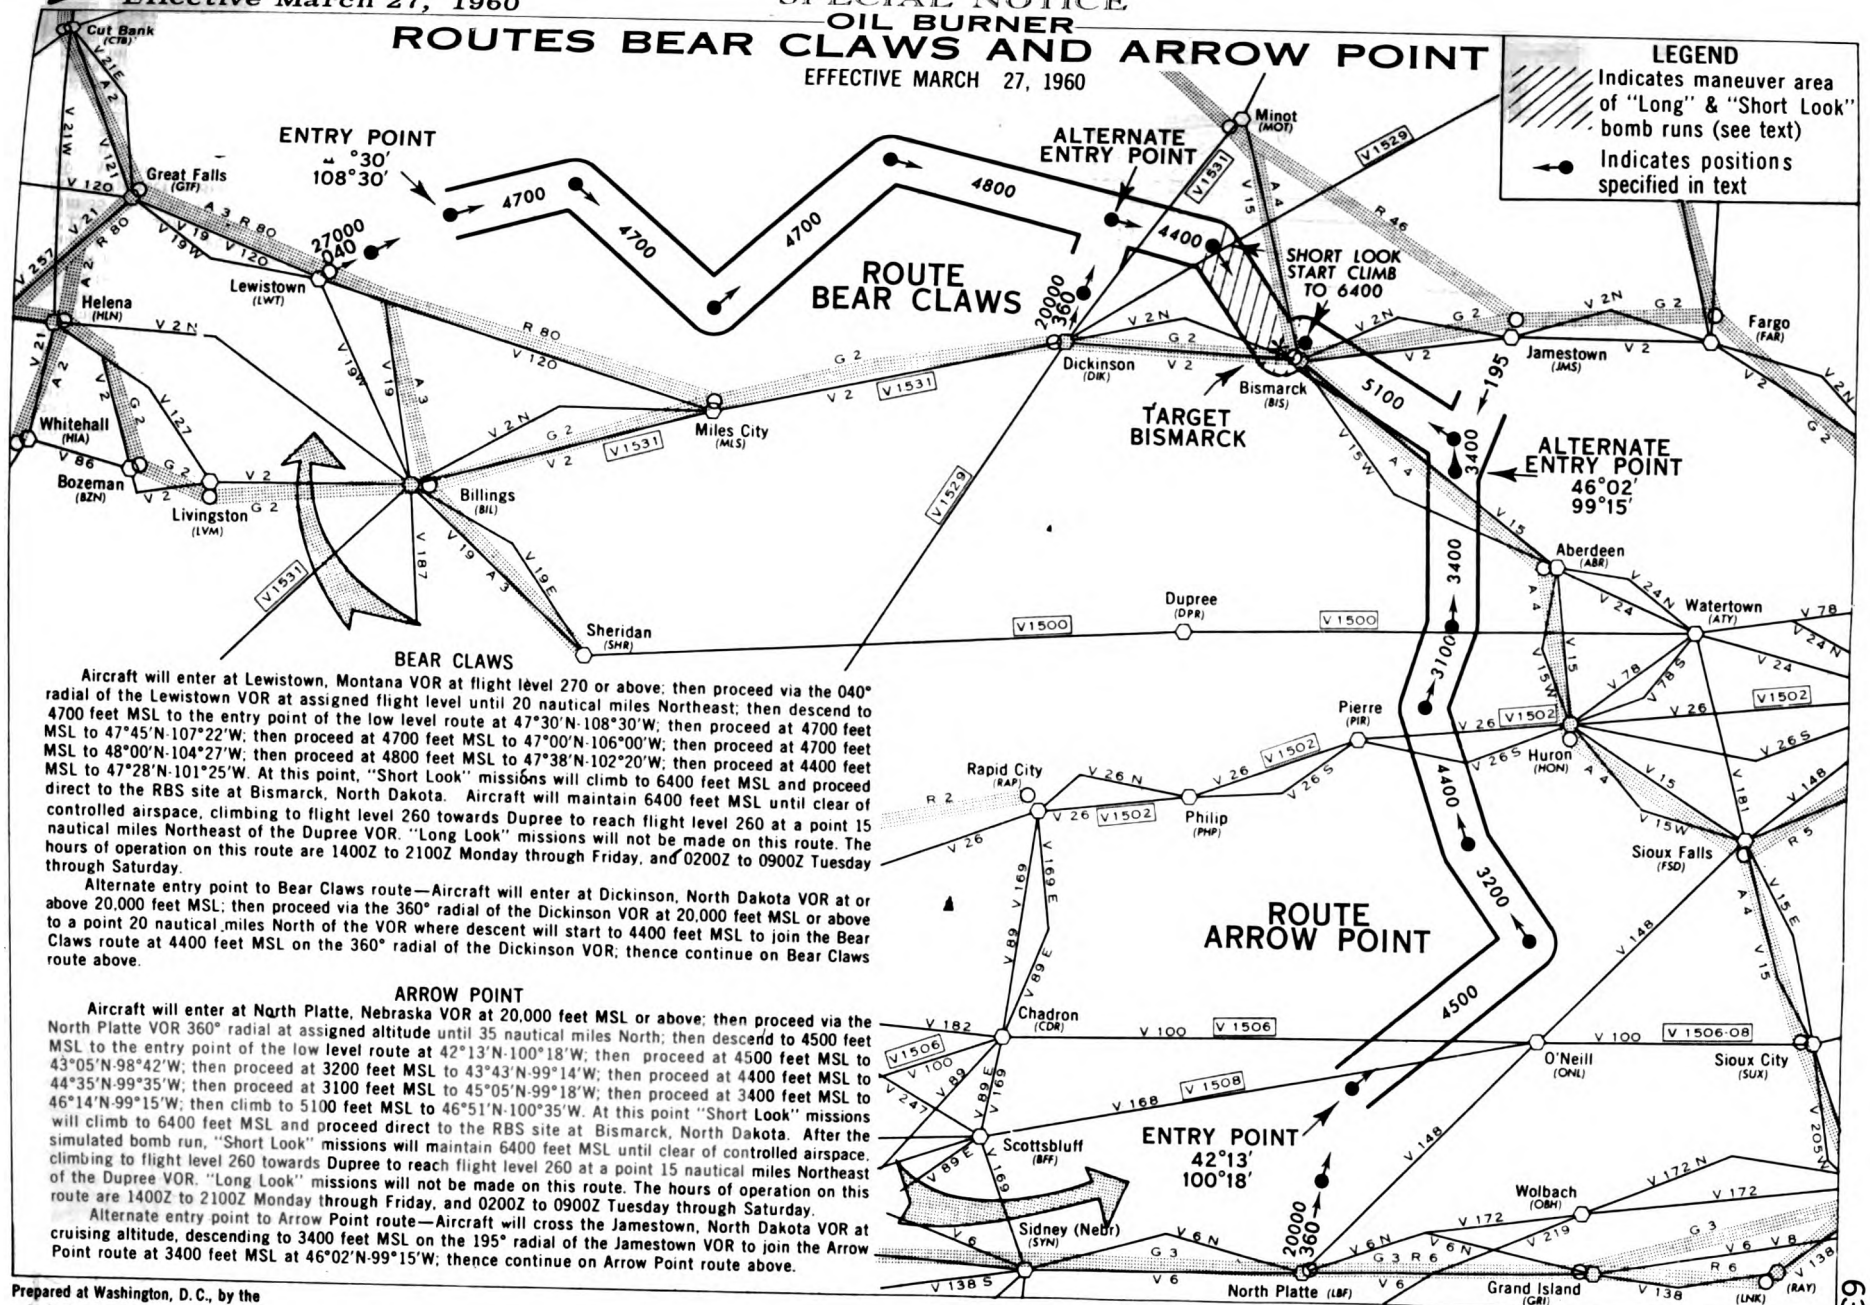
CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

NEW FEDERAL AVIATION AGENCY STATIONS NAMES: Effective 15 February 1960, the names of FAA stations will be changed as follows:

Air Traffic Communications Station (ATCS) will become Flight Service Station(FSS), and International Air Traffic Communications Station (IATCS) will become International Flight Service Station (IFSS). Stations will continue to use the identifier RADIO in air/ground communications and broadcasts but will use FLIGHT SERVICE when answering telephones and flight assistance interphones.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command) is conducting low level navigational flights in B-47 and B-52 jet acft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following 6 pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

			miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-35-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 8 miles



Effective March 27, 1960

SPECIAL NOTICE

OIL BURNER

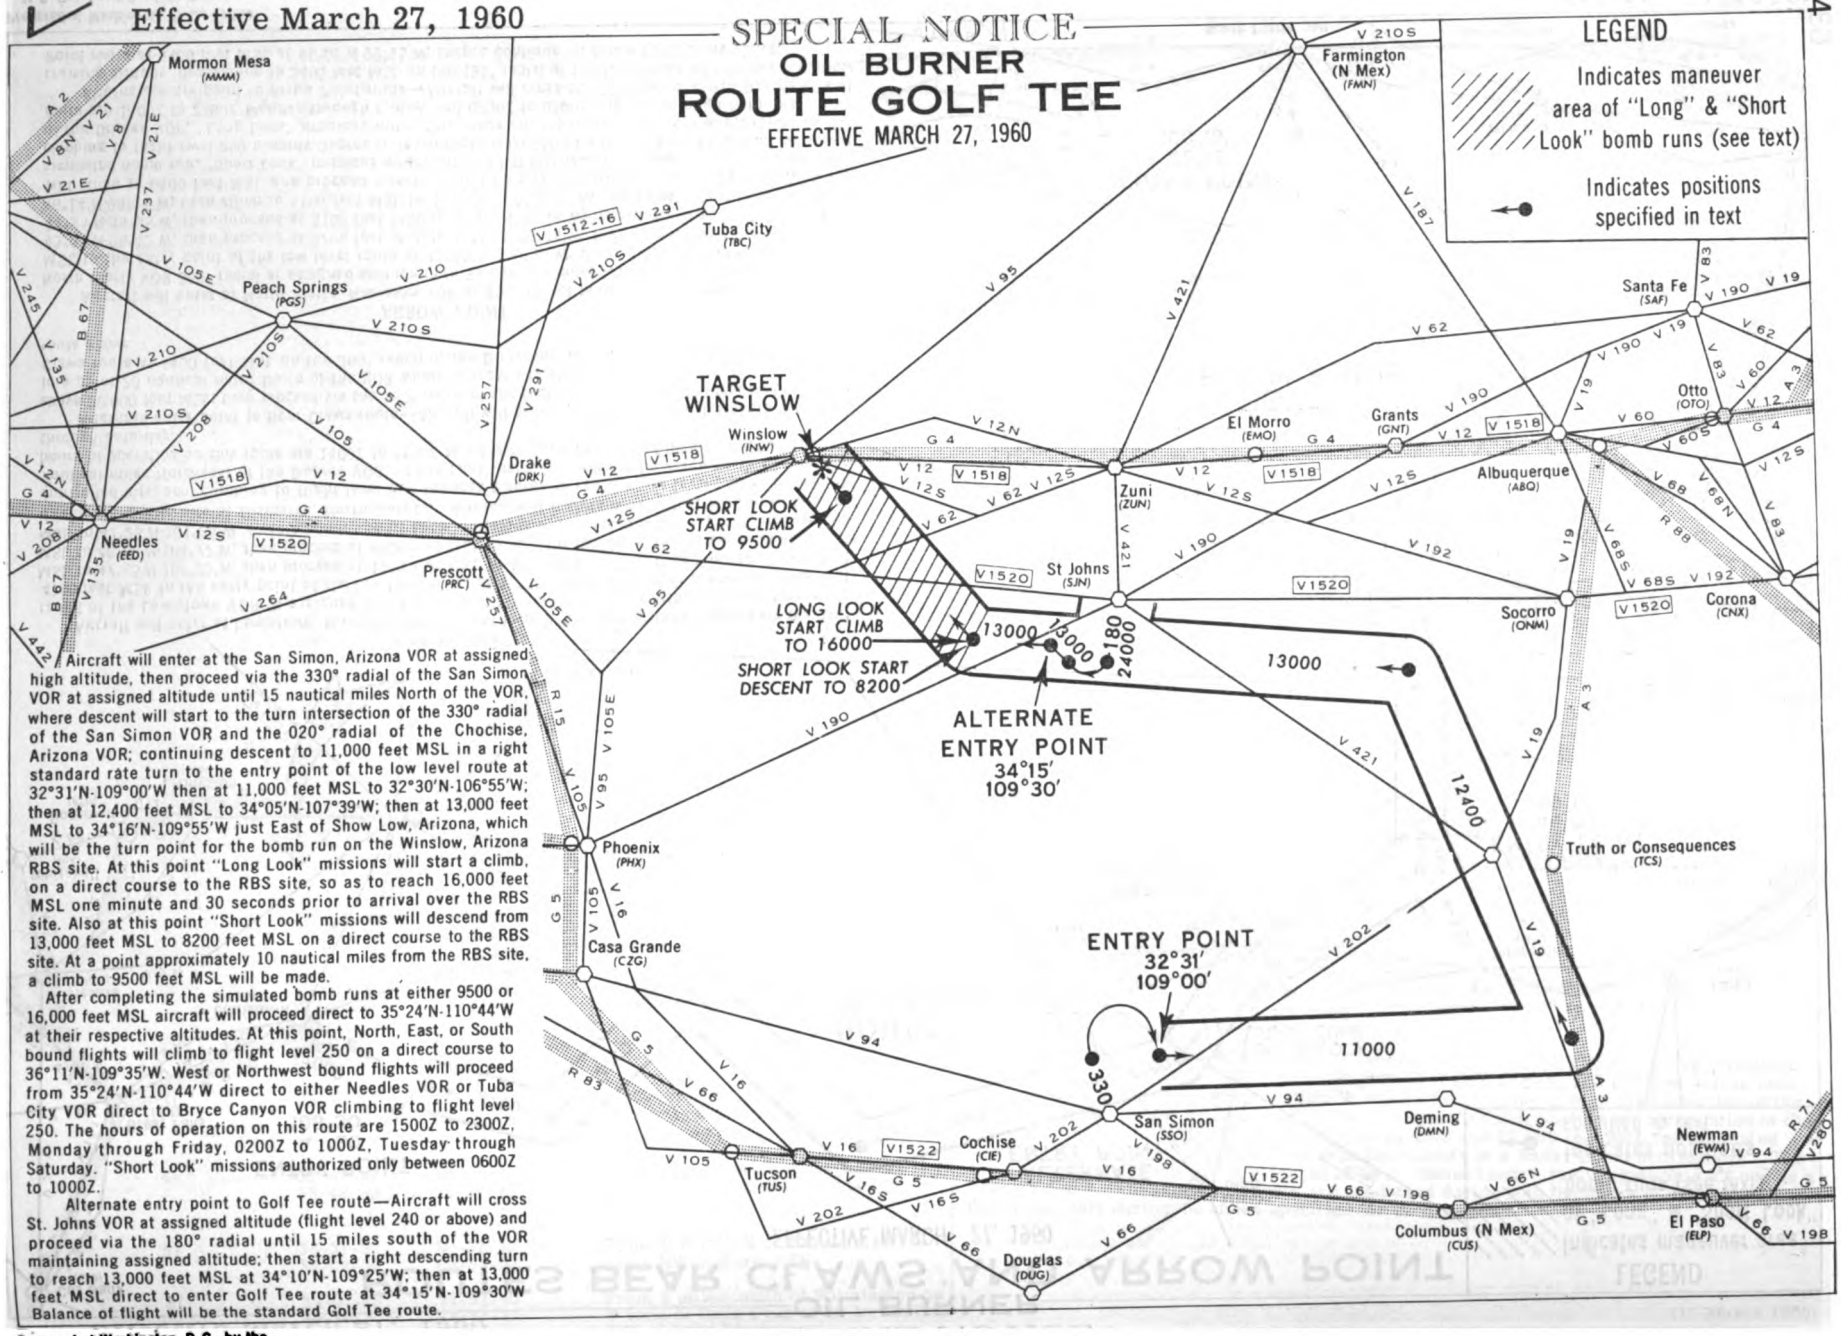
ROUTES BEAR CLAWS AND ARROW POINT

EFFECTIVE MARCH 27, 1960

BEAR CLAWS

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.



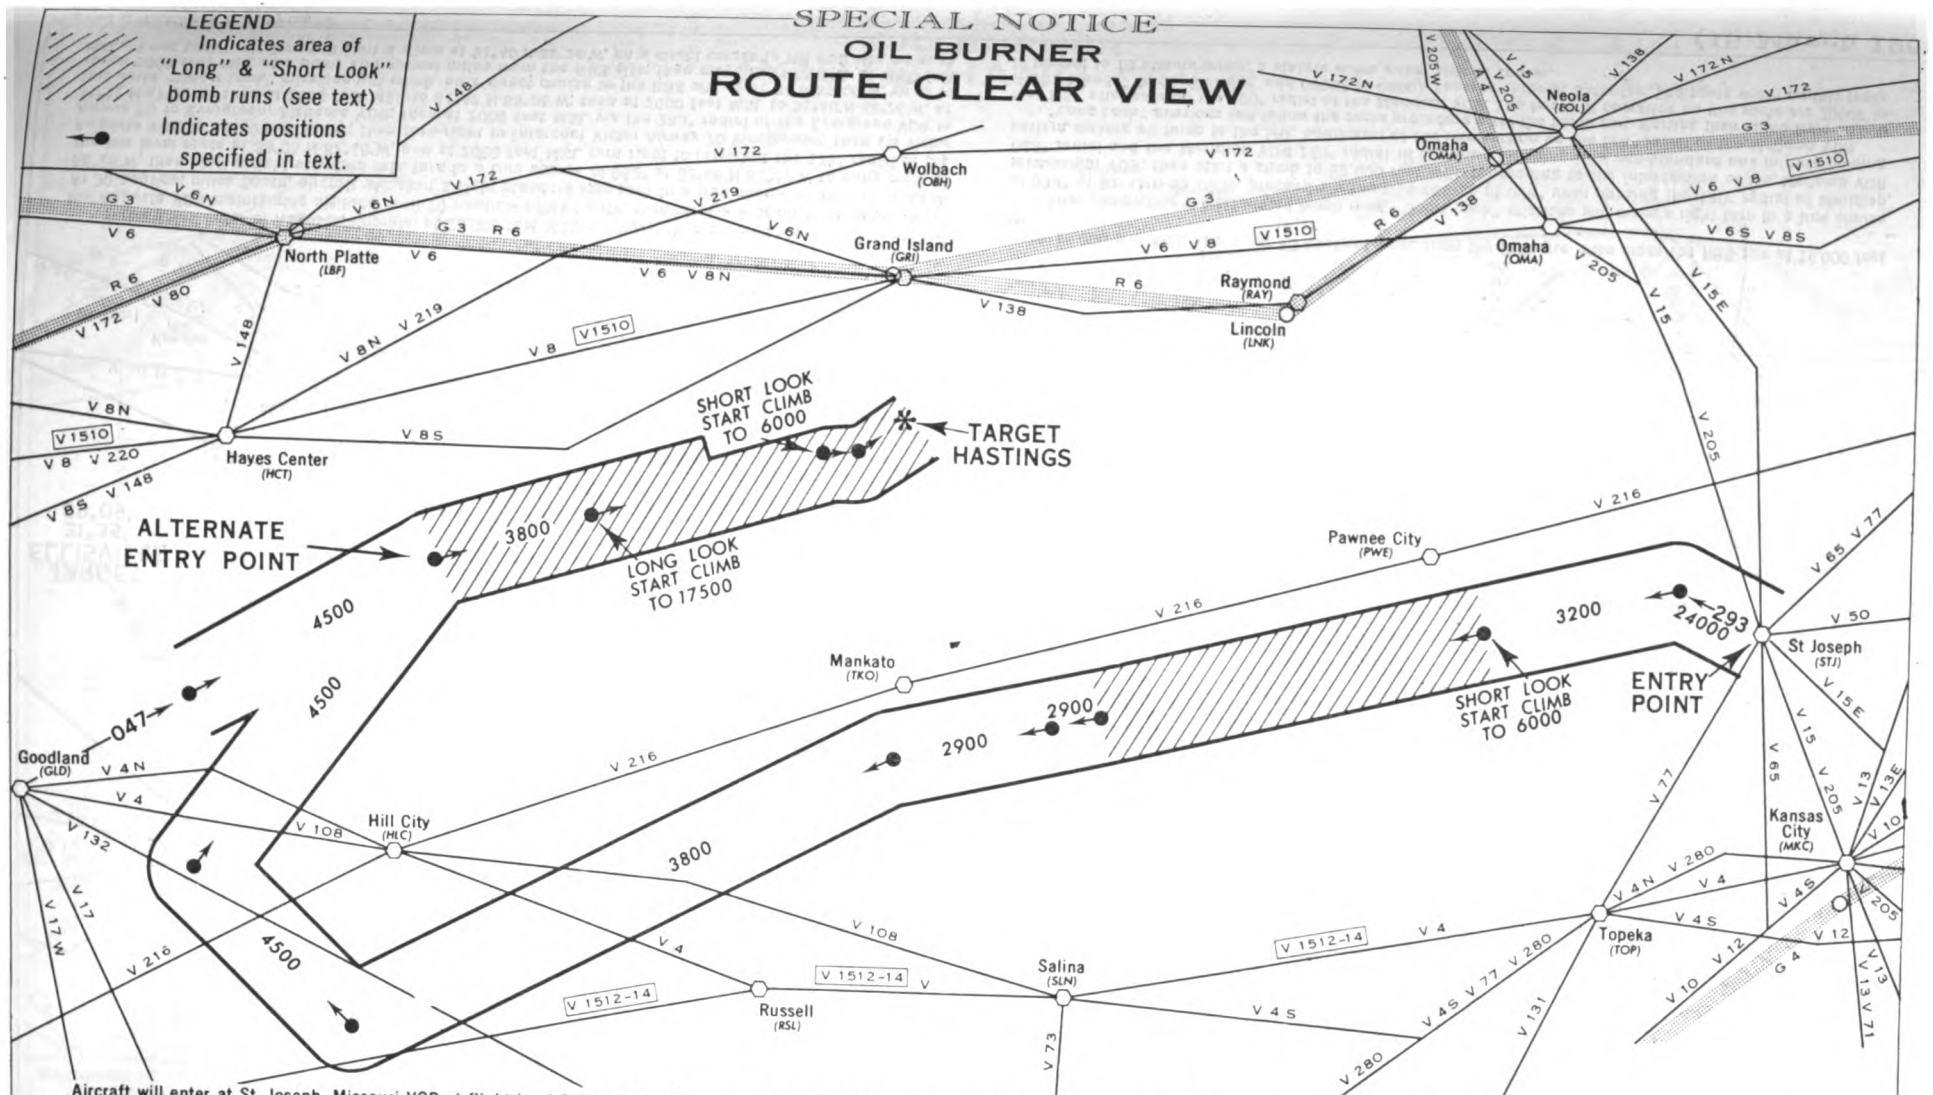
ARROW POINT

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 360° radial at assigned altitude until 35 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°13'N-100°18'W; then proceed at 4500 feet MSL to 43°05'N-98°42'W; then proceed at 3200 feet MSL to 43°43'N-99°14'W; then proceed at 4400 feet MSL to 44°35'N-99°35'W; then proceed at 3100 feet MSL to 45°05'N-99°18'W; then proceed at 3400 feet MSL to 46°14'N-99°15'W; then climb to 5100 feet MSL to 46°51'N-100°35'W. At this point "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. After the simulated bomb run, "Short Look" missions will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Arrow Point route—Aircraft will cross the Jamestown, North Dakota VOR at cruising altitude, descending to 3400 feet MSL on the 195° radial of the Jamestown VOR to join the Arrow Point route at 3400 feet MSL at 46°02'N-99°15'W; thence continue on Arrow Point route above.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE MARCH 27, 1960



Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise, Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31′N-109°00′W then at 11,000 feet MSL to 32°30′N-106°55′W; then at 12,400 feet MSL to 34°05′N-107°39′W; then at 13,000 feet MSL to 34°16′N-109°55′W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24′N-110°44′W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11′N-109°35′W. West or Northwest bound flights will proceed from 35°24′N-110°44′W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 1500Z to 2300Z, Monday through Friday, 0200Z to 1000Z, Tuesday through Saturday. "Short Look" missions authorized only between 0600Z to 1000Z.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10′N-109°25′W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15′N-109°30′W Balance of flight will be the standard Golf Tee route.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

ROUTE CLEAR VIEW

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W; then climb to 6000 feet MSL for a "Short Look" mission at 39°43'N-97°30'W; then descend so as to reach 2900 feet MSL prior to 39°41'N-97°41'W; then direct at 2900 feet MSL to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

U.S. Coast and Geodetic Survey

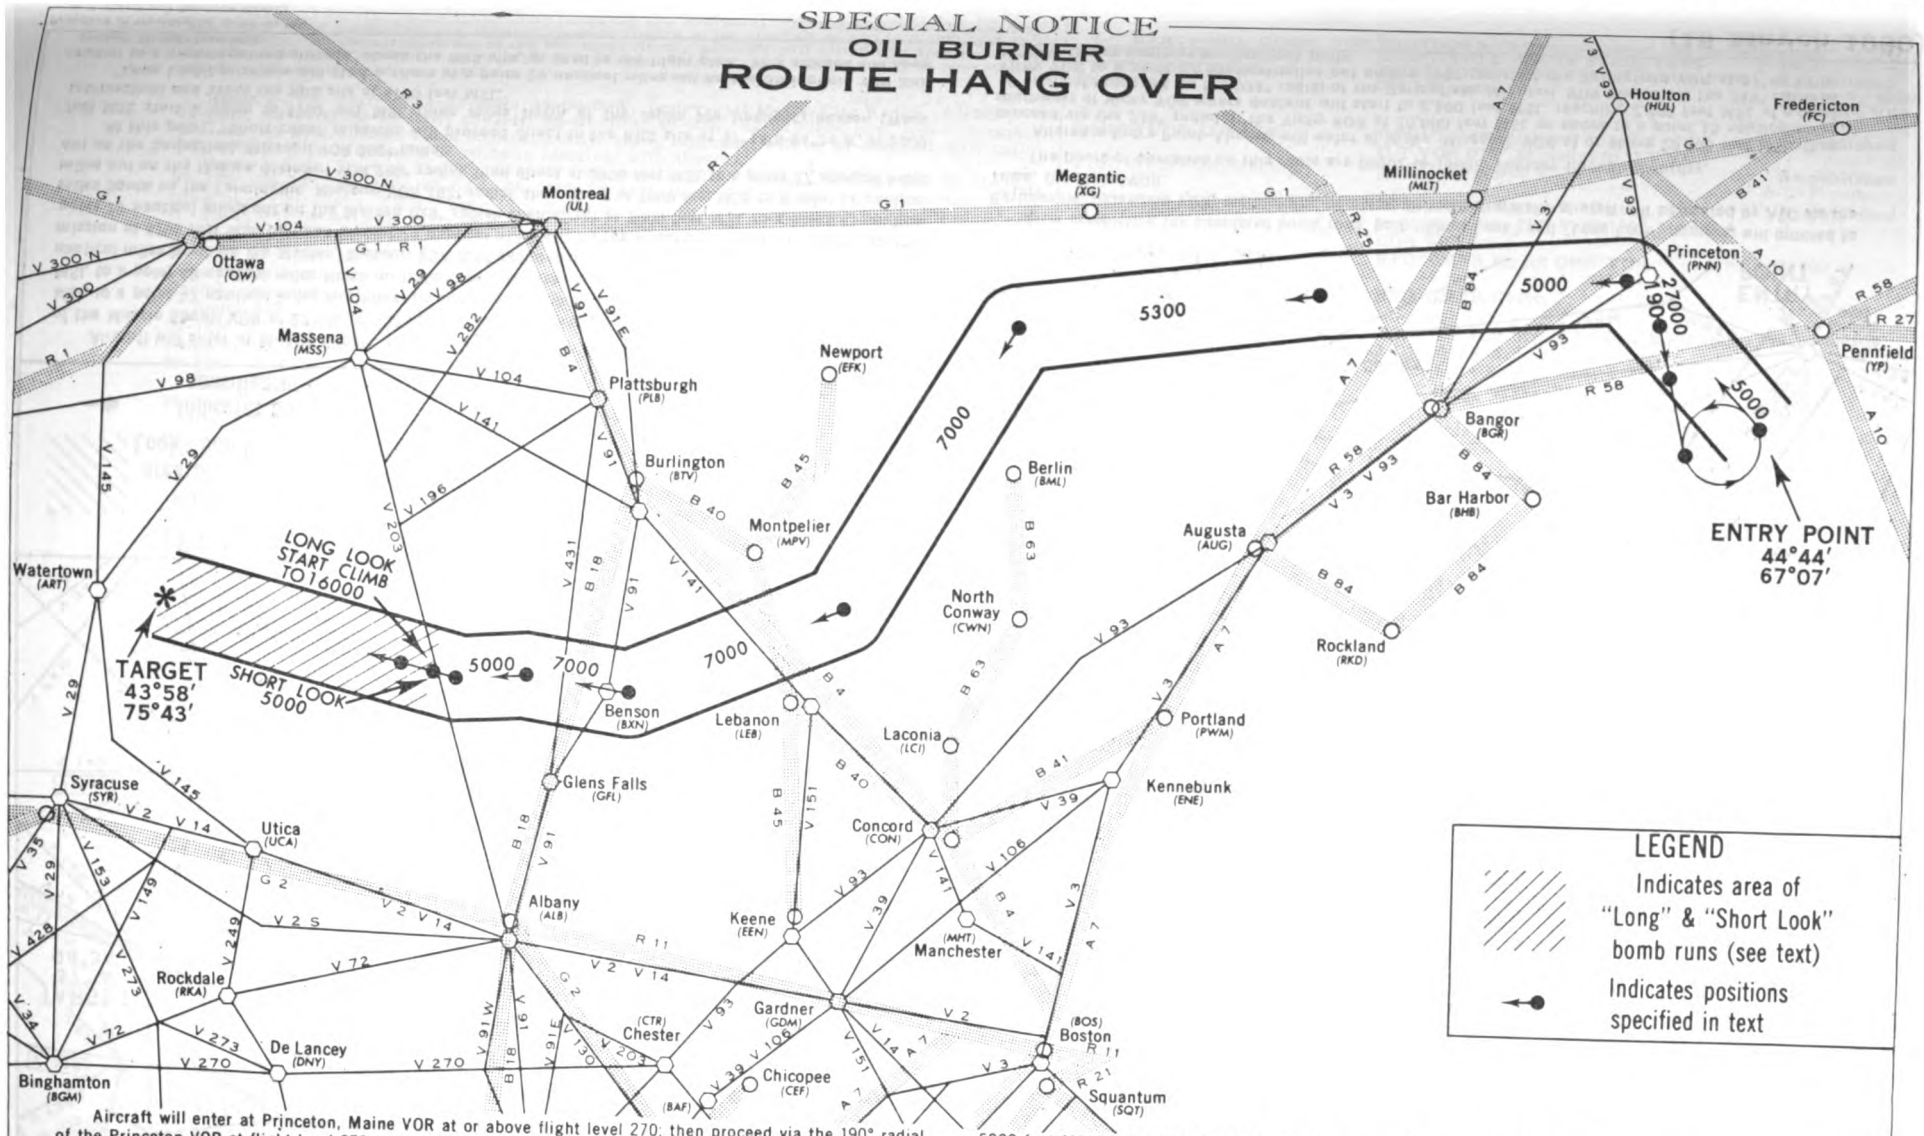
(15 March 1960)

SPECIAL NOTICE

OIL BURNER

ROUTE DERBY HORSE

Aircraft will enter at Augusta, Georgia, at 23,000 feet MSL or above; then proceed via the 175° radial of the Augusta VOR maintaining altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49′N-82°26′W; then start a right standard rate turn to a true course of 092° at 33°06′N-82°30′W to entry point of the low level route at 33°05′N-82°10′W, and at 2000 feet MSL turn right to intercept the 175° radial of the Augusta VOR to 32°50′N-82°04′W; then turn right to intercept Victor Airway 70 Westbound; then via Victor Airway 70 to Evergreen, Alabama VOR; then at 2000 feet MSL via the 283° radial of the Evergreen VOR to 31°32′N-87°31′W; then at 2000 feet MSL to 31°42′N-88°06′W; then at 2000 feet MSL to 31°40′N-88°26′W. At this point, "Short Look" missions will climb, on a direct course to the RBS site at 31°35′N-89°09′W, so as to reach 5000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 5000 feet MSL. "Long Look" missions will start a climb at 31°40′N-88°26′W, on a direct course to the RBS site, so as to reach 16,000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 16,000 feet MSL.

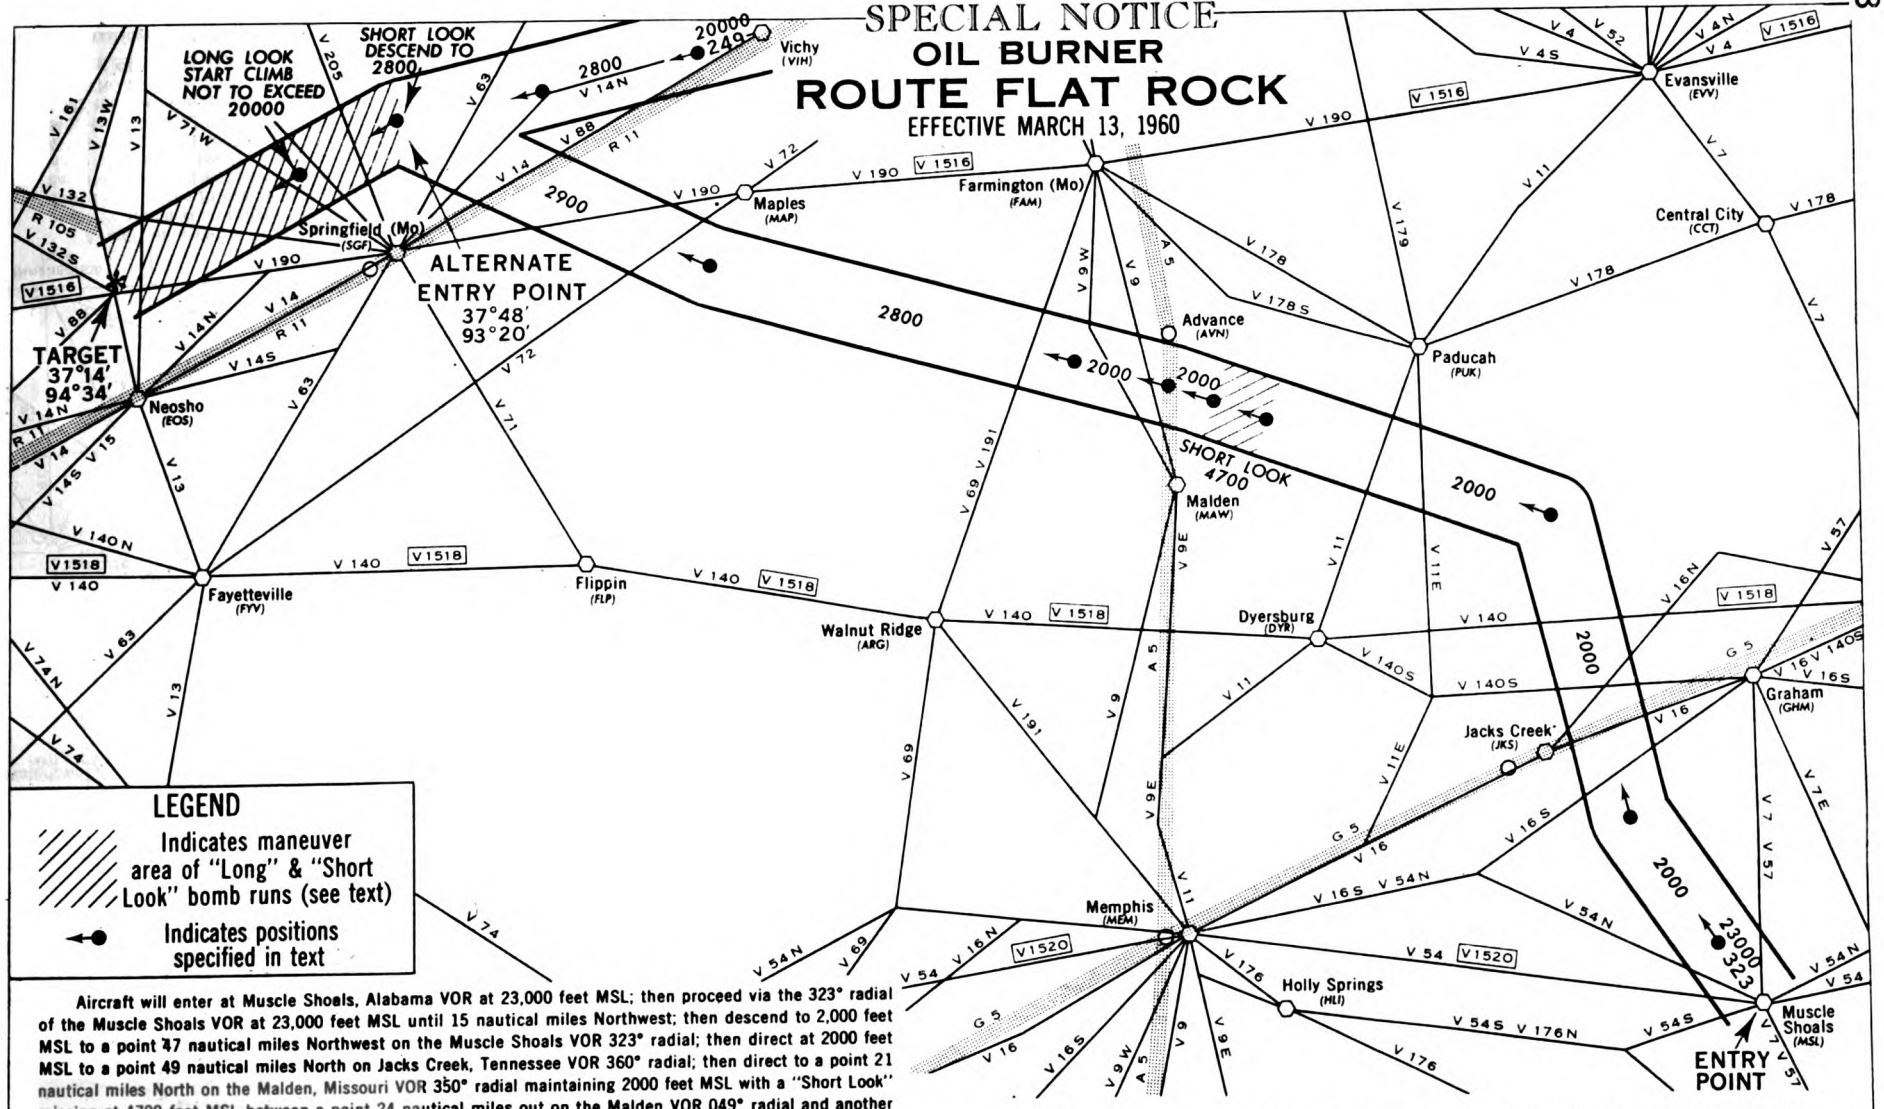


After completing the simulated bomb runs, "Short Look" missions will make a right turn to a true course of 096° at 31°43′N-89°09′W, proceed via the true course of 096° until passing the 180° radial of Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding to the intersection of the McComb VOR 068° radial and the Meridian VOR 160° radial to continue climbing in a non-standard one minute holding pattern making all turns to the left, Southwest of the intersection on the 068° radial of the McComb VOR.

"Long Look" missions will follow the same procedure after the bomb run, starting their climb from 16,000 feet MSL after passing the 180° radial of the Meridian VOR. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday. The route width on this route is limited to 10 statute miles, 5 statute miles either side of course.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(15 March 1960)



ROUTE HANG'OVER

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by [illegible] when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above [illegible]. At the termination of the low level flight, aircraft will climb to altitudes between 10,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-Q-3: Entry point 35-18N, 88-00W (Entry reporting point -Jacks Creek Radio); 36-34N, 88-12W; 37-20N, 91-42W; 37-33N, 93-23W (end nav. leg); to target Joplin, Mo.

Route 2-R-1: Start at 29-17N, 90-40W; to 29-42N, 92-09W. Entry reporting point- New Orleans Radio.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point- Springfield Radio.

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

FEDERAL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS AND JET ROUTES:

(Note: All bearings and radials are TRUE unless otherwise indicated.)

Effective 0001 EST 9 March 1960:

FEDERAL AIRWAYS:

(1) VOR 3 (Key West, Fla., to Presque Isle, Maine) amended as follows: In the text delete "Biscayne" and substitute therefor "Biscayne Bay" wherever it appears.

(2) VOR 51 (Key West Fla., to Chicago, Ill.) amended as follows: In the text delete "Biscayne" and substitute therefor "Biscayne Bay" wherever it appears.

(3) VOR 295 (Miami, Fla., to Cross City, Fla.) amended as follows: In the text delete "Biscayne " and substitute therefor "Biscayne Bay" wherever it appears.

CONTROL AREA EXTENSIONS:

(1) (West Palm Beach, Fla.) amended as follows: In the text delete "Biscayne" and substitute therefor "Biscayne Bay" wherever it appears.

(2) (Miami, Fla.) amended as follows: In the text delete "Biscayne" and substitute therefor "Biscayne Bay" wherever it appears.

VOR REPORTING POINT:

(1) Domestic VOR Reporting Point amended as follows: In the text delete "Biscayne, Fla., omnirng stn." and substitute therefor "Biscayne Bay, Fla., VOR."

Effective 0001 EST 7 April 1960:

FEDERAL AIRWAYS:

(1) VOR 23 (San Diego, Calif., to Bellingham, Wash) amended as follows: (a) In the caption delete "(San Diego, Calif., to Bellingham, Wash.)" and substitute therefor "(San Diego, Calif., to the U.S.-Canadian Border.)". (b) In the text delete "Bellingham, Wash., VOR to the U.S.-Canadian Border via the Bellingham VOR 304° radial." and substitute therefor "Bellingham, Wash., VOR to the U.S.-Canadian Border via the Bellingham VOR direct radial to the Vancouver, British Columbia, VOR."

(2) VOR 99 (Newport, Oreg., to Vancouver, British Columbia) amended as follows: (a) In the caption delete "(Newport, Oreg., to Vancouver, British Columbia)" and substitute therefor "(Newport, Oreg., to the U.S.-Canadian Border.)" (b) In the text delete "Bellingham, Wash., omnirng stn; to the Vancouver, British Columbia, rdo rng stn." and substitute therefor "Bellingham, Wash., VOR to the U.S.-Canadian Border via the Bellingham VOR direct radial to the Vancouver British Columbia, VOR."

CONTROL AREAS:

(1) VOR 23 (San Diego, Calif., to Bellingham, Wash.) amended as follows: In the caption delete "(San Diego, Calif., to Bellingham, Wash.)" and substitute therefor "(San Diego, Calif., to the U.S.-Canadian Border)."

(2) VOR 99 (Newport, Oreg., to Vancouver, B.C.) amended as follows: In the caption delete "(Newport, Oreg., to Vancouver, B.C.)" and substitute therefor "(Newport, Oreg., to the U.S.-Canadian Border)".

Effective 0001 EST 5 May 1960:

FEDERAL AIRWAYS:

(1) Green 4 (Los Angeles, Calif., to Philadelphia, Pa.) amended as follows: (a) In the caption, delete "(Los Angeles, Calif., to Philadelphia, Pa)." and substitute therefor "(Los Angeles, Calif., to Amarillo, Tex., and Wichita, Kans., to Philadelphia, Pa.)." (b) In the text, delete "Amarillo, Tex., rdo rng stn; the Int. of E crs of the Amarillo, Tex., rdo rng and the SW crs of the Gage, Okla., rdo rng; Gage, Okla., rdo rng stn; Wichita, Kans., rdo rng stn; Kansas City, Mo., rdo rng stn;" and substitute therefor "to the Amarillo, Tex., RR. From the Wichita, Kans., RR via Kansas City, Mo., RR;"

(2) Amber 7 (Miami, Fla., to U.S.-Canadian Border) amended as follows: (a) In the caption delete "(Miami, Fla., to U.S.-Canadian Border)." and substitute therefor"(Miami, Fla., to Daytona Beach, Fla., and Florence, S.C., to U.S.-Canadian Border)." (b) In the text delete "Daytona Beach, Fla., rdo rng stn; Jacksonville, Fla., rdo rng stn; Savannah, Ga., RR; the Int. of a line brng 021° from the Savannah RR with a line bearing 260° from the Charleston RR; Charleston, S.C., RR; the Int of a line bearing 035° from the Charleston RR with a line bearing 178° from the Florence RR; Florence, S.C., RR; the Int of the N crs of the Florence, S.C., rdo rng" and substitute therefor "to the Daytona Beach, Fla., RR. From the Florence, S.C., RR via the Int. of the N crs of the Florence, S.C. RR".

(3) Red 74 (Biloxi, Miss., to Brookley AFB, Ala.) is revoked.

(4) Blue 42 (Goshen, Ind., to Saginaw, Mich.) is revoked.

(5) Blue55 (Crestview, Fla., to Montgomery, Ala.) is revoked.

(6) Blue 64 (Wink, Tex., to Hobbs, N. Mex.) is revoked.

(7) VOR 4 (Seattle, Wash., to Herndon, Va.) amended as follows: In the text delete "including a N alternate via the Int. of the Laramie omnirng 131° T and the Denver omnirng 016° T radials;" and substitute therefor "including a N alternate from the Laramie VOR to the Denver VOR via the Gill, Colo., VOR;".

(8) VOR 8 (Long Beach, Calif., to Washington, D.C.) amended as follows: In the text delete "Pittsburgh, Pa., omnirng stn;" and substitute therefor "Pittsburgh, Pa., VOR; Indian Head, Pa., VOR;".

(9) Blue 68 (Midland, Tex., to Hobbs, N. Mex.) is revoked.

(10) VOR 16 (Los Angeles, Calif., to Boston, Mass.) amended as follows: In the text, delete "including a N alternate via the Int. of the Knoxville VOR 054° and the Pulaski VOR 260° radials;" and substitute therefor "including a N alternate from the Knoxville VOR to the Pulaski VOR via the Int of the Knoxville VOR 050° T with the Blackford, Va., VOR 246° T radials and the Blackford VOR;".

(11) VOR 24 (Aberdeen, S. Dak., to Lone Rock, Wis.) amended to read: "From the Aberdeen, S. Dak., VOR via the Watertown, S. Dak., VORTAC, including a N alternate; Redwood Falls, Minn., VOR, including a N alternate via the Int. of the Watertown VORTAC 086° T and the Redwood Falls, VOR 305° T radials; Rochester, Minn., VOR; to the Lone Rock, Wis., VOR, including a S alternate from the Rochester VOR to the Lone Rock VOR via the Waukon, Iowa VOR."

(12) VOR 50 (St. Joseph, Mo., to Dayton, Ohio) amended as follows: (a) In the caption delete "(St. Joseph, Mo., to Dayton, Ohio)." and substitute therefor "(Pawnee City, Neb., to Dayton, Ohio.". (b) In the text delete "From the St. Joseph, Mo., VOR via the Kirksville, Mo., VOR;" and substitute therefor "From the Pawnee City, Neb., VOR via the St. Joseph, Mo., VOR; Kirksville, Mo., VOR;".

(13) VOR 55 (Dayton, Ohio to Green Bay, Wis.) amended as follows: (a) In the caption delete "(Dayton, Ohio to Green Bay, Wis.)" and substitute therefor "(Dayton, Ohio to Eau Claire, Wis.)." (b) In the text delete "to the Green Bay, Wis., VOR." and substitute therefor "Green Bay, Wis., VORTAC; Stevens Point, Wis., VOR; Int of the Stevens Point, VOR 281° T and the Eau Claire VOR 107° T radials; to the Eau Claire, Wis., VOR.".

(14) VOR 89 (Denver, Colo., to Rapid City, S, Dak.) amended as follows: In the text delete "including an E alternate via the Int of the Denver VOR 016° and the Cheyenne VOR 131° radials;" and substitute therefor "including an E alternate from the Denver VOR to the Cheyenne VOR via the Gill, Colo., VOR and the Int of the Gill VOR 003°T and the Cheyenne VOR 131° T radials;".

(15) VOR 107 (Los Angeles, Calif., to Red Bluff, Calif.) amended as follows: (a) In the caption delete "(Los Angeles, Calif., to Red Bluff, Calif.)" and substitute therefor "(Los Angeles, Calif., to Oakland, Calif.). (b) In the text delete "Oakland, Calif., omnirng stn; Int of the Oakland omnirng 330° T and the Ukiah omnirng 147° T radials; Ukiah, Calif., omnirng stn; to the Red Bluff, Calif., omnirng stn." and substitute therefor "to Oakland, Calif., VORTAC."

(16) VOR 129 (Polo, Ill., to Eau Claire, Wis.) amended to read: "From the Polo, Ill., VOR via the Rewey, Wis., VOR; Waukon, Iowa, VOR; Nodine, Minn., VOR to the Eau Claire, Wis., VOR."

(17) VOR 199 (San Francisco, Calif., to Red Bluff, Calif.) amended to read: "From the San Francisco, Calif., VOR via the Int of the San Francisco VOR 304°T and the Ukiah VOR 172°T radials; the Ukiah, Calif., VOR; to the Red Bluff, Calif., VORTAC. The portion of this airway which lies within the geographic limits of, and between the designated altitudes of, the Tomales Point Restricted Area (R-519) is excluded during the time of designation of this restricted area."

(18) VOR 207 (Denver, Colo., to Scottsbluff, Nebr.) amended to read: "From the Denver, Colo., VOR via the Gill., Colo., VOR to the Scottsbluff, Nebr., VOR."

(19) VOR 268 (Flint Stone, Md., to Baltimore, Md.) amended as follows: In the text, delete "From the point of Int of the Front Royal, Va., VOR 335° and the Martinsburg, W. Va., VOR 298° radials," and substitute therefor," From the point of Int of the Grantsville, Md., VOR 082° T and the Martinsburg, W. Va., VOR 297° T radials".

(20) VOR 474 (Bellaire, Ohio, to Lancaster, Pa.) added to read: From the Bellaire, Ohio, VOR via the Indian Head, Pa., VOR; St. Thomas , Pa., VOR; to the Lancaster, Pa., VOR."

CONTROL AREAS:

(1) Green 4(Los Angeles, Calif., to Philadelphia, Pa.) amended as follows: In the caption, delete "(Los Angeles, Calif., to Philadelphia, Pa.) and substitute therefor"(Los Angeles, Calif., to Amarillo, Tex., and Wichita, Kans., to Philadelphia, Pa.)

(2) Amber 7 (Miami, Fla., to U.S.-Canadian Border) amended as follows: In the caption delete "(Miami, Fla., to U.S.-Canadian Border)." and substitute therefor "(Miami, Fla., to Daytona Beach, Fla., and Florence, S.C., to U.S.-Canadian Border.)".

(3) Blue 42 (Goshen, Ind., to Saginaw, Mich.) is revoked.

(4) Red 74 (Biloxi, Miss., to Brookley AFB, Ala.) is revoked.

(5) Blue 55 (Crestview, Fla., to Montgomery, Ala.) is revoked.

(6) Blue 64 (Wink, Tex., to Hobbs, N. Mex.) is revoked.

(7) Blue 68 (Midland, Tex., to Hobbs, N. Mex.) is revoked.

(8) VOR 24 (Aberdeen, S, Dak., to Lone Rock, Wis.) amended to read: "All of VOR Federal airway No. 24 including N alternates and a S alternate.

CONTROL AREA EXTENSIONS:

(1) (Brownsville, Tex.) The text is amended to read: "The airspace over the U.S. within a 40-mile radius of the Brownsville, Tex., VOR S of lat 26-30-00N; within 5 mi either side of the Harlingen, Tex., VOR 013°T radial from the VOR to VOR Federal airway No. 68; and that airspace W of V 68 S of lat 26-31-00N, and E of long. 98-00-00 W., excluding that portion overlying Corpus Christi Restricted Area (R-227)."

(2) (Jacksonville, Fla.) amended as follows: In the text delete "Amber Federal airway No. 7" and substitute therefor "VOR Federal airway No. 3".

(3) (Riverside, Calif.) amended as follows: "That airspace S of March AFB bounded on the E by VOR Federal airway No. 117, on the S and SE by VOR Federal airway No. 208, on the W by VOR Federal airway No. 23 and Restricted Area (R-294), on the NW by VOR Federal airway No. 8 and on the N by VOR Federal airway No. 16.

(4) (San Francisco, Calif)amended to read: "All of the airspace in the San Francisco area bounded by a line beginning at lat 38-15-00N, long. 122-37-00W; to lat 37-43-34N, long. 122-13-21W; to 37-27-20N, 121-50-30W; to 37-00-55N, 122-17-15W; thence N along the 3 nmi line off-shore to 37-12-20N, 122-28-00W; to 37-14-00N, 122-24-55W; to 38-08-30N, 122-54-00W; thence to the point of beginning.

(5) (Lansing, Mich.) amended to read: The airspace within a 15 mi radius of the Lansing VOR, and within 5 mi either side of the NW crs of the Lansing RR extending from the RR to VOR Federal airway No. 274. The airspace S of Lansing bounded on the S by VOR Federal airway No. 100, on the NW by VOR Federal airway No. 218, and on the NE by VOR Federal airway No. 45.

(6) (Lompoc, Calif.) amended as follows: "That airspace within a 35-mi radius of the geographic center of Vandenberg AFB(lat 34-43-45, long.120-34-15), excluding that portion overlying Restricted Areas (R-531) and (R/W 532) and that portion outside the United States".

CONTROL ZONES:

(1) (Lompoc, Calif) amended as follows: "Within a 5-mi radius of the geographical center of Vandenberg AFB (lat 34-43-45, long. 120-34-15), and within 2 mi SW of, and 3 mi NE of the Vandenberg TVOR 316° T radial from the 5-mi radius zone to the TVOR excluding that portion overlying the Navy Missile facility, Pt. Arguello, Calif., Restricted Areas (R-531) and R/W 532)."

REPORTING POINTS:

(1) Green 4 (Los Angeles, Calif., to Philadelphia, Pa.) amended as follows: (a) In the caption, delete "(Los Angeles, Calif., to Philadelphia, Pa.)" and substitute therefor "(Los Angeles, Calif., to Amarillo, Tex., and Wichita, Kans., to Philadelphia, Pa.)." (b) In the text, delete "Gage, Okla., rdo rng stn;".

(2) Amber 7 (Miami, Fla., to U.S.-Canadian Border) amended as follows: (a) In the caption delete "(Miami, Fla., to U.S.-Canadian Border)," and substitute therefor "(Miami, Fla., to Daytona Beach, Fla., and Florence, S.C., to U.S.-Canadian Border.)". (b) In the text delete "Brunswick, Ga., rdo marker beacon; Savannah, Ga., rdo rng stn; Charleston, S.C., rdo rng stn;".

(3) Red 63 (Bangor, Mich., to Jackson, Mich.) amended as follows: In the text, delete "No reporting point designation." and substitute therefor, "Battle Creek, Mich., RR."

(4) Red 74 (Biloxi, Miss., to Brookley AFB, Ala.) is revoked.

(5) Blue 42 (Goshen, Ind., to Saginaw, Mich.) is revoked.

(6) Blue 55 (Crestview, Fla., to Montgomery, Ala.) is revoked.

(7) Blue 64 (Wink, Tex., to Hobbs, N. Mex.) is revoked.

(8) Blue 68 (Midland, Tex., to Hobbs, N. Mex.) is revoked.

VOR CONTROL AREAS:

(1) VOR 50 (St. Joseph, Mo., to Dayton, Ohio) amended as follows: In the caption delete "(St. Joseph, Mo., to Dayton, Ohio)." and substitute therefor "(Pawnee City, Neb., to Dayton, Ohio)."

(2) VOR 55 (Dayton, Ohio to Green Bay, Wis.) amended as follows: In the caption delete "(Dayton, Ohio to Green Bay, Wis.)." and substitute therefor "(Dayton, Ohio, to Eau Claire, Wis.)."

(3) VOR 107 (Los Angeles, Calif., to Oakland, Calif.) amended to read: "All of VOR Federal airway No. 107."

(4)VOR 199 (San Francisco, Calif., to Red Bluff, Calif.) amended to read: "All of VOR Federal airway No. 199."

(5) VOR 207 (Denver, Colo., to Scottsbluff, Nebr.) amended to read: "All of VOR Federal airway No. 207."

(6) VOR 474 (Bellaire, Ohio to Lancaster, Pa.) added to read: "All of VOR Federal airway No. 474".

VOR REPORTING POINTS:

The following VOR Domestic Reporting Point are:

(1) Amended as follows: In the text add: "Stevens Point, Wis., VOR."

(2) Amended to read: (a) Scottdale Int: The Int of the Pittsburgh, Pa., VOR 120°T and the Uniontown, Pa., VOR 018° T radials. (b) Flint Stone Int: The Int of the Grantsville, Md., VOR 082° T and the Martinsburg, W. Va., VOR 297° T radials.

(3) Amended as follows: In the text delete "Saltair Int.: The Int. of the Salt Lake City, Utah, omnirng 265° T and the Ogden, Utah, omnirng 194° T radials."

JET ROUTE:

(1) L/MF Jet Route No. 65 (Phoenix, Ariz., to Red Bluff, Calif.) is revoked.

Effective 0001 EST 2 June 1960:

FEDERAL AIRWAY:

(1) VOR 45 (New Bern, N.C., to Charleston, W. Va., Lexington, Ky., to Waterville, Ohio, and Tipton, Mich., to Saginaw, Mich.) amended as follows: In the text delete "Int of the New Bern VOR 305° and the Raleigh VOR 116°T radials;" and substitute therefor "Kinston, N.C., VOR;".

Effective 0001 EST 30 June 1960:

FEDERAL AIRWAY:

(1) VOR 113 (Paso Robles, Calif., to Reno, Nev.) amended as follows: "From the Paso Robles, Calif., VOR via the Priest, Calif., VOR; Los Banos, Calif. VOR; Stockton, Calif. VOR; Linden, Calif., VOR; Int of the Linden VOR 046° T and the Reno VOR 208°T radials; to the Reno, Nev., VOR. The portion of this airway which lies within the geographic limits of, and between the designated altitudes of, the Vernalis Restricted Area (R-280) is excluded during its time of designation."

Effective 0001 EST 25 August 1960:

FEDERAL AIRWAY:

(1) VOR 482 (Las Vegas, N. Mex., to Liberal, Kans.) amended as follows: "From the Las Vegas, N. Mex., VOR via the Clayton, N. Mex., VOR to the Liberal, Kans., VOR."

VOR CONTROL AREA:

(1) VOR 482 (Las Vegas, N. Mex., to Liberal Kans.) amended as follows: "All of VOR Federal Airway No. 482."

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

Effective 3 March 1960:

(Part 608 - Amendment 81)

(1) In Section 608.57, the Sheboygan, Wis., Restricted Area (R-83-B) is amended by deleting "Surface to 65,000 feet MSL" and substituting therefor "Surface to 45,000 feet MSL.".

Effective 5 May 1960:

(Part 608 - Amendment 79)

(1) In Section 608.14, add the following: Merced, Calif.(Castle AFB), Restricted Area/Military Climb Corridor (R-586). Description- That area centered on the NW crs of the Castle AFB ILS lclzr, beginning 5 smi NW of the airbase extending to 32 smi NW of the airbase with a width of 2 smi at the beginning and 4.6 smi at the outer extremity. Designated Altitudes - 2,200' MSL to 15,200' MSL from 5 smi NW of the airbase to 6 smi NW of the airbase. 2,200' MSL to 24,200' MSL from 6 to 7 smi NW of the airbase. 2,200' MSL to 27,000' MSL from 7 to 10 smi NW of the airbase. 6,200' MSL to 27,000' MSL from 10 to 15 smi NW of the airbase. 10,200' MSL to 27,000' MSL from 15 to 20 smi NW of the airbase. 15,200' MSL to 27,000' MSL from 20 to 25 smi NW of the airbase. 19,200' MSL to 27,000' MSL from 25 to 32 smi NW of the airbase. Time of designation: Continuous. Controlling Agency - Castle AFB approach control.

(Part 608 - Amendment 82)

(2) Section 608.14, add the following: San Rafael, (Hamilton AFB), Calif., Restricted Area/Military Climb Corridor (R-590). Description- That area centered on the 325° T radial of the Hamilton TVOR extending from 7 smi NW of the airbase to 34 smi NW of the airbase having a width of 2 smi at the beginning and a width of 4.6 smi at the outer extremity. Designated Altitudes - 2,000' MSL to 15,000' MSL from 7 smi NW of the air

base to 8 smi NW of the airbase. 2,000' MSL to 24,000' MSL from 8 to 9 smi NW of the airbase. 2,000' MSL to 27,000' MSL from 9 to 12 smi NW of the airbase. 6,000' MSL to 27,000' MSL from 12 to 17 smi NW of the airbase. 10,000' MSL to 27,000' MSL from 17 to 22 smi NW of the airbase. 15,000' MSL to 27,000' MSL from 22 to 27 smi NW of the airbase. 19,000' MSL to 27,000' MSL from 27 to 34 smi NW of the airbase. Time of designation - Continuous. Controlling Agency: Hamilton AFB Approach Control.

(Part 608 - Amendment 74)

(3) Section 608.26 add the following: Alexandria (England AFB), La., Restricted Area/ Military Climb Corridor (R-577). Description- That area centered on the 017° T radial of the England AFB, La., TACAN, with a width of 2 smi beginning at a point 5 smi N of the airbase and extending to a width of 4.6 smi at a point 32 smi N of the airbase. Designated Altitudes - 2,100' MSL to 15,000' MSL from a point 5 smi N of the airbase to a point 6 smi N of the airbase. 2,100' MSL to 24,000' MSL from a point 6 smi N of the airbase to a point 7 smi N of the airbase. 2,100' MSL to 27,000' MSL from a point 7 smi N of the airbase to a point 10 smi N of the airbase. 6,100' MSL to 27,000' MSL from a point 10 smi N of the airbase, to a point 15 smi N of the airbase. 10,100' MSL to 27,000' MSL from a point 15 smi N of the airbase to a point 20 smi N of the airbase. 15,100' MSL to 27,000' MSL from a point 20 smi N of the airbase to a point 25 smi N of the airbase. 19,100' MSL to 27,000' MSL from a point 25 smi N of the airbase to a point 32 smi N of the airbase. Time of designation - Continuous. Controlling Agency: England AFB Approach Control.

ON REQUEST REPORTING POINTS: The following on-request reporting points have been established, modified, cancelled or renamed as indicated effective 7 April 1960:

ESTABLISHED:

(1) DRUMMOND, MONT VOR (Formerly compulsory).

(2) BUTTE, MONT VOR (Formerly compulsory).

(3) CHESTER, TEX(VHF) INT: 152 M rad Lufkin, Tex. VOR; 094 M rad Leona, Tex. VOR.

(4) CAMDEN, TEX(VHF) INT: 168 M rad Lufkin, Tex. VOR; 094 M rad Leona, Tex. VOR.

(5) KICKAPOO, TEX(VHF) INT: 215 M rad Lufkin, Tex. VOR; 094 M rad Leona, Tex. VOR.

(6) MOSCOW, TEX(VHF) INT: 190 M rad Lufkin, Tex. VOR; 094 M rad Leona, Tex. VOR.

(14) GAINSVILLE, TEX(VHF) INT: direction of holding - N on 167 M rad Ardmore, Okla. VOR; direction of turns - left; time - 1 min; MHA - 2800'.

CONTROL AREA EXTENSION: Effective 0001 EST 25 February 1960:
(1)(New York, N. Y.) amended as follows: In the text delete "R-28".

Effective 25 February 1960:

(Part 608 - Amendment 73)

(1) In Section 608. 38, the Brigantine, N.J., Restricted Area (R-28) is revoked.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT. Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: W-200).

(This does not apply to hearing aids)

RADOME MOUNTED GLIDE PATH ANTENNAS: Simultaneous operation of airborne radar and glide path receiver produces deflection of the glide path crosspointer, resulting in a glide path indication which is difficult or impossible to fly. Until compatible mounting and use is perfected, pilots are cautioned to turn the weather radar to "standby" or "off" when conducting an approach utilizing the glide path portion of the Instrument Landing System.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60. 23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide Volume 14, Number 19 dated 24 November 1959, as follows:

(1) Page 64, under Federal Airways (items 1 and 3) change effective date to read: 0001 EST 5 May 1960.
(2) Page 64, under VOR Control Areas (items 1 and 3) change effective date to read: 0001 EST 5 May 1960.
(3) Page 64 under VOR Reporting Points (item d) change effective date to read: 0001 EST 5 May 1960.
(4) Page 64,under Federal Airways (item 2) change effective date to read: 0001 EST 30 June 1960.
(5) Page 64, under VOR Control Areas (item 2) change effective date to read: 0001 EST 30 June 1960.
(6) Page 64 under VOR Reporting Points (item a) change effective date to read: 0001 EST 30 June 1960.

Correct Airman's Guide Volume 14, Number 20 dated 8 December 1959 as follows:

(1) Page 47, under Federal Airways (item 3) change effective date to read: 0001 EST 2 June 1960.
(2) Page 47, under Federal Airways (items 1 and 2) change effective date to read: 0001 EST 30 June 1960.
(3) Page 47, under VOR Control Areas (items 1 and 2) change effective date to read: 0001 EST 30 June 1960.

Correct Airman's Guide Volume 14, Number 24 dated 2 February 1960 as follows:

(7) Page 43, under VOR Reporting Points (items e and g) change effective to read: 0001 EST 2 June 1960.

✓ MEA CHANGES: The following MEAs in Amendment 58, Effective date of April 7, 1960 are deleted: V-58, from Imperial, Pa. VOR to Tarentum Int, Pa., 3000'; Tarentum Int. to Carrolltown, Pa. VOR 4000'; Carrolltown VOR to Tyrone, Pa. VOR 4000'. V-276 from Ellwood City, Pa. VOR to Tyrone, Pa. VOR 4000'.

✓ LOS ANGELES, OAKLAND AND SEATTLE FLIGHT ADVISORY BOUNDARIES: Effective immediately the Los Angeles, Oakland and Seattle Flight Advisory Boundaries are amended as follows: (1) Los Angeles - Beginning at present flight advisory area bndry at the intersection U.S./Mexican bndry with the coastline (32-32-03N, 117-07-25W) direct to 30-45N, 120-50W; direct to 34-30N, 123-15W; direct to 35-32N, 120-51W; a point on present bndry. (2) Oakland - Beginning at present bndry at 35-32N, 120-51W; direct to 34-30N, 123-15W; direct to 40-00N, 127-00W; direct to 42-00N, 126-50W; thence along 42-00N, to the present bndry. (3) Seattle - Beginning at present bndry on 42-00N to 42-00N, 126-50W, direct to 45-00N, 126-30W; 48-20N, 128-00W; thence to 48-30N, 125-00W; on the present bndry.

✓ VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

NOTAMS page 3

Special Notices page 24

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

G - Guards

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

REMEMBER!

VFR CRUISING ALTITUDES ARE ODD THOUSANDS PLUS 500 FEET BETWEEN 0° AND 179° MAGNETIC: EVEN THOUSANDS PLUS 500 FEET BETWEEN 180° AND 359° MAGNETIC. CAR 60.32 (a)

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

NEW FSS FREQUENCY: Earlier plans for decommissioning 126.7 mc as a ground-to-air channel have been changed. To accommodate pilots favoring single channel simplex operation, 126.7 mc will remain available indefinitely as a ground-to-air channel. Pilots desiring reply on 126.7 mc must so state in initial call-up. 120.7 mc will continue to be used as the normal FSS ground-to-air reply to aircraft calls on 126.7 mc unless otherwise requested by the pilot.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down," revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Chicago, (Joliet), Ill.	350 kc, 257 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
New York, N.Y.	209 kc
Washington, D.C.	332 kc
Boston, Mass.	382 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Pittsburgh, Penna.	254 kc
Boise, Idaho	359 kc
Cincinnati, Ohio	335 kc
*Wichita, Kansas	332 kc
*Milwaukee, Wisconsin	242 kc

*Operating on test basis.

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

All tracks will be flown at 360 knots true air speed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated . NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Halfmoon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

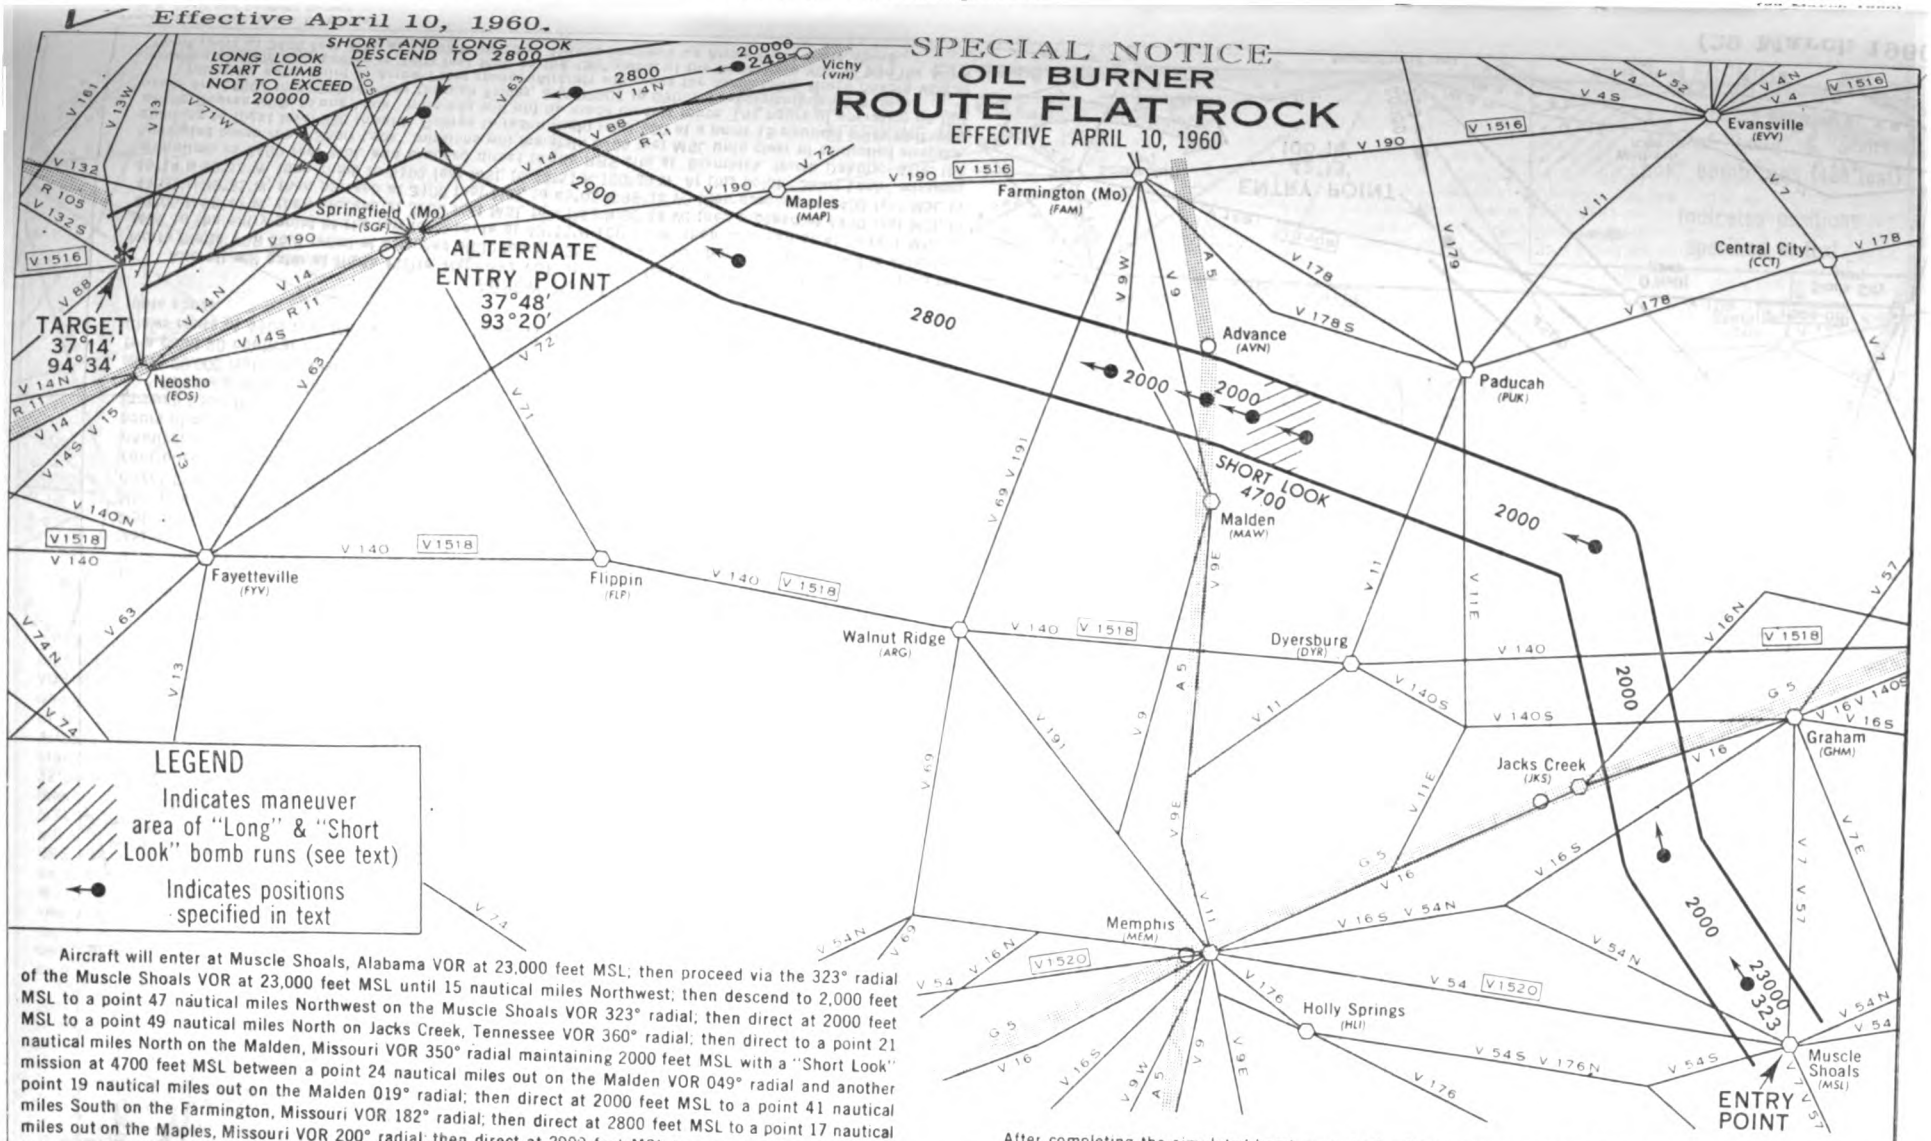
Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

NEW FEDERAL AVIATION AGENCY STATIONS NAMES: Effective 15 February 1960, the names of FAA stations will be changed as follows:



Air Traffic Communications Station (ATCS) will become Flight Service Station(FSS), and International Air Traffic Communications Station (IATCS) will become International Flight Service Station (IFSS). Stations will continue to use the identifier RADIO in air/ground communications and broadcasts but will use FLIGHT SERVICE when answering telephones and flight assistance interphones.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command) is conducting low level navigational flights in B-47 and B-52 jet acft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following 6 pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

ROUTE FLAT ROCK

LEGEND

Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)

Indicates positions specified in text

Aircraft will enter at Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR at 23,000 feet MSL until 15 nautical miles Northwest; then descend to 2,000 feet MSL to a point 47 nautical miles Northwest on the Muscle Shoals VOR 323° radial; then direct at 2000 feet MSL to a point 49 nautical miles North on Jacks Creek, Tennessee VOR 360° radial; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point, "Short Look" missions will proceed direct to the RBS site at 37°14′N-94°34′W, at 2800 feet MSL start a climb to 4700 feet MSL three miles North of the Joplin low frequency beacon (Waco Intersection) and cross the RBS site at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0500Z to 1300Z, Tuesday through Saturday.

Alternate Entry Point–Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48′30″N-93°20′W thence continue on Flat Rock route.

U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

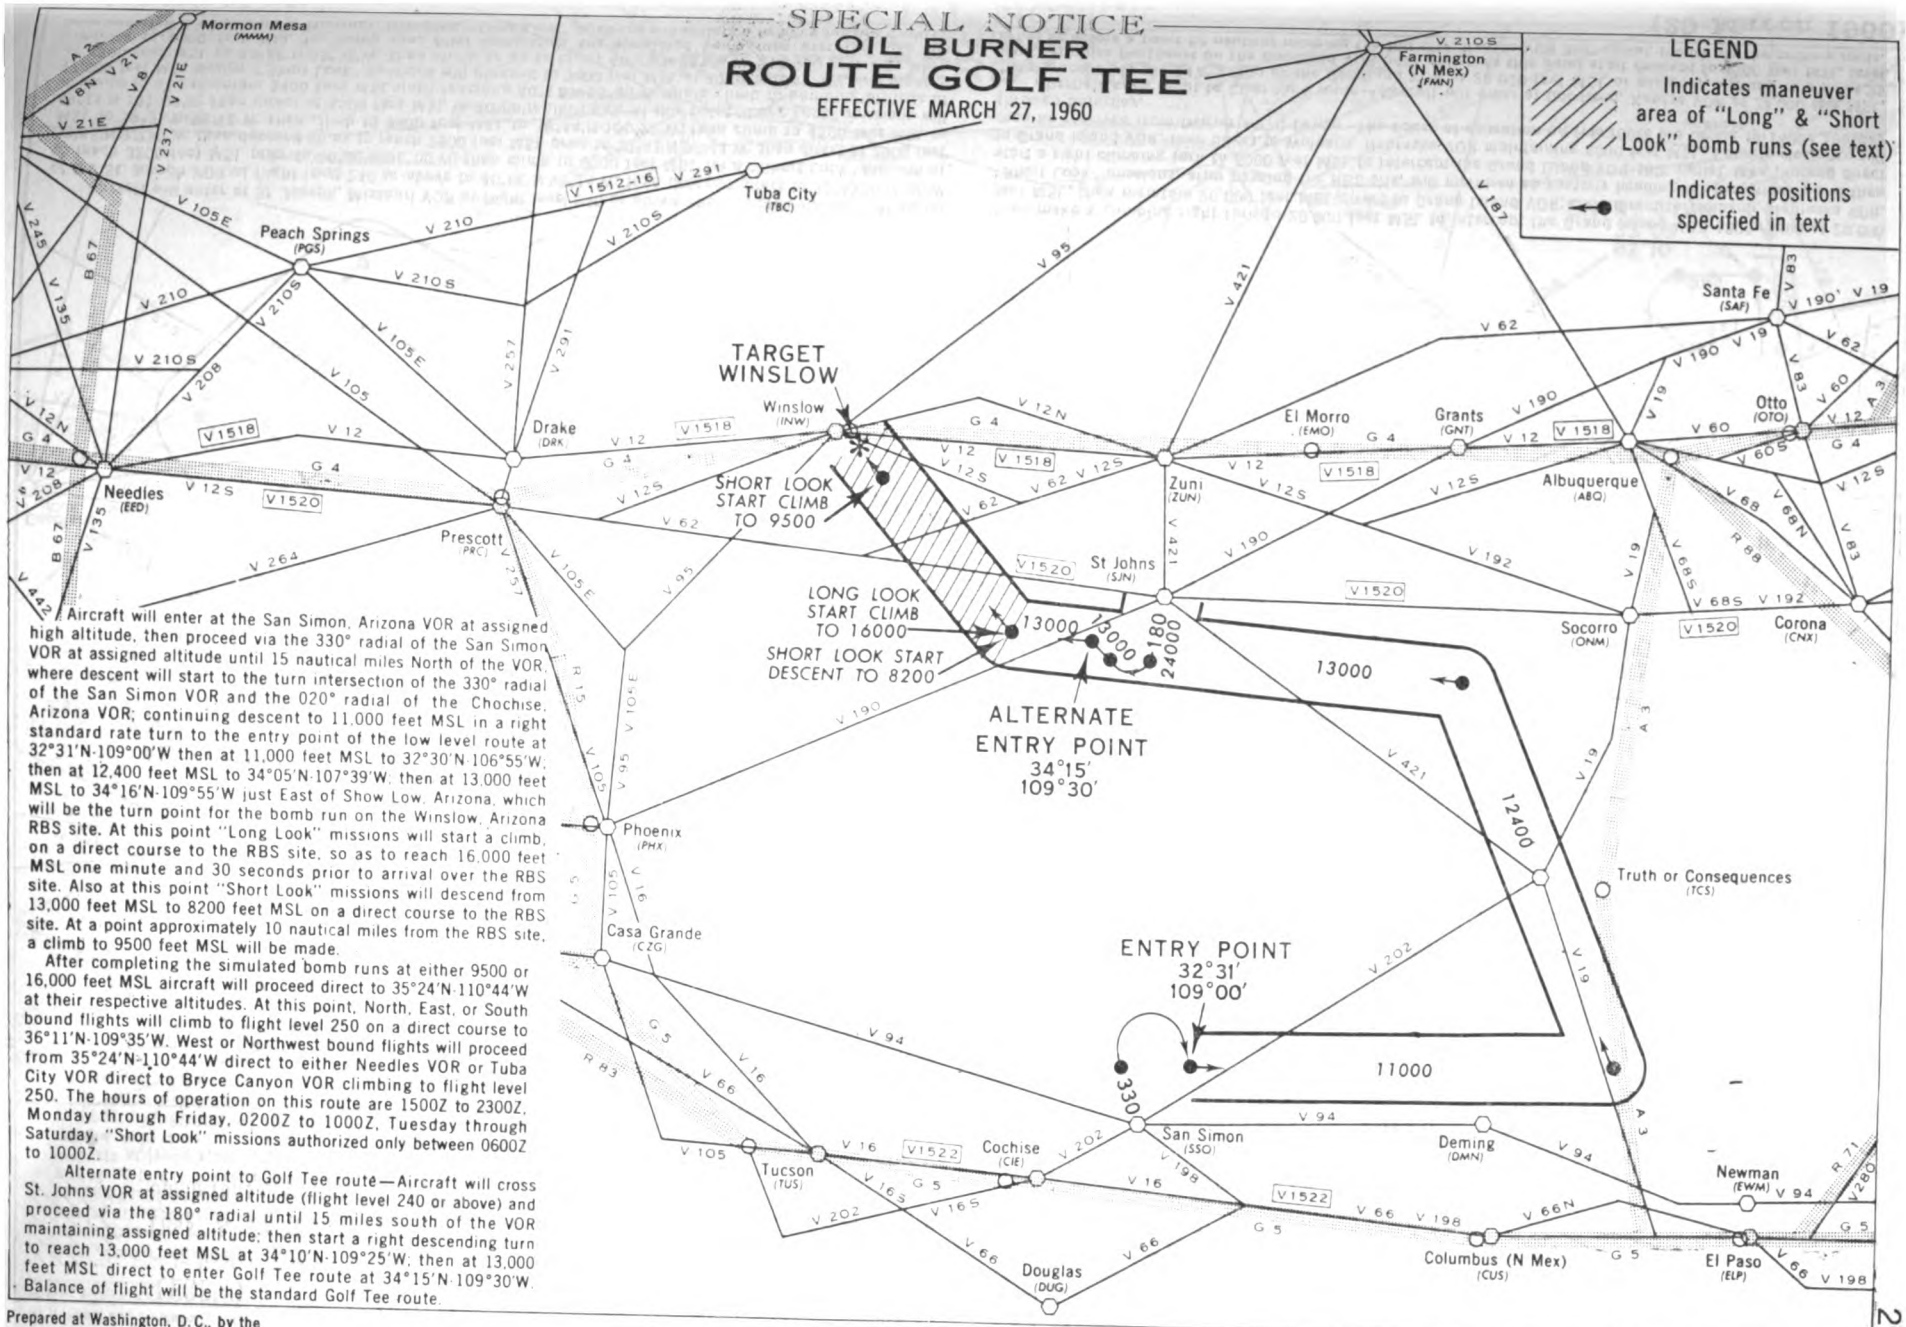
ROUTES BEAR CLAWS AND ARROW POINT

EFFECTIVE MARCH 27, 1960

BEAR CLAWS

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30′N-108°30′W; then proceed at 4700 feet MSL to 47°45′N-107°22′W; then proceed at 4700 feet MSL to 47°00′N-106°00′W; then proceed at 4700 feet MSL to 48°00′N-104°27′W; then proceed at 4800 feet MSL to 47°38′N-102°20′W; then proceed at 4400 feet MSL to 47°28′N-101°25′W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.



ARROW POINT

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 360° radial at assigned altitude until 35 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°13′N-100°18′W; then proceed at 4500 feet MSL to 43°05′N-98°42′W; then proceed at 3200 feet MSL to 43°43′N-99°14′W; then proceed at 4400 feet MSL to 44°35′N-99°35′W; then proceed at 3100 feet MSL to 45°05′N-99°18′W; then proceed at 3400 feet MSL to 46°14′N-99°15′W; then climb to 5100 feet MSL to 46°51′N-100°35′W. At this point "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. After the simulated bomb run, "Short Look" missions will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

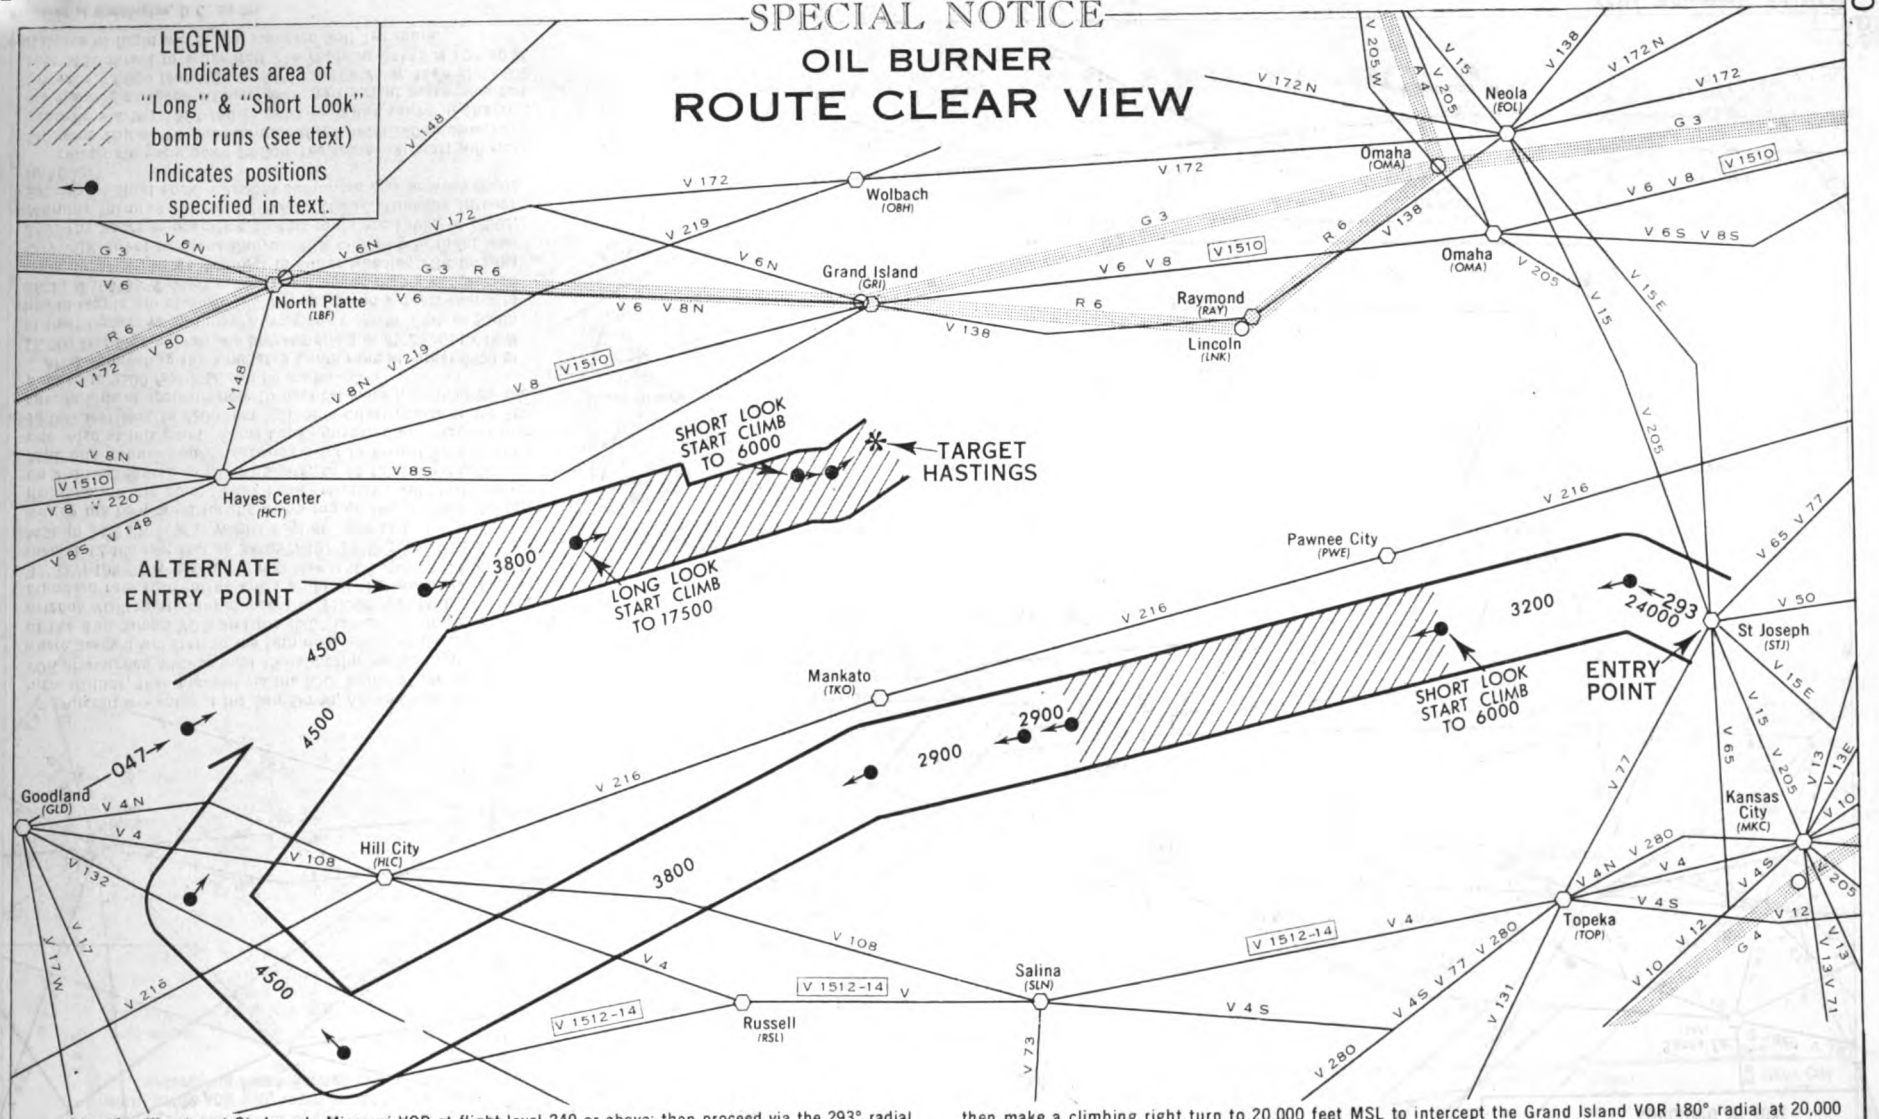
Alternate entry point to Arrow Point route—Aircraft will cross the Jamestown, North Dakota VOR at cruising altitude, descending to 3400 feet MSL on the 195° radial of the Jamestown VOR to join the Arrow Point route at 3400 feet MSL at 46°02′N-99°15′W; thence continue on Arrow Point route above.

Prepared at Washington, D. C., by the U. S. Coast and Geodetic Survey

(29 March 1960)

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise, Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W; then at 12,400 feet MSL to 34°05'N-107°39'W; then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24'N-110°44'W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11'N-109°35'W. West or Northwest bound flights will proceed from 35°24'N-110°44'W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 1500Z to 2300Z, Monday through Friday, 0200Z to 1000Z, Tuesday through Saturday. "Short Look" missions authorized only between 0600Z to 1000Z.



Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10'N-109°25'W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W. Balance of flight will be the standard Golf Tee route.

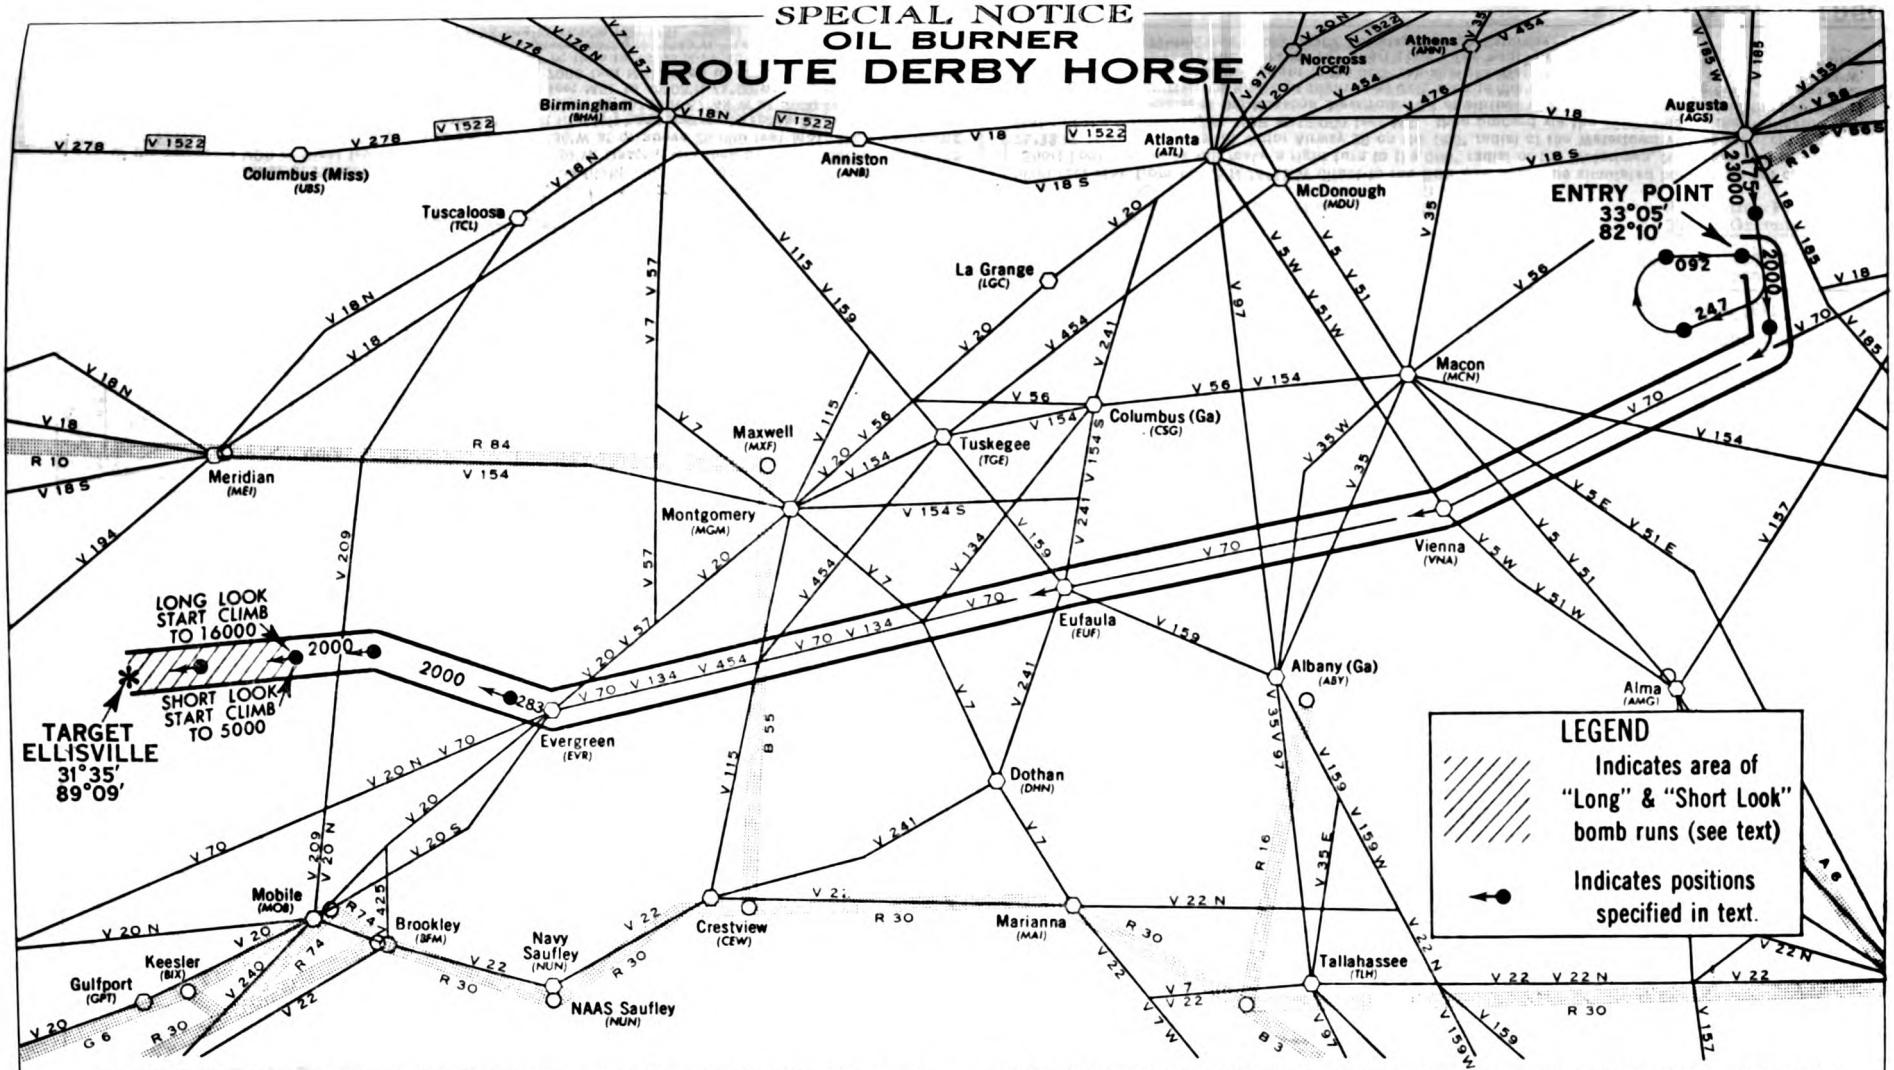
Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

ROUTE CLEAR VIEW

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W; then climb to 6000 feet MSL for a "Short Look" mission at 39°43'N-97°30'W; then descend so as to reach 2900 feet MSL prior to 39°41'N-97°41'W; then direct at 2900 feet MSL to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.



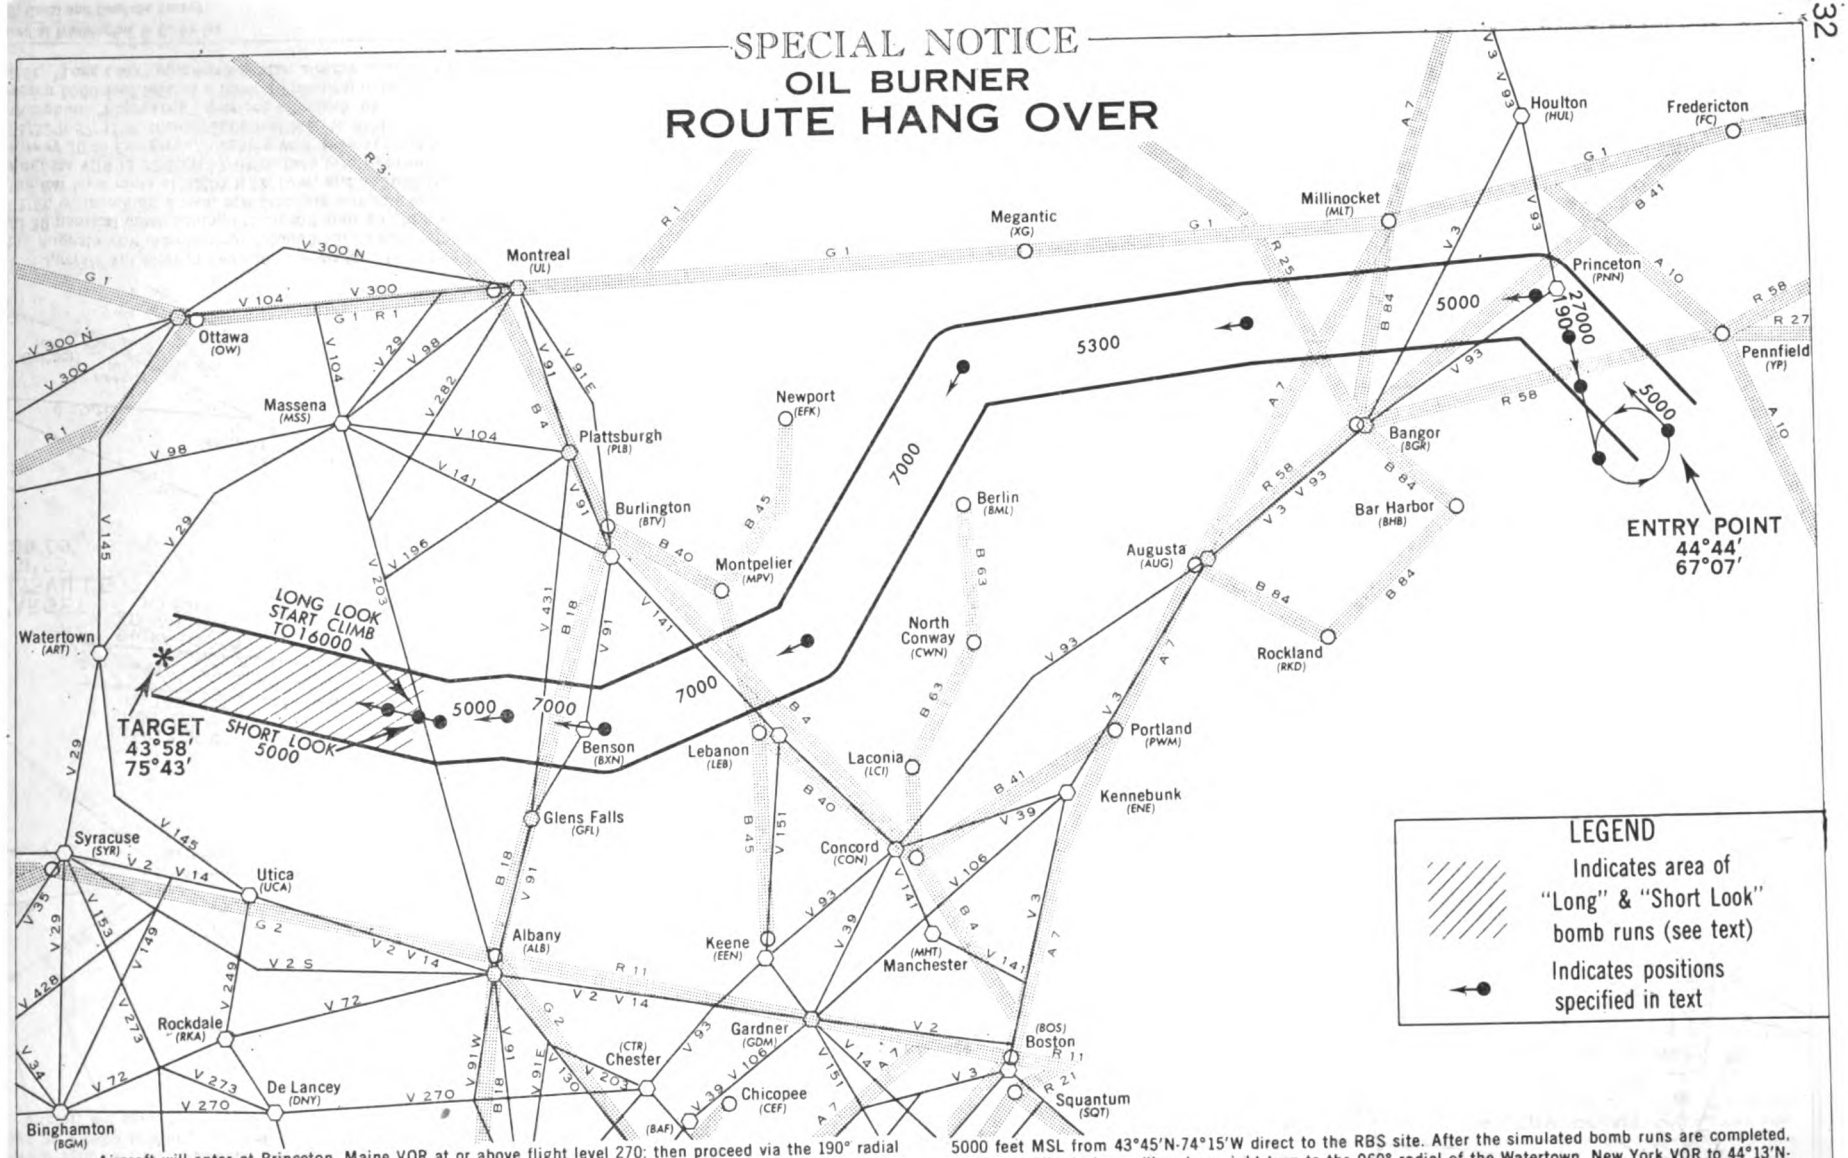
Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

(29 March 1960)

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

ROUTE "DERBY HORSE"

SPECIAL NOTICE
OIL BURNER
ROUTE DERBY HORSE



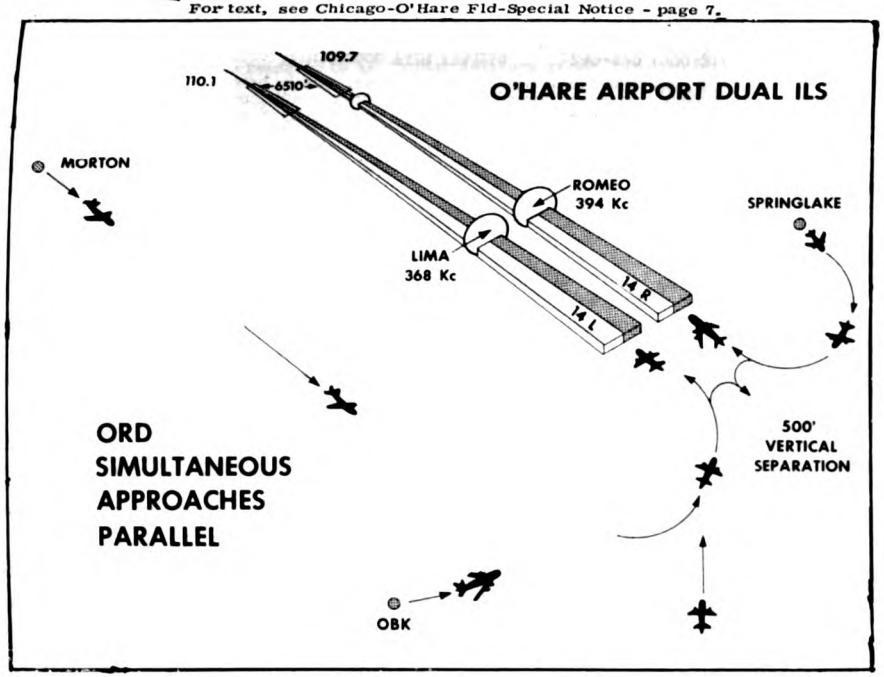
Aircraft will enter at Augusta, Georgia, at 23,000 feet MSL or above; then proceed via the 175° radial of the Augusta VOR maintaining altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to entry point of the low level route at 33°05'N-82°10'W, and at 2000 feet MSL turn right to intercept the 175° radial of the Augusta VOR to 32°50'N-82°04'W; then turn right to intercept Victor Airway 70 Westbound; then via Victor Airway 70 to Evergreen, Alabama VOR; then at 2000 feet MSL via the 283° radial of the Evergreen VOR to 31°32'N-87°31'W; then at 2000 feet MSL to 31°42'N-88°06'W; then at 2000 feet MSL to 31°40'N-88°26'W. At this point, "Short Look" missions will climb, on a direct course to the RBS site at 31°35'N-89°09'W, so as to reach 5000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 5000 feet MSL. "Long Look" missions will start a climb at 31°40'N-88°26'W, on a direct course to the RBS site, so as to reach 16,000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 16,000 feet MSL.

After completing the simulated bomb runs, "Short Look" missions will make a right turn to a true course of 096° at 31°43'N-89°09'W, proceed via the true course of 096° until passing the 180° radial of Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding to the intersection of the McComb VOR 068° radial and the Meridian VOR 160° radial to continue climbing in a non-standard one minute holding pattern making all turns to the left, Southwest of the intersection on the 068° radial of the McComb VOR.

"Long Look" missions will follow the same procedure after the bomb run, starting their climb from 16,000 feet MSL after passing the 180° radial of the Meridian VOR. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday. The route width on this route is limited to 10 statute miles, 5 statute miles either side of course.

Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

SPECIAL NOTICE
OIL BURNER
ROUTE HANG OVER



Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL. turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

O'HARE AIRPORT DUAL ILS

For text, see Chicago-O'Hare Fld-Special Notice - page 7.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future.

SPECIAL NOTICE

CALIFORNIA

OCEANSIDE

MARINE CORPS MANEUVER AREA

Maneuvers, including close air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact San Diego, Thermal, Long Beach, Ontario and Los Angeles ATCS for information pertaining to air activity during daylight hours on the maneuver dates.

(29 March 1960)

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas

a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 02.

b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.

c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas

The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.

a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.

b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information, when possible, and with radar vectors when requested by the pilot. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Oakland, Calif.)
2. VOR/VORTAC Jet Route No. 1 (Oakland, Calif., to Seattle, Wash.)
3. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.)
4. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Chicago, Ill.) Nonradar Advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon. Eff. 4/24/60.
8. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.)(Dallas, Tex., to San Antonio, Tex.)
9. VOR/VORTAC Jet Route No. 22 (Lake Charles, La., to Gordonsville, Va.)
10. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Joliet, Ill.)
11. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.) Eff. 5/1/60.
12. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
13. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. of J33V with J31V.) Eff. 5/1/60.
14. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
15. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.) Eff. 5/1/60.
16. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.) Eff. 4/10/60.
17. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
18. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
21. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V.)
22. VOR/VORTAC Jet Route No. 53 (Spartanburg, S.C., to Pittsburgh, Pa.)
23. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.) Eff 5/1/60.
24. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
25. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
26. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
27. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
28. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
29. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
30. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
31. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)
32. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N.Y.)
33. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
34. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
35. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
36. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U.S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 60 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Effective 10 March 1960.
37. VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)

(Continued)

38. VOR/VORTAC Jet Route No. 87 (Dallas, Tex., to Houston, Tex.)
39. VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
40. Control 1150 (West Palm Beach, Fla., to Wilmington, N. C.)
41. VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.) Effective 5 April 1960.

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 for a distance of 183 n mi.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area) Effective 15 November 1959.
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B.C., Canada RR.
20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass. Effective 17 December 1959.
21 New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
Effective 17 December 1959.
22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR Effective 17 December 1959.
23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
Effective 17 December 1959.
24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 Ukiah, Calif., VOR; V-107 to Red Bluff, Calif., VOR.
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.
28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.
29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S.-Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.
30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

(Continued)

b. Islip, N. Y., VOR/TAC via Hauppauge, N. Y., VOR to Albany, N. Y., VOR.
c. Islip, N. Y., VOR/TAC via Huguenot, N. Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VOR/TAC.
Effective 17 December 1959

b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-10 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently restricted Category "B" area of J-64-V.
Effective 1 December 1959

31. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
   a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
   b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
   c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
   d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
   a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
   b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

RADAR - On page 29 of Flight Information Manual Volume 13, dated December 1959, replace subtopic Air Traffic Control Radar Beacon System (ATCRBS) with the following:

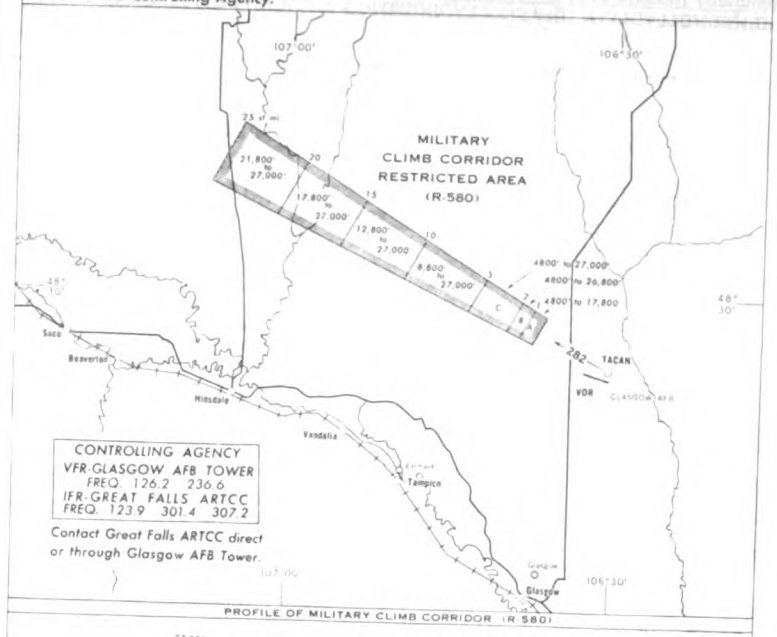
1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft-reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control(ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route-High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification.
7. Civil aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped civil aircraft entering a United States domestic control area from outside the United States will advise of availability of such equipment when making the first radio report to the United States air traffic control center by adding the word "transponder" to its identification.

ATC PROCEDURES - On page 80 of Flight Information Manual Volume 13(page 80 dated Feb. 29, 1960) add as a continuation of the first paragraph entitled RADAR TRAFFIC CONTROL: ATC radar procedures provide more expeditious service to IFR aircraft than can be provided by other means. At locations where such procedures are used all aircraft desiring to operate IFR are subject to control in accordance with radar separation standards. Non-radar procedures will be used when deemed advisable by Air Traffic Control.

ATC PROCEDURES - On page 73 of Flight Information Manual Volume 13 dated December 1959, under first paragraph entitled POSITIVE CONTROLLED AIRSPACE add:
f. Information on observed radar targets will not be provided to aircraft operating within positive controlled airspace.

SPECIAL NOTICE

MONTANA



GLASGOW (GLASGOW AFB) MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E.S.T. APRIL 7, 1960

(This Special Notice will not normally be revised or reissued.)

(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas should obtain prior approval from the Controlling Agency.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

FOREIGN EXCHANGE Location	Number	FSS Providing Service
Charlotte, North Carolina	ED 2-7262	Hickory, North Carolina
Kerrville, Texas	CL 7-7295	Junction, Texas
Burbank, California	TH 6-0400	Los Angeles, California
Chico, California	FI 2-9074	Red Bluff, California

Modesto Municipal Airport, California	Stockton, California
Fort Bridger Airport, Wyoming	Rock Springs, Wyoming
Gooding Municipal Airport, Idaho	Burley, Idaho
Chandler Field, Fresno, California	Fresno, California

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D.C. (Attention: W-200).

(This does not apply to hearing aids)

Los Angeles, California
Los Angeles, California
Los Angeles, California

25, D. C. (Attention: W-200).
(This does not apply to hearing aids)

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-Q-3: Entry point 35-18N, 88-00W (Entry reporting point -Jacks Creek Radio); 36-34N, 88-12W; 37-20N, 91-42W; 37-33N, 93-23W (end nav. leg); to target Joplin, Mo.

Route 2-R-1: Start at 29-17N, 90-40W; to 29-42N, 92-09W. Entry reporting point- New Orleans Radio.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point- Springfield Radio.

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

RADOME MOUNTED GLIDE PATH ANTENNAS: Simultaneous operation of airborne radar and glide path receiver produces deflection of the glide path crosspointer, resulting in a glide path indication which is difficult or impossible to fly. Until compatible mounting and use is perfected, pilots are cautioned to turn the weather radar to "standby" or "off" when conducting an approach utilizing the glide path portion of the Instrument Landing System.

HARTFORD, CONN. VOR SHUTDOWN: During shutdown use the following:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
V3: HFD VOR-Millbury VHF Int.	HFD/LMFR Amber 7 to Int Boston VOR 271° M radial	As published Amber 7, 4000 Westboro VHF Int.
HFD VOR-ILT VOR	HFD /LMFR Amber 7 to point of Int ILT VOR 072° M radial to ILT VOR	As published
V167: HFD VOR-Sterling VHF Int.	HFD/LMFR Red 13, V 16	As published
HFD VOR-BDR VHF Int.	HFD/LMFR Amber 7 Monroe, Blue 66 to point of Int. ILT VOR 109° M radial (BDR VHF Int.)	As published
V130: HFD VOR-ORW VOR	HFD/LMFR direct ORW VOR	2,000
HFD VOR-Colebrook VHF Int.	HFD/LMFR Green 2	3,000
V58: HFD VOR-Salem VHF	Salem LF Int. direct HFD L/MFR via HFD/LMFR 323° M inbnd brng	2,000
HFD VOR-Litchfield VHF Int.	Litchfield VHF Int. direct HFD L/MFR via HFD L/MFR 105° M inbnd brng	3,000
V292: HFD VOR-PUT VOR	HFD L/MFR Amber 7 to point of Int. PUT VOR 276° M radial to PUT VOR	As published

During period of shutdown, the following reporting points have been temporarily established as indicated:

EXISTING REPORTING POINTS	SUBSTITUTE REPORTING POINTS	MEA
Woodstock	PUT VOR 276° M radial ORW VOR 354° M radial	2,500
Salem	Use Salem LF Int.	2,000
Colebrook	BAF VOR 253° M radial CTR VOR 204° M radial POU VOR 072° M radial	4,000

LONDON, KY VOR SHUT DOWN: During shutdown use the following:

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Volume 13, dated December 1959 as follows:

VOR Receiver Check Points

(1) Page 18, cancel Meridian, Mississippi (Key Field).
(2) Page 20, change Alice, Texas to read: Alice, Texas (Jim Wells County Municipal).
(3) Page 21, change Blythe, California to read: Blythe, California (Municipal).

FAA and WB telephone numbers

(1) Page 36, delete Oceanside, California FAA telephone number.
(2) Page 37, Miami, Florida - change IFSS telephone number to: NE 4-7687.
(3) Page 40, Morgantown, West Virginia - change FAA telephone number to: LInden 2-7531.

Standard Broadcast Stations

(1) Page 107, Charlottesville, Virginia-WINA -change freq. to: 1400 kc; elevation to: 784'; and height to: 344'.
(2) Page 107, Suffolk, Virginia -WLPM - change frequency to: 1460 kc, power to: 5.00 and type to: DA-N.
(3) Page 101, Atlantic City, New Jersey- change call letters to: WFPG.

Radar

(1) Page 29, amend first column last paragraph - see page 37 this issue of Airgi.

ATC Procedures

(1) Page 80 amend first column first paragraph - see page 37 this issue of Airgi.
(2) Page 73 add new paragraph "f" to Positive Controlled Airspace- see page 37 this issue of Airgi.
(3) Page 79, delete paragraph titled "ILS APPROACHES"

Flight Test Areas

(1) Page 118 add Carthage, Missouri - Myers Park Memorial Airport - see page 13 this issue of Airgi.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

FEDERAL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS AND JET ROUTES: (Note: All bearings and radials are TRUE unless otherwise indicated.)

Effective 0001 EST 5 May 1960:

FEDERAL AIRWAYS:

(1) Amber 9 (Corapeake, N. C., to Norfolk, Va.) amended to read: "From Int. of the SE crs. of Waverly, Va., RR and the SW crs. of Norfolk, Va., RR to the Norfolk, Va., RR."

(2) Blue 3 (Miami, Fla., to Tallahassee, Fla., Kokomo, Ind., to Sault Ste. Marie, Mich.) amended as follows: (a) In the caption delete "(Miami, Fla., to Tallahassee, Fla.; Kokomo, Ind., to Sault Ste, Marie, Mich)." and substitute therefor "(Miami, Fla., to Tampa.; Kokomo, Ind., to Sault Ste. Marie, Mich.)." (b) In the text delete "From the Miami, Fla., Rbn via Ft. Myers, Fla., Rbn; Tampa, Fla., RR; the Int. of the N crs. of Tampa, Fla., RR and the SE crs. of Cross City, Fla., RR; Cross City, Fla., RR to the Tallahassee, Fla., RR." and substitute therefor "From the Miami, Fla., Rbn via Ft. Myers, Fla., Rbn; to the Tampa, Fla., RR."

(3) VOR 16 (Los Angeles, Calif., to Boston, Mass.) amended as follows: In the text delete "Nashville VOR 078° and the Crossville 298° radials;" and substitute therefor "Nashville VOR 079° T and the Crossville VOR 298°T radials;".

(4) VOR 21 (Long Beach, Calif., to U. S. -Canadian Border) amended as follows: In the text delete "Cut Bank omnirng 347° radial." and substitute therefor "Cut Bank VOR 348°T radial."

(5) VOR 260 (Charleston, W. Va., to Richmond, Va.) amended to read: "From the Charleston, W. Va., VORTAC via the Rainelle, W. Va., VOR including a N alternate via the Int. of Charleston VORTAC 083° T and Rainelle VOR 317°T radials; Hollins, Va., VORTAC; Lynchburg, Va., VOR, including a S alternate via the Int. of the Hollins VORTAC 177° T and Lynchburg VOR 253°T radials; Flat Rock, Va., VORTAC; to the Richmond, Va., VOR."

(6) VOR 298 (Pendleton, Oreg., to Sioux Falls, S. Dak.) amended to read: "From the Pendleton, Oreg., VOR via the McCall, Idaho, VOR; DuBois, Idaho, VOR; Boysen Reservoir, Wyo., VORTAC; Casper, Wyo., VOR; Smithwick, S. Dak., VOR; Winner, S. Dak., VOR; to Sioux Falls, S. Dak., VORTAC. The portion of this airway which lies within the geographical limits of, and between the designated altitudes of, the Igloo Restricted Area (R-572) is excluded."

(7) VOR 471 (Bangor, Maine, to Houlton, Maine) added to read: "From the Bangor, Maine, VOR via the Int. of the Bangor VOR 360° T and the Millinocket VOR 216°T radials; Millinocket, Maine, VOR; to the Houlton, Maine, VOR."

CONTROL AREAS:

(1) Amber 9 (Corapeake, N. C., to Norfolk, Va.) amended to read: "All of Amber Federal airway No. 9".

(2) Blue 3 (Miami, Fla., to Tallahassee, Fla.; Kokomo, Ind., to Sault Ste. Marie, Mich.) amended as follows: In the caption delete "(Miami, Fla., to Tallahassee, Fla.; Kokomo, Ind., to Sault Ste. Marie, Mich.)." and substitute therefor "(Miami, Fla., to Tampa, Fla.; Kokomo, Ind., to Sault Ste. Marie, Mich.)".

CONTROL AREA EXTENSIONS:

(1) (El Dorado, Ark) amended to read: "Within 5 mi either side of the 037° T radial of the El Dorado VOR extending from the VOR to a point 15 mi NE."

(2) (Three-mile radius zones) amended as follows: In the text delete "Glendale, Calif." Grand Central Airport."

CONTROL ZONES:

(1) (Houston, Texas) amended to read: "Within a 10-mi radius of the geographical center of the Houston Intn'l Airport (lat 29-38-40N, long. 95-16-30W), and within a 5-mi radius of the geographical center of Ellington AFB (lat 29-36-25N, long. 95-09-20W.)".

(2) (Burbank, Calif.) amended to read: "Within a 5-mi radius of the Lockheed Air Terminal, Burbank, (lat 34-12-15N, long. 118-21-30W), and within a 5-mi radius of the Van Nuys Airpt., Van Nuys, Calif., (lat 34-12-30N, long. 118-29-15W)."

(3) (El Dorado, Ark) amended to read: "Within a 5-mi radius of the geographical center of Goodwin Airport (lat 33-13-15N, long. 92-48-30W), and within 2 mi either side of the 037°T radial of the El Dorado VOR extending from the VOR to a point 12 mi NE."

REPORTING POINTS:

(1) Amber 9 (Corapeake, N. C., to Norfolk, Va.) amended to read:"Norfolk, Va., RR."

(2) Blue 3 (Miami, Fla., to Tallahassee, Fla.; Kokomo, Ind., to Sault Ste. Marie, Mich.) amended as follows: (a) In the caption delete "(Miami, Fla., to Tallahassee, Fla.; Kokomo, Ind., to Sault Ste. Marie, Mich.)" and substitute therefor "(Miami, Fla., to Tampa, Fla.; Kokomo, Ind., to Sault Ste. Marie, Mich.)." (b) In the text delete "Cross City, Fla., rdo rng stn:"

VOR CONTROL AREAS:

(1) VOR 260(Charleston, W. Va., to Richmond, Va.) amended to read: "All of VOR Federal airway No. 260 including a N and a S alternate".

(2) VOR 298(Pendleton, Oreg., to Sioux Falls, S. Dak.) amended to read: "All of VOR Federal airway No. 298".

(3) VOR 471 (Bangor, Maine to Houlton, Maine) amended to read: "All of VOR Federal airway No. 471".

(29 March 1960)

JET ROUTES:
(1) L/MF Jet Route No. 23 (Brownsville, Tex., to North Platte, Nebr.) is revoked.
(2) VOR/VORTAC Jet Route No. 95 (Idlewild, N. Y., to U. S.-Canadian Border) added to read: "From the Idlewild, N. Y., VORTAC; via the Buffalo, N. Y., VORTAC; thence via the Buffalo VOR 312° T radial to the United States-Canadian Border.)".

Effective 0001 EST 2 June 1960:

FEDERAL AIRWAYS:
(1) Red 4 (Las Vegas, N. Mex., to Tucumcari, N. Mex.) is revoked.
(2) Red 80 (Helena, Mont., to Miles City, Mont.) is revoked.
(3) Red 83 (Gila Bend, Ariz., to Tucson, Ariz.) is revoked.
(4) Blue 84 (Augusta, Maine, to Bangor, Maine) amended to read: "From the Augusta, Maine, RR via the Rockland, Maine, Rbn; Bar Harbor, Maine, Rbn; to the Bangor, Maine RR."
(5) VOR 18 (Dallas, Tex., to Charleston, S. C.) amended as follows: In the text delete "From the Dallas, Tex., VOR via the Quitman, Tex., VOR; Shreveport, La., VOR;" and substitute therefor "From the Dallas, Tex., VOR via the Quitman, Tex., VOR; Shreveport, La., VOR, including a S alternate via the Int. of the Quitman VOR 109° T and the Shreveport 246° T radials;".
(6) VOR 174 (Vichy, Mo., to Washington, D. C.) amended as follows: (a) In the caption, delete "(Vichy, Mo., to Washington, D. C.)." and substitute therefor "(Troy, Ill., to Washington, D. C.)." (b) In the text, delete "From the Vichy, Mo., omnirng stn via the Int of Vichy omnirng 069° and Troy omnirng 246° radials; Troy, Ill., omnirng stn; Bible Grove, Ill., omnirng stn;" and substitute therefor "From the Troy, Ill., VOR; via the Bible Grove, Ill., VOR;".
CONTROL AREAS:
(1) Red 4 (Las Vegas, N. Mex., to Tucumcari, N. Mex.) is revoked.
(2) Red 80 (Helena, Mont., to Miles City, Mont.) is revoked.
(3) Red 83 (Gila Bend, Ariz., to Tucson, Ariz.) is revoked.
(4) Blue 84 (Augusta, Maine to Bangor, Maine) amended to read: "All of Blue Federal airway No. 84."
CONTROL AREA EXTENSIONS:
(1) (Kingsville, Texas) amended to read: "That airspace bounded by a line parallel to and 5 mi N of the Kingsville NAS TACAN 244°T radial extending from the western edge of VOR Federal airway No. 68 to lat 27-11-00N, long. 98-42-00W; thence SSE to lat 27-03-00N, long. 98-37-55W, thence SE to lat 26-56-25N, long. 98-12-30W, thence NE parallel to and 5 mi SE of the Kingsville NAS TACAN 219° T radial to the western edge of VOR Federal airway No. 68, thence N along the western edge of VOR Federal airway No. 68 to the point of beginning."
(2) (Enid, Okla.) amended to read: "The airspace in the vicinity of Vance AFB, Enid, Okla., bounded on the N by VOR Federal airway No. 190, on the E by VOR Federal airway No. 77, on the S by VOR Federal airway No. 140, on the SW by VOR Federal airway No. 17 and on the NW by VOR Federal airway No. 12".
(3) (Mansfield, Ohio) amended to read: "All that area within a 15 mi radius of the Mansfield VORTAC including the area within 5 mi either side of the 130°T radial of the Mansfield VORTAC extending from the VORTAC to a point 25 mi SE and including all that area S and W of the Mansfield VORTAC bounded on the E by VOR Federal airway No. 133, on the S by VOR Federal airway No. 210, on the W by VOR Federal airway No. 47 and on the N by VOR Federal airway No. 8".
(4) (Peotone, Illinois) amended as follows: "That airspace SE of Peotone, Ill., bounded on the E by VOR Federal airway No. 7, on the SW by VOR Federal airway No. 227, on the W by VOR Federal airway No. 53, and on the N by VOR Federal airway No. 38."
(5) (Rosewood, Ohio) amended by adding the following: "That area W of Rosewood, Ohio, bounded on the NE by VOR Federal airway No. 277, on the SE by VOR Federal airway No. 275, on the S by VOR Federal airway No. 210, and on the W by VOR Federal airway No. 55E."
(6) (Danville, Ill.) amended by adding the following: That airspace within a 15-mi radius of the Danville, Ill., VOR excluding that airspace which overlies the Lafayette, Ind., control area extension (601.1258), and the Rantoul, Ill., control area extension (601.1172); with an extension NE of and adjoining this 15-mi radius arc, bounded on the NE by VOR Federal airway No. 53, on the E by the Lafayette control area extension and on the W by VOR Federal airway No. 171."
REPORTING POINTS:
(1) Red 4 (Las Vegas, N. Mex., to Tucumcari, N. Mex.) is revoked.
(2) Red 80 (Helena, Mont., to Miles City, Mont.) is revoked.
(3) Red 83 (Gila Bend, Ariz., to Tucson, Ariz.) is revoked.
(4) Blue 84 (Augusta, Maine to Bangor, Maine) amended to read: "No reporting point designation."
VOR CONTROL AREA:
(1) VOR 174 (Vichy, Mo., to Washington, D. C.) amended as follows: In the caption, delete "(Vichy, Mo., to Washington, D. C.)" and substitute therefor "(Troy, Ill., to Washington, D. C.)."

JET ROUTES:
(1) L/MF Jet Route No. 27 (San Antonio, Tex., to Peoria, Ill.) is revoked.
(2) L/MF Jet Route No. 49 (Morgantown, W. Va., to Presque Isle, Maine) amended to read: "From the Morgantown, W. Va., RR via the Pittsburgh, Pa., RR; Philipsburg, Pa., RR; Albany, N. Y., RR; Millinocket, Maine, RR to the Presque Isle, Maine, RR."
(3) VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Northbrook, Ill.) amended to read: "From the Dallas, Tex., VOR via the Texarkana, Ark., VOR; Flippin, Ark., VOR; St. Louis, Mo., VORTAC; Springfield, Ill., VOR; Int. of the Springfield VOR 036° T and the Joliet VOR 205°T radials; Joliet, Ill., VOR; to the Northbrook, Ill., VOR."

Effective 0001 EST 30 June 1960:

FEDERAL AIRWAYS:
(1) VOR 191 (Memphis, Tenn., to Milwaukee, Wis.) amended as follows: (a) In the caption delete "(Memphis, Tenn., to Milwaukee, Wis.)." and substitute therefor "(Memphis, Tenn., to Sag Bridge, Ill., and Chicago, Ill., to Rhinelander, Wis.)". (b) In the text delete "to the Milwaukee, Wis., VOR." and substitute therefor "Milwaukee, Wis., VOR; Oshkosh, Wis., VOR; Stevens Point, Wis., VOR; Wausau, Wis., VOR; to the Rhinelander, Wis., VOR."
(2) VOR 217 (Chicago, Ill., to Green Bay, Wis.) amended as follows: (a) In the caption delete "(Chicago, Ill., to Green Bay, Wis.)." and substitute therefor "(Chicago, Ill., to Rhinelander, Wis.)." (b) In the text delete "to the Green Bay, Wis., VOR." and substitute therefor "Green Bay, Wis., VOR; to the Rhinelander, Wis., VOR."
VOR CONTROL AREAS:
(1) VOR 191 (Memphis, Tenn., to Milwaukee, Wis.) amended as follows: In the caption delete "(Memphis, Tenn., to Milwaukee, Wis.) and substitute therefor "(Memphis, Tenn., to Sag Bridge, Ill., and Chicago, Ill., to Rhinelander, Wis.)."
(2) VOR 217 (Chicago, Ill., to Green Bay, Wis.) amended as follows: In the caption delete "(Chicago, Ill., to Rhinelander, Wis.)."

Effective 0001 EST 28 July 1960:

FEDERAL AIRWAY:
(1) VOR 83 (Carlsbad, N. Mex., to Kiowa, Colo.) amended as follows: In the text delete "Int. of the Santa Fe VOR 010° and the Alamosa VOR 183° radials;" and substitute therefor "Int of the Santa Fe VOR 010° T and the Taos VOR 182° T radials; Taos, N. Mex., VOR.".

Effective 0001 EST 20 October 1960:

FEDERAL AIRWAYS:
(1) VOR 171 (Louisville, Ky., to Alexandria, Minn.) amended to read: "From the Louisville, Ky., VORTAC via the Scotland, Ind., VOR; Lewis, Ind., VOR; Danville, Ill., VOR, including a W alternate; Peotone, Ill., VOR; Joliet, Ill., VOR; Rockford, Ill., VOR; Lone Rock, Wis., VOR; Nodine, Minn., VOR; Int. of the Nodine VOR 298°T and Farmington, Minn., VOR 124° T radials; Farmington VOR; Darwin, Minn., VOR; to the Alexandria, Minn., VOR."
(2) VOR 478 (Falmouth, Ky., to Newcombe, Ky.) amended by adding the following: "From the Falmouth, Ky., VOR to the Newcombe, Ky., VOR."
VOR CONTROL AREAS:
(1) VOR 171 (Louisville, Ky., to Alexandria, Minn.) amended to read: "All of VOR Federal airway No. 171, including a W alternate."
(2) VOR 478 (Falmouth, Ky., to Newcombe, Ky.) amended by adding the following: "All of VOR Federal airway No. 478."

Effective 0001 EST 15 December 1960:

FEDERAL AIRWAY:
(1) VOR 170 (Nodine, Minn., to Salem, Mich., and Erie, Pa., to West Chester, Pa.) amended as follows: "From the Nodine, Minn., VOR via the Dells, Wis., VOR; Int. of the Dells VOR 097° T and the Milwaukee, Wis., VOR 307°T radials; Milwaukee VOR; Int. of the Milwaukee VOR 102°T and the Pullman VOR 303°T radials; Pullman, Mich., VOR; to the Salem, Mich., VOR. From the Erie, Pa., VOR via the Bradford, Pa., VOR; Slate Run, Pa., VOR; Selinsgrove, Pa., VOR; Tower City, Pa., VOR; Int of the Lancaster, Pa., VOR direct radial to the Allentown, Pa., VOR with the Pottstown, Pa., VOR 275°T radial; to the West Chester, Pa., VOR. The portion of this airway which lies within the geographic limits of, and between the designated altitudes of the Indiantown Gap Restricted Area (R-69) is excluded during this restricted area's time of designation."
VOR CONTROL AREA:
(1) VOR 170 (Nodine, Minn., to Salem, Mich., and Erie, Pa., to West Chester, Pa.) amended as follows: "All of VOR Federal airway No. 170."

Effective 0001 EST 12 January 1961:

FEDERAL AIRWAYS:
(1) VOR 139 (Mastic, N. Y., to Boston, Mass.) amended as follows: In the text, delete "Int of the Providence VOR 043° and the Boston VOR 133° radials; to the Boston, Mass.,

VOR." and substitute therefor "Whitman, Mass., VOR; Int of the Whitman VOR 041°T and the Boston VOR 133°T radials; to the Boston, Mass., VOR."

(2) VOR 451 (New Bedford, Mass., to Boston, Mass.) added to read: "From the point of Int. of the Whitman VOR 177° T with the Providence, R.I., VOR 113°T radials via the Whitman, Mass., VOR to the Boston, Mass., VOR."

VOR CONTROL AREAS:

(1) VOR 451 (New Bedford, Mass., to Boston, Mass.) amended to read: "All of VOR Federal airway No. 451."

✓ **AIRMAN'S GUIDE CORRECTION:** Correct Airman's Guide Volume 14, Number 26, dated 1 March 1960, as follows:

(1) Page 45, under Federal Airways (item 12) change effective date to read: 0001 EST 12 January 1961.

(2) Page 46, under VOR Control Areas (item 4) change effective date to read: 0001 EST 12 January 1961.

✓ **RESTRICTED AREA AMENDMENT:** The following Restricted Area Amendment shall become effective on 5 May 1960.

(Part 608 - Amendment 58)

(1) In Section 608.30, the Sault Ste. Marie, Mich., Kincheloe AFB Restricted Area/Military Climb Corridor (R-562) is amended to read as follows: Description- The airspace centered on the 149° T radial of the Kincheloe TVOR (lat 46-14-48N, long. 84-28-10W) extending from a point 7 smi SE of the TVOR to a point 34 smi SE of the TVOR having a width of 2 smi at a point 7 smi from the TVOR and expanding to a width of 4.6 smi at a point 34 smi from the TVOR. Designated altitudes- 2,800' to 15,800' MSL from a point 7 smi SE of the TVOR to a point 8 smi SE of the TVOR. 2,800' MSL to 24,800' MSL from a point 8 smi to a point 10 smi from the TVOR. 2,800' to 27,000' MSL from a point 10 smi to a point 12 smi from the TVOR. 6,800' to 27,000' MSL from a point 12 smi to a point 17 smi from the TVOR. 10,800' to 27,000' MSL from a point 17 smi to a point 22 smi from the TVOR. 15,800' to 27,000' MSL from a point 22 smi to a point 27 smi from the TVOR. 19,800' to 27,000' MSL from a point 27 smi to a point 34 smi from the TVOR. Time of designation - Continuous. Controlling agency - USAF Air Traffic Control Tower, Kincheloe AFB.

✓ **LOCATION IDENTIFIERS:** The following changes affect the use of the location identifiers:

ACE	Reno, Nev., Radiobeacon (Assignment)
PDA	Pasadena, Tex., Radiobeacon (Assignment)
PSB	Philipsburg, Pa., Black Moshannon-State Airport (Name change from Philipsburg Airport)
XDE	Camp Detrick, Md., Temporary Radiobeacon (Assignment)
XFV	Foxville, Md., Temporary Radiobeacon (Assignment)
XIL	Sea Island, N.J., Temporary VOR (Assignment)
XON	Ontario, Ore., Temporary VOR (Assignment)
XPS	Paris, Va., Temporary Radiobeacon (Assignment)

✓ **AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY**

New editions of the charts listed below will be published in about 1 month, making former prints obsolete for aviation use. Keep orders to a minimum until new edition is printed.

Birmingham	San Antonio	WAC 215
Little Rock	Atlanta Local	WAC 469
Mobile	Miami Local	WAC 522
Oklahoma City	Montgomery Local	JN 44

NEW EDITIONS

A new edition or new chart for the charts listed below is now available. Former prints should be destroyed or stamped **"OBSOLETE FOR USE IN AVIATION".**

Standard Aeronautical Charts - dates shown are release dates.

*Continuous navigation signal coverage does not exist over the entire route segment below 20000.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

NOTE: Destroy copy of ADF Procedure for Springfield, Ill.-Capital Airport, Procedure No. 1, Amdt. 6, Effective 16 April 1960, issued with Trans. Ltr. No. 60-9, which shows a transition from "Int R-209 SPI-VOR/or SW crs SPI-LFR & VLA-VOR R-312 (via crs 015°) to SW crs ILS (Final). This procedure being reissued.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

IMPORTANT NOTICE: Nation-wide changes in FAA's ATC communications July 7. See p. 116.

FEDERAL AVIATION AGENCY

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR - RADIO LISTINGS

FSS = Flight Service Station (FAA) (Formerly ATCS)

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal level are monitored continuously. Category II = (No longer in use; formerly applied to VAR). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an FSS, and located too distant from FSS to be monitored with a VHF receiver will fall into Category III. NOTE: Category I, II, III shown by (1), (2), (3) before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities.

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
→ = New or revised data
■ = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class: (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid; aircraft must have BFO oscillator
D . . . . . Distantly controlled
DME . . . . . Distance Measuring Equipment
DMET . . . . . TACAN compatible DME
FM . . . . . VHF fan marker (100 watts)
GCA . . . . . Ground Controlled Approach System
H . . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH . . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . . . Instrument Landing System (voice on localizer channel)
J . . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM . . . . . VHF fan marker, low powered (5 watts)
LMM . . . . . Compass locator station when installed at middle marker site
LOM . . . . . Compass locator station when installed at outer marker site
MA . . . . . Range (adcock, vertical radiators), power less than 50 watts
MH . . . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . . . Range (loop radiators), power less than 50 watts
MM . . . . . VHF middle marker
MRA . . . . . Range (adcock, vertical radiators), power 50 watts or more, but less than 150 watts
MRL . . . . . Range (loop radiators), power 50 watts or more, but less than 150 watts
OM . . . . . VHF outer marker
RA . . . . . Range (adcock, vertical radiators), power 150 watts or more
RL . . . . . Range (loop radiators), power 150 watts or more
S . . . . . Simultaneous range, homing signal and/or voice
T . . . . . Teletype
TACAN . . . . . UHF omni-directional bearing and distance type facility
TX . . . . . Principal teletype
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF/LMF ranges listed with the same identifier are controlled by the same FSS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar.
ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification.
7. Civil aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped civil aircraft entering a United States domestic control area from outside the United States will advise of availability of such equipment when making the first radio report to the United States air traffic control center by adding the word "transponder" to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

DIRECTORY OF AIRPORTS – LEGEND

✓ CITY AND AIRPORT NAME

City or Airport Name followed by:

(AF) - A civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A, N, CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, Marine Corps and National Guard Fields, respectively,

(P) - A civil airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) - Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

● - Indicates Scheduled Airline Stop.

NOTES:
1. Where lights are owned or maintained by FAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.
2. USAF aircraft are permitted to use only those fields with AF, A, N, MC, NG, CG, P, PC, after airport name.
3. When city and airport names are identical, the airport name is omitted to conserve space.
4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

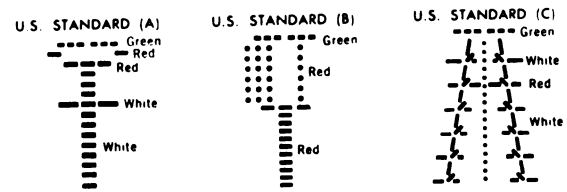
In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)

aw -allway field



LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

7a, 7b, 7c - High intensity instrument approach, U.S. Nat. Stand.configuration A, B, or C. as below:

*An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor airframe repairs
S3: Storage, minor airframe & minor powerplant repairs
S4: Storage, major airframe & minor powerplant repairs
S5: Storage, major airframe & major powerplant repairs
NOTE: Any S combination without parentheses indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parentheses-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or FAA communications station on field.

UNICOM

Unicom (Aeronautical Advisory Station transmitting and receiving, during the airport hours only, as follows):
U - 122.8 mc (for airports without a control tower; and
X - 123.0 mc (for airports with a control tower).

FUEL

F1: 80 oct., at least	F5: 115/145 oct., and lower
F2: 80/87 oct., and lower	F6: Kerosene
F3: 91/96 oct., and lower	F7: JP-4
F4: 100/130 oct., and lower	F8: JP-5

Any combination without parentheses indicates full time day attendant, in parentheses is part-time or irregular attendant.

REMARKS

(a) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(b) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(c) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
2. The Federal Government disclaims responsibility for non-Federal airports.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas is shown at each field.

(circling the field or radio call).

Because the obstructions on virtually all lighted fields are clearly outlined by obstruction lights, obstruction lights have not been included in the remarks section.

discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.

The Federal Government disclaims responsibility for any Federal airports.

MARTINSBURG RADIO: VOR has occasional rapid course deflections of short duration.
MARTINSBURG MUN ARPT: 3 inch lip on concrete threshold lgt bases, both ends rnwys 17-35. Mounds of rock and dirt 4' hi lctd 100' from apch end rnwy 35. (2-10)
MORGANTOWN RADIO: TACAN test operns suspended until aprx Apr 11. About Apr 26, VORTAC will be comsnd. TACAN channel 74. Class: H-BVORTAC.
PARKERSBURG RADIO: TACAN test operations tmpry inop.
PARKERSBURG, WOOD COUNTY ARPT: Caution, constr N end of apch to rnwy 21, area mrkd, flagged days, red lgts ngt. Txwy parallel to rnwy 3-21 clsd.
SUTTON, SITE 21, CIN-DCA ARPT: Closed, soft. (12-8)
WISCONSIN: GREEN BAY RADIO: About May 2, VOR portion of VORTAC will be shut down until aprx May 23, modernization & retuning. (12-31)
**GREEN BAY, AUSTIN-STRAUBEL ARPT: Apch lgts on req until further notice. 962' (1722'MSL) lgtd twr erected 10.8 nmi N (5°T) at lat 44-39-56, long. 88-07-47. (11-16)

WISCONSIN: *LA CROSSE RADIO: Multiples all courses LFR usable, except rgt side separation. (3-25) VOR has courses out of tolerance at MEA due roughness. 034°-070°, beyond 20 mi; 071°-160° beyond 25 mi; 190°-200°, beyond 25 mi; 220°-290°, beyond 18 mi; 300°-360° beyond 20 mi. (5-20)*

LONE ROCK RADIO: DMET operg test basis; channel 83.

MADISON-TRUAX FLD TOWER: ILS momentary erratic lclzr crs indications may be observed prior intercepting front crs on transitions from E. Tsmtr and rcvr 305.4 mc tmpry decmsnd; apch ctl freq 323.8 mc implemented. (7-24)

MADISON-TRUAX FLD: Constr of arresting barriers in overrun areas of rnwys 18 and 36 during dalgt hrs until aprx Apr 15; flares at ngt. (2-29)

MILWAUKEE RADIO: TACAN operg test basis; channel 111. (7-27) Mar 21, transcribed wea bcst operg (LFR 242 kc) test basis until aprx Apr 21. (3-21)

MILWAUKEE GENERAL MITCHELL FLD TOWER: VHF/DF coverage 3500' at 40 nmi all azimuths. ILS MM/LMM shut down - relctn. (9-11)

MILWAUKEE GENERAL MITCHELL FLD: Rnwys 13-31 and 7L-25R clsd to jet acft. 4150' rnwy 7L-25R open days only, SW 650' unusable, mrkd. Neon apch lgts inop. Obstn unlgtd p-line 2400' S of rnwy 1-19 extends 60' above rnwy level. New centerline txwy open from trml ramp to E end of fld. S 400' rnwy 1-19 clsd lndgs. Threshold lgts moved 400' N of S end of rnwy 1-19. Glide path touchdown point 2000' N of threshold lgts on rnwy 1. 1420' excavated area S of rnwy 1-19 day mrkd. (12-30)

MILWAUKEE, TIMMERMAN ARPT: Caution, men, eqpmt NW end rnwy 15-33; use turf strip if possible. (7-21)

OSHKOSH RADIO: VOR unusable at Pine Grove Int above 15,000'MSL and at Nero Int above 14,000'MSL due interference. (1-20)

**PEWAUKEE-CAPITOL DRIVE ARPT: 687' (1549'MSL) lgtd twr erected 4.5 nmi SE (150°T) lat 43-01-56, long 88-07-54. (1-6)

PHILLIPS MUN ARPT: Rnwy lgts inop. NE/SW rnwy will be plowed and usable all winter.

WAUKESHA COUNTY ARPT: NE/SW rnwy clsd; sod removal in progress for leveling of rnwy. (8-14)

WOODRUFF, LAKELAND MUN ARPT: N/S rnwy clsd, constr. (10-26)

WYOMING: **CASPER SPECIAL NOTICE: Civil jet trng being conducted periodically seven days/wk durg dalgt hrs within the unctld airspace bounded on the N by V26 btn Ross Int and RAP, V89 btn RAP and CDR, V182 btn CDR and DGW, V247 btn DGW and the Ross Int at alts 10,000-23,000'MSL inclusive. All acft contemplating VFR flt thru this area are advised to monitor one of the following FSS: Casper, Wyo.; Chadron, Nebr.; Rapid City, S.D. During training periods, these stns will include and advisory message at the end of each wea bcst. (10-26)

CASPER RADIO: TACAN operg test basis; channel 109. About May 1, VORTAC will be comsnd. TACAN channel 109. Class: H-BVORTAC. (2-26)

CASPER AIR TERMINAL TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 nmi. Not to be used for auto pilot apchs. (12-5)

CHEYENNE MUN ARPT: Ramp area N and NE of hangars on N side of arpt and ramp area within 100' radius of twr structure uncontrolled, not visible from twr. Caution, vcnty of fld due to military jet acft operns and practice inst apchs during hrs 0700-2200 MST. Twr cltd jet arresting barrier in opern rnwys 8 and 26. (12-19)

CODY MUN ARPT: Rnwy 9-27 clsd. (8-30)

DOUGLAS RADIO: DMET operg on test basis; channel 23. (3-18)

EVANSTON ARPT: New arpt reported, 5 mi NNW; elev 6600'; one dirt strip, N/S 2800' in length, soft when wet. (3-2)

ROCK SPRINGS RADIO: ILS glide slope has light to moderate roughness between OM and LFR. (1-16)

ROCK SPRINGS MUN ARPT: Rnwy 7 clsd ngts, due 6' unlgtd obstns 50' inside of threshold lgts 250' from edge of hard surface rnwy on W end. Hard surface on rnwy 7 begins 300' from threshold lgts. (1-22)

SHERIDAN RADIO: DMET operg on test basis; channel 100. (6-4)

PUERTO RICO: SAN JUAN INTL ARPT TOWER: Soon, apch ctl freqs 119.0, 269.2 mc will be comsnd. (2-26)

SAN JUAN, ISLA GRANDE ARPT: Txwy to Old Puerto Rico arwys trml bldg blocked by a 4' barbed wire fence. Use txwy lctd N side rnwy 9 aprx 650' from threshold rnwy 9. 4' barbed wire fence being constrd along N side of txwy aprx 100 yds from extreme E end of txwy to aprx 1500' W, fence mrkd by white flags on top of posts. All pilots using fld use extreme caution. All txwy lgts inop. (2-24)

SAN JUAN-RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvr 3023.5 kc will be

WISCONSIN: GREEN BAY RADIO: About May 2, VOR portion of VORTAC will be [illegible] until aprx May 23, modernization & retuning. (12-31)

** GREEN BAY, AUSTIN STRAUBEL ARPT: Rnwy 18-36 restricted to 70,000 lbs GWT dual wheel, 50,000 lbs GWT single wheel until further notice. 994' [illegible]

PUERTO RICO: decmsnd. (8-10)

SAN JUAN, PUERTO RICO INTL ARPT: Access txwy to ANG parking apron lgtd; ditch at W side of ANG access txwy; use extreme caution while taxiing day and ngt. Transient facils avbl 1130-2000Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high, 20' long erected 10' W of W side of txwy to ANG ramp. Hi-intensity runway end identifier lgts lctd aprx 30' each side of apch end rnwy 7 cmsnd. Men, eqpmt working vcnty of apch end rnwy 25, 20' derricks will be erected, area obstn lgtd. (1-7)

VIRGIN ISLANDS: ST CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making rgt hand turn after tkof to E. Men, eqpmt on E end of rnwy where 1200' extsn under constr; rnwy lgts E end tmpry lctd with exposed electric cables across E end on surface of rnwy. No run-off area avbl on E end.

ST THOMAS-HARRY S. TRUMAN RADIO: No coverage possible from N and E quads all VHF and UHF voice air/gnd channels, due terrain. (3-10)

ST THOMAS, CHARLCTTE AMALIE, TRUMAN ARPT: Use extreme caution lndg on that area of rnwy on which fresh seal coating applied, poor braking action and skidding; men & equipment working on rnwy, will be cleared for tfc. (2-25)

POST DEADLINE DATA

COLORADO: DENVER CENTER SPECIAL NOTICE: Radar Advisory Service for civil turbojet air carriers not avbl J90V from 33 nmi E of dptr to 120 nmi W dptr. Svc being resumed about April 24, 1960. (4-8)

MICHIGAN: **ROCHESTER-ROMEO-OXFORD AREA SPECIAL NOTICE: Flt Test Area described as follows: lat 42-41, long 83-08 to 42-48, 83-01 to 42-50, 83-16 to point of beginning. Acft will oper from McKinley Arpt, Fraser, Mich and along a corridor of a T crs of 337° to the flt test area. Hours: btn sunrise-sunset. Altitudes: 1000' and 4000' above gnd. Users: Joseph T. Benich & Florian E. Spiewak. Expires aprx 28 June 60.

MONTANA: HELENA, COUNTY-CITY ARPT: Rnwy 11-29 restricted to 70,000 lbs GWT dual wheel, 50,000 lbs GWT single wheel, rnwys 5-23 and 7-25 restricted to 10,000 lbs GWT. (4-5) (too late for inclusion in Directory of Airports)

OREGON: PENDLETON ARPT: Constr on apch lgts, men and eqpmt crossing aprx 75' E of rnwy 7L-25R; rnwy will remain open during constr. (4-7)

PENNSYLVANIA: SAYRE, CHEMUNG VALLEY ARPT: Clsd, due soft rnwys. (4-7)

TEXAS: McALLEN, MILLER INTL ARPT: 149' lgtd oil derrick erected 0.6 nmi E.

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

MILITARY CLIMB CORRIDORS: ALL FLIGHTS desiring to traverse these areas must obtain prior approval from the Controlling Agency and maintain continuous listening watch on the appropriate frequency while traversing the corridor. The list of corridors, controlling agencies and frequencies follows:

Corridors	Controlling Agency	Frequencies
Anchorage (Elmendorf AFB), Alaska	Anchorage Apch Ctl	122.9G;122.6G; 119.1;348.6
Burlington (Ethan Allen AFB), Vermont	Burlington Apch Ctl	118.3;122.5G;363.8
Camp Springs (Andrews AFB), Maryland	Andrews Apch Ctl	120.0;122.5G; 363.8
Columbus (Lockbourne AFB), Ohio	Columbus Apch Ctl	123.7;122.5G;274.3
Duluth Mun. Arpt., Minnesota	Duluth Apch Ctl	118.3;257.8; 122.5G
Falmouth (Otis AFB), Massachusetts	Otis RAPCON	124.7; 122.5G
Goldsboro (Seymour Johnson AFB), North Carolina	Seymour Johnson Apch Ctl	126.2; 122.5G
Oscoda (Wurtsmith AFB), Michigan	Wurtsmith Apch Ctl	126.2;122.5G
Portland Intn'l Arpt., Oregon	Portland Intnl Apch Ctl	124.9;122.5G;290.3
Rome (Griffiss AFB), New York	Griffiss Apch Ctl	118.5;363.8
Sault Ste. Marie (Kinross AFB), Michigan	Kinross Apch Ctl	118.3;122.5G; 363.8
Spokane (Geiger Fld), Washington	Spokane Apch Ctl	124.3; 263.0 ;122.5G
Tacoma (McChord AFB), Washington	McChord Apch Ctl	120.1;121.1;126.5;363.8; 122.5G
Westhampton Beach(Suffolk AFB), New York	Suffolk Apch Ctl	126.2;122.5G; 236.6
Wrightstown (McGuire AFB), New Jersey	McGuire Apch Ctl	134.1;335.8G
Youngstown Mun. Arpt., Ohio	Youngstown Apch Ctl	125.5;122.5G;257.8
San Diego(North Island NAS),	San Diego Apch Ctl	304.4G;126.18G

G - Guards

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

REMEMBER!

VFR CRUISING ALTITUDES ARE ODD THOUSANDS PLUS 500 FEET BETWEEN 0° AND 179° MAGNETIC: EVEN THOUSANDS PLUS 500 FEET BETWEEN 180° AND 359° MAGNETIC. CAR 60.32 (a)

WASHINGTON, D. C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D. C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U. S. Route 29 until past Falls Church. Departures proceed well right of U. S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Peneration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

✓ REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570. 49"-No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

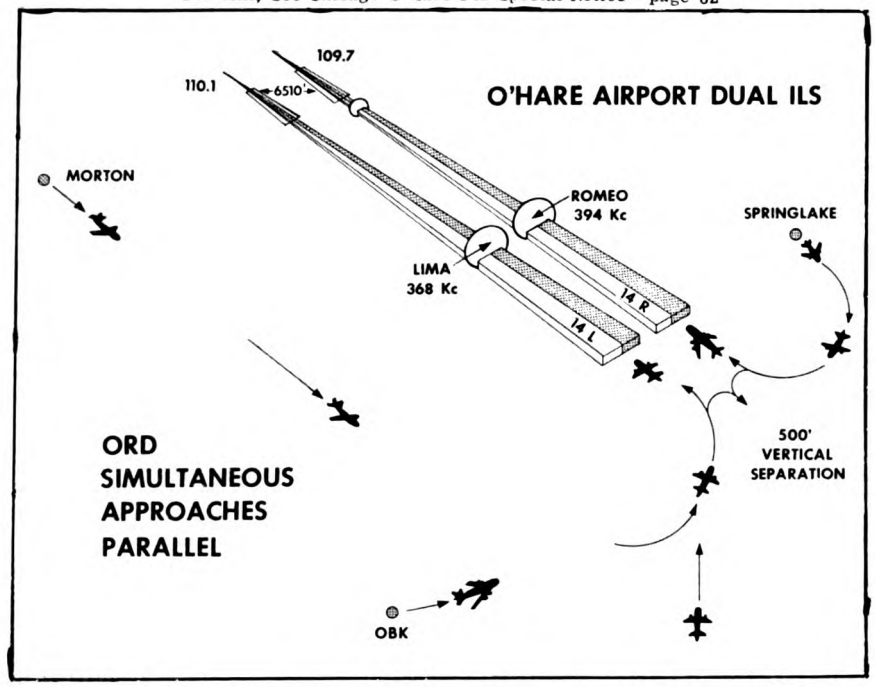
A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

NEW FSS FREQUENCY: Earlier plans for decommissioning 126.7 mc as a ground-to-air channel have been changed. To accommodate pilots favoring single channel simplex operation, 126.7 mc will remain available indefinitely as a ground-to-air channel. Pilots desiring reply on 126.7 mc must so state in initial call-up. 120.7 mc will continue to be used as the normal FSS ground-to-air reply to aircraft calls on 126.7 mc unless otherwise requested by the pilot.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down," "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-freqnency (200-400 kc) navigational aid (L/MF range or H facility.)



Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Chicago, (Joliet), Ill.	350 kc, 257 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
New York, N. Y.	209 kc
Washington, D. C.	332 kc
Boston, Mass.	382 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Pittsburgh, Penna.	254 kc
Boise, Idaho	359 kc
Cincinnati, Ohio	335 kc
✓ Wichita, Kansas	332 kc
*Milwaukee, Wisconsin	242 kc

*Operating on test basis.

For text, see Chicago-O'Hare Fld-Special Notice - page 82

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is April 24, 1960.

SPECIAL NOTICE

CALIFORNIA
OCEANSIDE
MARINE CORPS MANEUVER AREA

Maneuvers, including air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact Oceanside, San Diego, Thermal, Long Beach, Ontario and Los Angeles FSS for information pertaining to air activity during daylight hours on the maneuver dates.

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information, when possible, and with radar vectors when requested by the pilot. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route No. 1 (Los Angeles, Calif., to Oakland, Calif.)
2. VOR/VORTAC Jet Route No. 1 (Oakland, Calif., to Seattle, Wash.)
3. VOR/VORTAC Jet Route No. 2 (Houston, Texas to Lake Charles, La.)
4. VOR/VORTAC Jet Route No. 3 (Oakland, Calif., to Spokane, Wash.)
5. VOR/VORTAC Jet Route No. 8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route No. 12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route No. 16 (Portland, Ore., to Chicago, Ill.) Nonradar Advisory area from 60 nmi W of Dillon, Mont., VOR to 90 nmi E of Dillon. Eff. 4/24/60.
8. VOR/VORTAC Jet Route No. 21 (Omaha, Neb., to Duluth, Minn.)(Dallas, Tex., to San Antonio, Tex.)
9. VOR/VORTAC Jet Route No. 22 (Lake Charles, La., to Gordonsville, Va.)
10. VOR/VORTAC Jet Route No. 26 (Amarillo, Tex., to Joliet, Ill.)
11. VOR/VORTAC Jet Route No. 29 (Houston, Tex., to Memphis, Tenn.) Eff. 5/1/60.
12. VOR/VORTAC Jet Route No. 31 (Dallas, Tex., to Chicago, Ill.)
13. VOR/VORTAC Jet Route No. 33 (Shreveport, La., to the Int. of J33V with J31V.) Eff. 5/1/60.
14. VOR/VORTAC Jet Route No. 34 (Cleveland, Ohio to Pittsburgh, Pa.)
15. VOR/VORTAC Jet Route No. 35 (New Orleans, La., to St. Louis, Mo.) Eff. 5/1/60.
16. VOR/VORTAC Jet Route No. 37 (New Orleans, La., to Spartanburg, S.C.)
17. VOR/VORTAC Jet Route No. 42 (Dallas, Tex., to New York, N.Y.)
18. VOR/VORTAC Jet Route No. 45 (Alma, Ga., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route No. 49 (Alma, Ga., to Spartanburg, S.C.)
20. VOR/VORTAC Jet Route No. 52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
21. VOR/VORTAC Jet Route No. 53 (Miami, Fla., to the Int. of J53V and J81V.)
22. VOR/VORTAC Jet Route No. 53 (Spartanburg, S.C., to Pittsburgh, Pa.)
23. VOR/VORTAC Jet Route No. 58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.) Eff 5/1/60.
24. VOR/VORTAC Jet Route No. 60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
25. VOR/VORTAC Jet Route No. 62 (Idlewild, N.Y., to Nantucket VOR.)
26. VOR/VORTAC Jet Route No. 64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
27. VOR/VORTAC Jet Route No. 67 (Idlewild, N.Y., to U.S.-Canadian Border.)
28. VOR/VORTAC Jet Route No. 69 (Spartanburg, S.C., to Gordonsville, Va.)
29. VOR/VORTAC Jet Route No. 75 (Miami, Fla., to U.S.-Canadian Border)
30. VOR/VORTAC Jet Route No. 77 (Miami, Fla., to U.S.-Canadian Border)
31. VOR/VORTAC Jet Route No. 78 (Los Angeles, Calif., to New York, N.Y.)
32. VOR/VORTAC Jet Route No. 79 (Miami, Fla., to Idlewild, N.Y.)
33. VOR/VORTAC Jet Route No. 80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
34. VOR/VORTAC Jet Route No. 81 (The intersection of J81V and J53V to Barracuda Int.)
35. VOR/VORTAC Jet Route No. 82 (Chicago, Ill., to Boston, Mass.)
36. VOR/VORTAC Jet Route No. 84 (Oakland, Calif., to the U.S.-Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 60 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.

(Continued)

VOR/VORTAC Jet Route No. 85 (Miami, Fla., to the U.S.-Canadian Border.)
VOR/VORTAC Jet Route No. 87 (Dallas, Tex., to Houston, Tex.)
VOR/VORTAC Jet Route No. 89 (Northbrook, Ill., to Miami, Fla.)
Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
VOR/VORTAC Jet Route No. 90 (Seattle, Wash., to Chicago, Ill.) Effective 5 April 1960.

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.

2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)

3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)

4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.

5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.

6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.

7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.

8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.

9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.

10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.

11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.

12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.

13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.

14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.

15. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.

16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 for a distance of 183 n mi.

17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.

18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area) Effective 15 November 1959.

19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B.C., Canada RR.

20. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass. Effective 17 December 1959.

21 New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
Effective 17 December 1959.

22. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR Effective 17 December 1959.

23. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
Effective 17 December 1959.

24. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 265° M radial; to Int. of Palmdale, Calif., 265° M radial and J-1-V.
d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.

25. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 Ukiah, Calif., VOR; V-107 to Red Bluff, Calif., VOR.
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.

26. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.

27. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.

28. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

29. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S.-Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

30. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

31 From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

32. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct ers from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 283° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex. VOR 132° M radials; to the Leona, Tex., VOR.

33. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct ers from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

RADAR - On page 29 of Flight Information Manual Volume 13, dated December 1959, replace subtopic Air Traffic Control Radar Beacon System (ATCRBS) with the following:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft-reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control(ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route-High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification.
7. Civil aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped civil aircraft entering a United States domestic control area from outside the United States will advise of availability of such equipment when making the first radio report to the United States air traffic control center by adding the word "transponder" to its identification.

ATC PROCEDURES - On page 80 of Flight Information Manual Volume 13(page 80 dated Feb, 29, 1960) add as a continuation of the first paragraph entitled RADAR TRAFFIC CONTROL: ATC radar procedures provide more expeditious service to IFR aircraft than can be provided by other means. At locations where such procedures are used all aircraft desiring to operate IFR are subject to control in accordance with radar separation standards. Non-radar procedures will be used when deemed advisable by Air Traffic Control

ATC PROCEDURES - On page 73 of Flight Information Manual Volume 13 dated December 1959, under first paragraph entitled POSITIVE CONTROLLED AIRSPACE add:
f. Information on observed radar targets will not be provided to aircraft operating within positive controlled airspace.

ATC PROCEDURES - Two Way Radio Failure - On page 74 of the Flight Information Manual Volume 13 (dated December 1959), under "En Route Procedures"- column 2-change paragraph 1 line 3 to read: "flight at the altitude(s) flight level(s) last assigned by Air Traffic Control,". Paragraph 2 (a) line 2 to read: "he will continue flight at the altitude(s) flight level(s) last assigned by Air Traffic Control,". Paragraph 2 (b) line one substitute word "approach" for "clearance".

ATC PROCEDURES - On page 83 of the Flight Information Manual Volume 13(dated December 1959) under paragraph titled "Airport Traffic Control Communications Procedures Aircraft Departing" column 2 amend 2nd and 3rd paragraphs to read:

"Tower: ATC CLEARS BEECHCRAFT ONE THREE ONE FIVE NINER TO THE CHICAGO MIDWAY AIRPORT, VIA VICTOR EIGHT, MAINTAIN EIGHT THOUSAND, OVER."

"Aircraft: BEECHCRAFT ONE THREE ONE FIVE NINER IS CLEARED TO THE CHICAGO MIDWAY AIRPORT. VIA VICTOR EIGHT. MAINTAIN EIGHT THOUSAND, OVER."

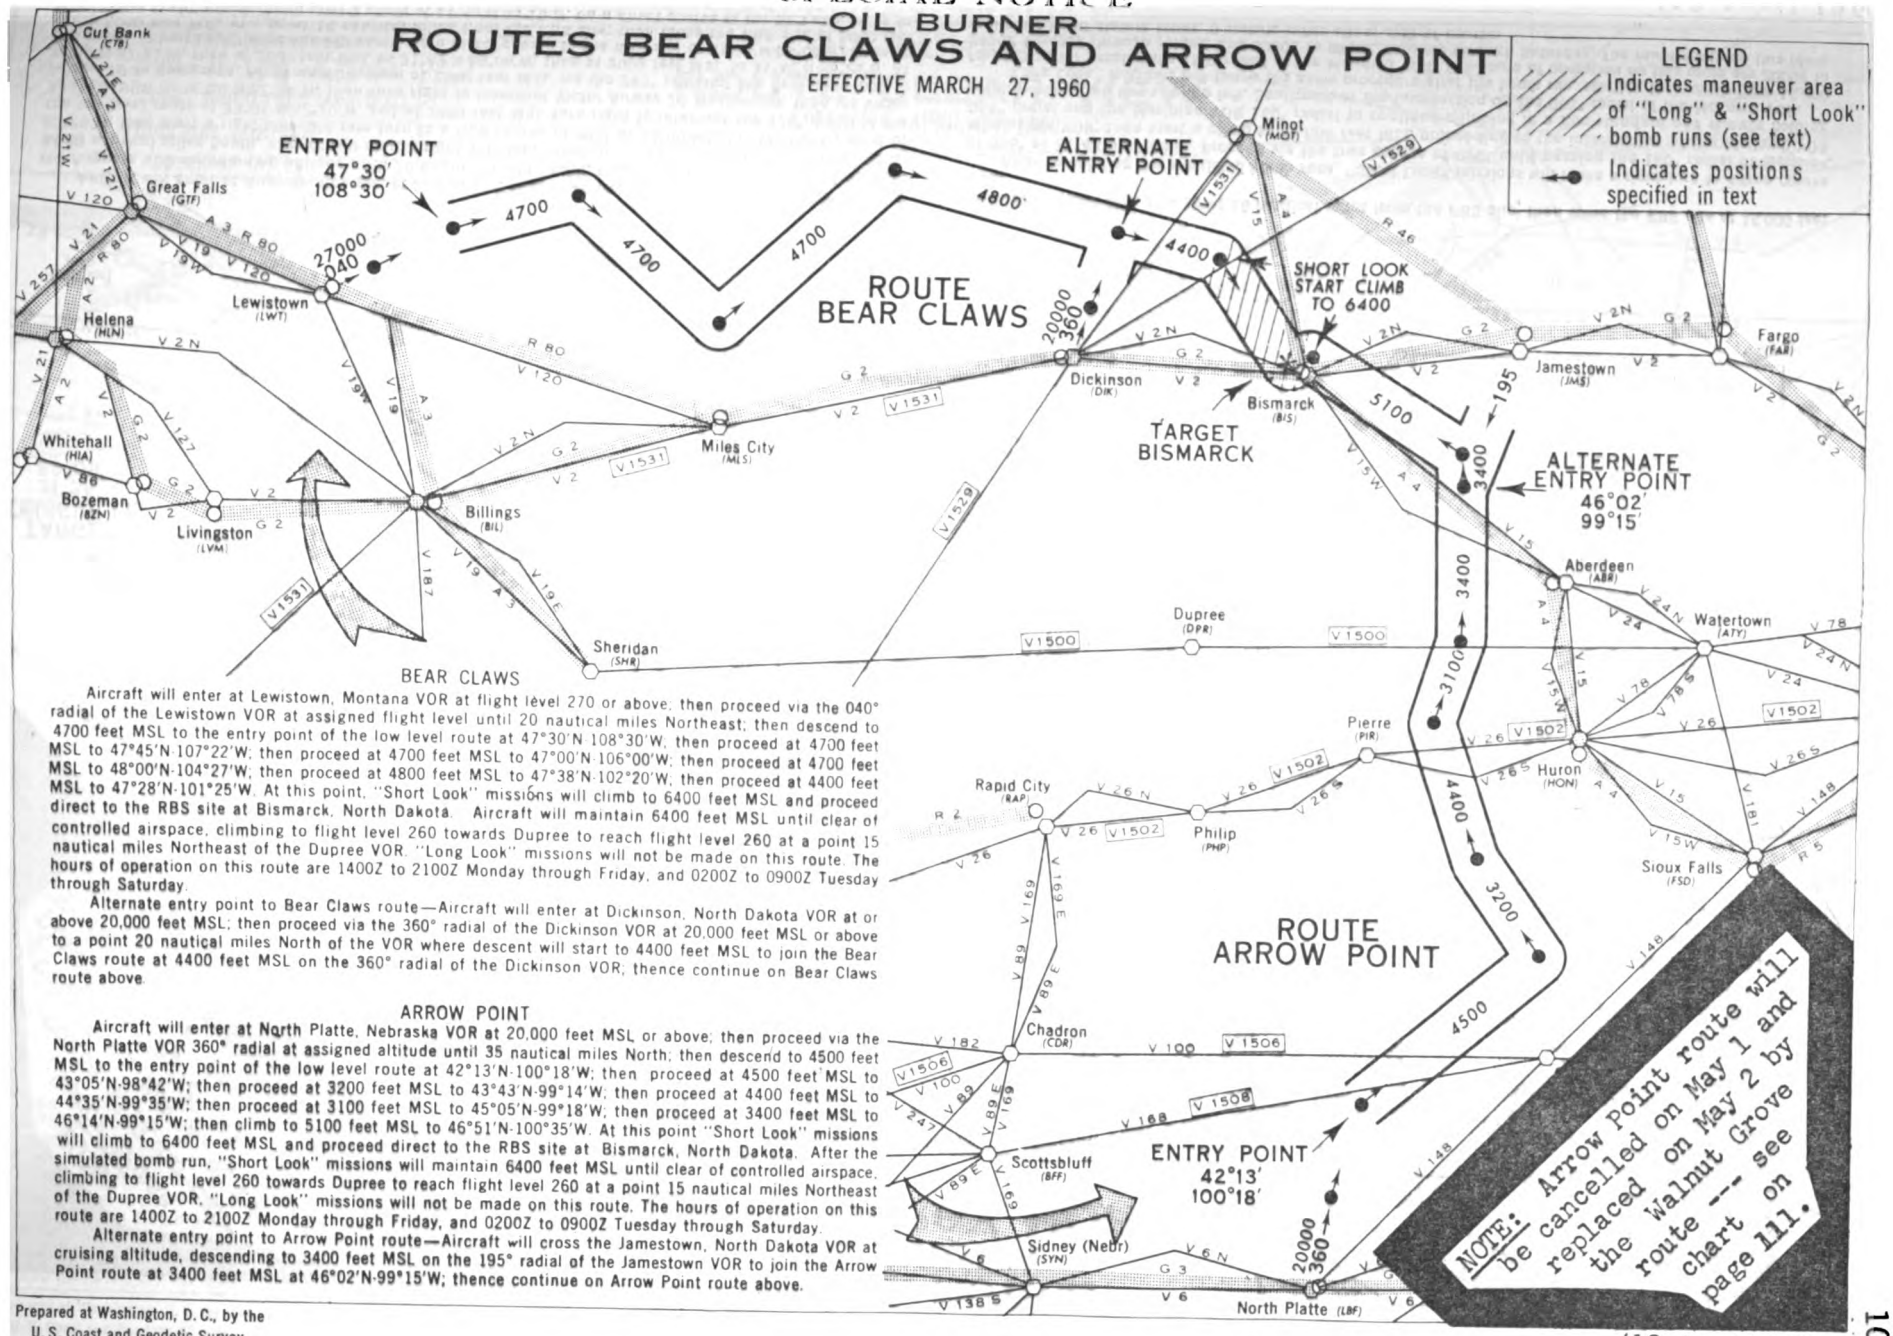
ATC PROCEDURES - On page 75 of the Flight Information Manual Volume 13 (dated December 1959), column I, amend paragraph 3 (b) to read: "Where approved military jet penetration procedures have been published for the airport of destination, holding by military jet aircraft will be accomplished at the last assigned altitude or flight level in accordance with the holding procedure depicted on the jet approach and landing chart for that airport."; and add the following: "NOTE"- Detailed approach and landing procedures, approved for military jet aircraft, are published in the U.S. Air Force-U.S. Navy "Flight Information Publication-Terminal--High Altitude" by the Aeronautical Chart and Information Center, St. Louis, Missouri."

ATC PROCEDURES - On page 75 of the Flight Information Manual Volume 13 (dated December 1959), under paragraph titled "Shuttle" amend sub-paragraph (b) to read: "Where approved military jet penetration procedures have been published for the airport of destination, military jet aircraft will descend to initial penetration altitude or flight level while executing the holding procedure depicted on the jet approach and landing chart for that airport."

ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.

CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command) is conducting low level navigational flights in B-47 and B-52 jet acft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.



(12 April 1960)

f. Information on observed radar targets will not be provided to aircraft operating within positive controlled airspace.

[illegible] on a street which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look." The intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

SPECIAL NOTICE
OIL BURNER
ROUTES BEAR CLAWS AND ARROW POINT
EFFECTIVE MARCH 27, 1960

BEAR CLAWS

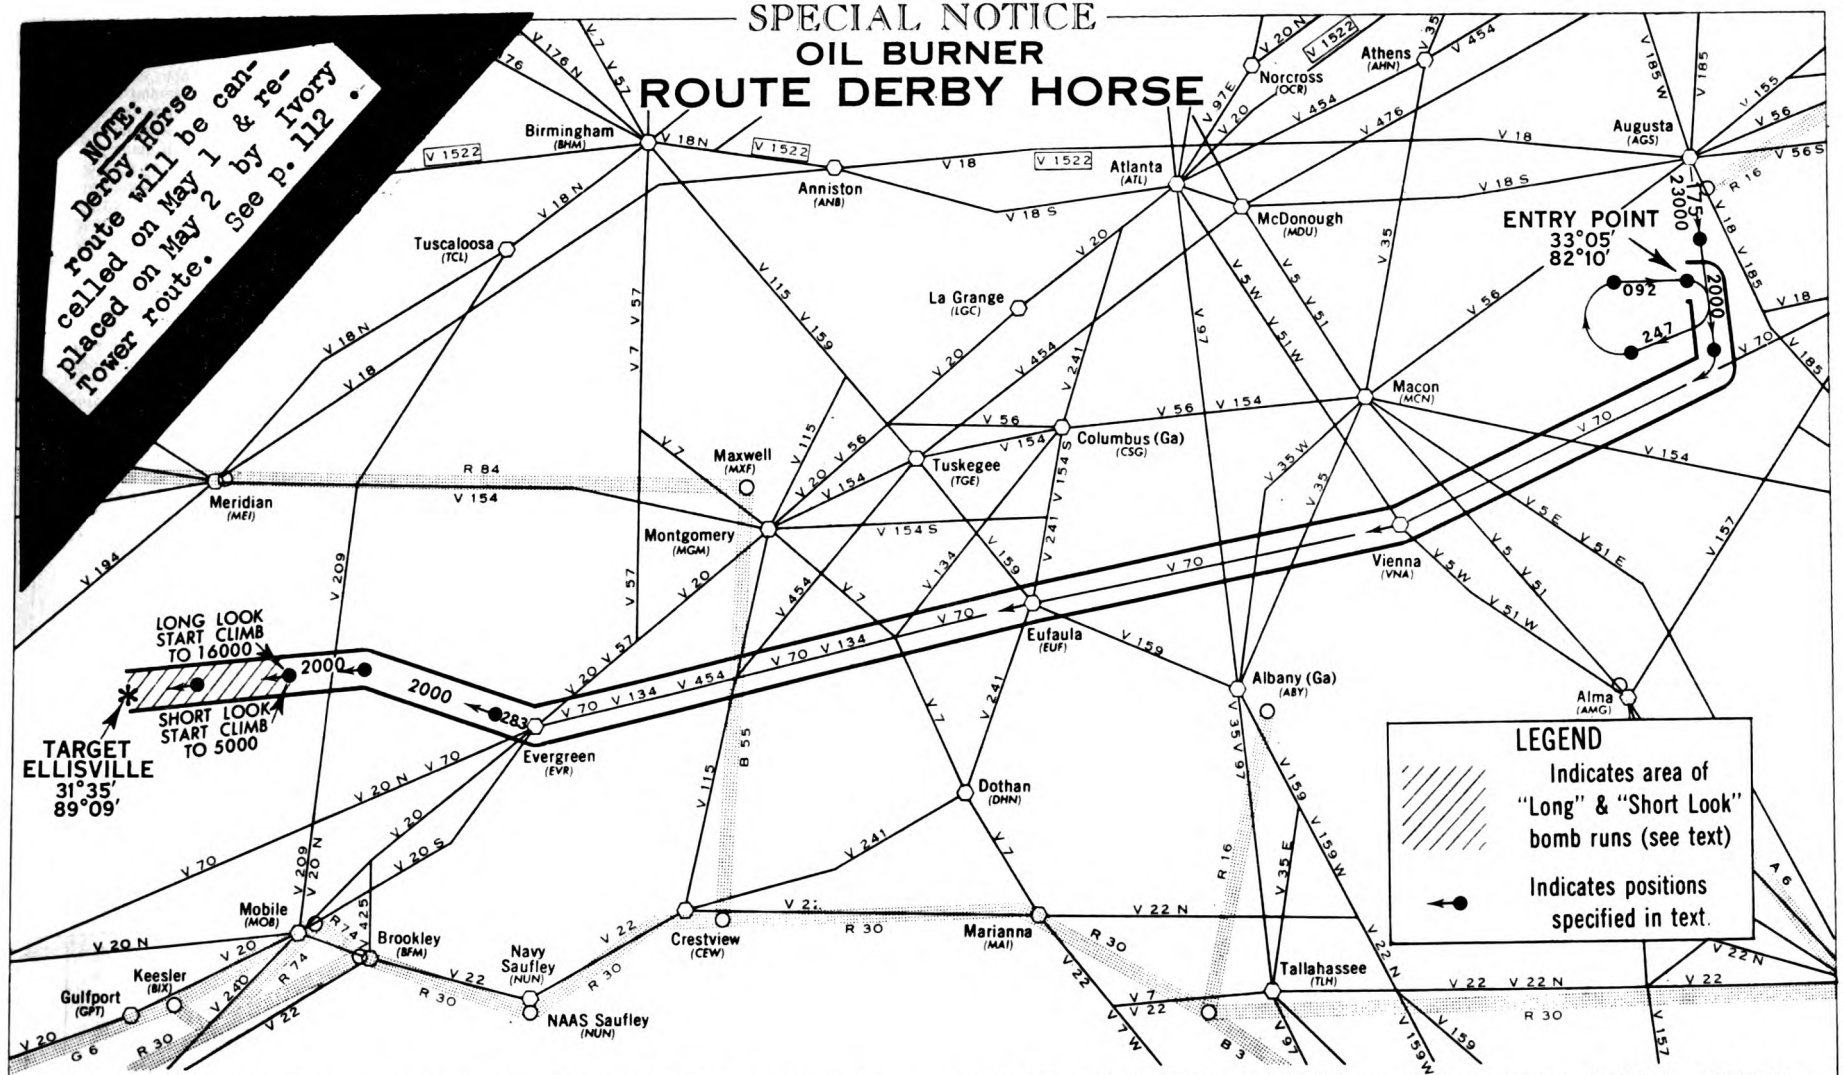
Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

ARROW POINT

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 360° radial at assigned altitude until 35 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°13'N-100°18'W; then proceed at 4500 feet MSL to 43°05'N-98°42'W; then proceed at 3200 feet MSL to 43°43'N-99°14'W; then proceed at 4400 feet MSL to 44°35'N-99°35'W; then proceed at 3100 feet MSL to 45°05'N-99°18'W; then proceed at 3400 feet MSL to 46°14'N-99°15'W; then climb to 5100 feet MSL to 46°51'N-100°35'W. At this point "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. After the simulated bomb run, "Short Look" missions will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Arrow Point route—Aircraft will cross the Jamestown, North Dakota VOR at cruising altitude, descending to 3400 feet MSL on the 195° radial of the Jamestown VOR to join the Arrow Point route at 3400 feet MSL at 46°02'N-99°15'W; thence continue on Arrow Point route above.



Prepared at Washington, D. C., by the
U. S. Coast and Geodetic Survey

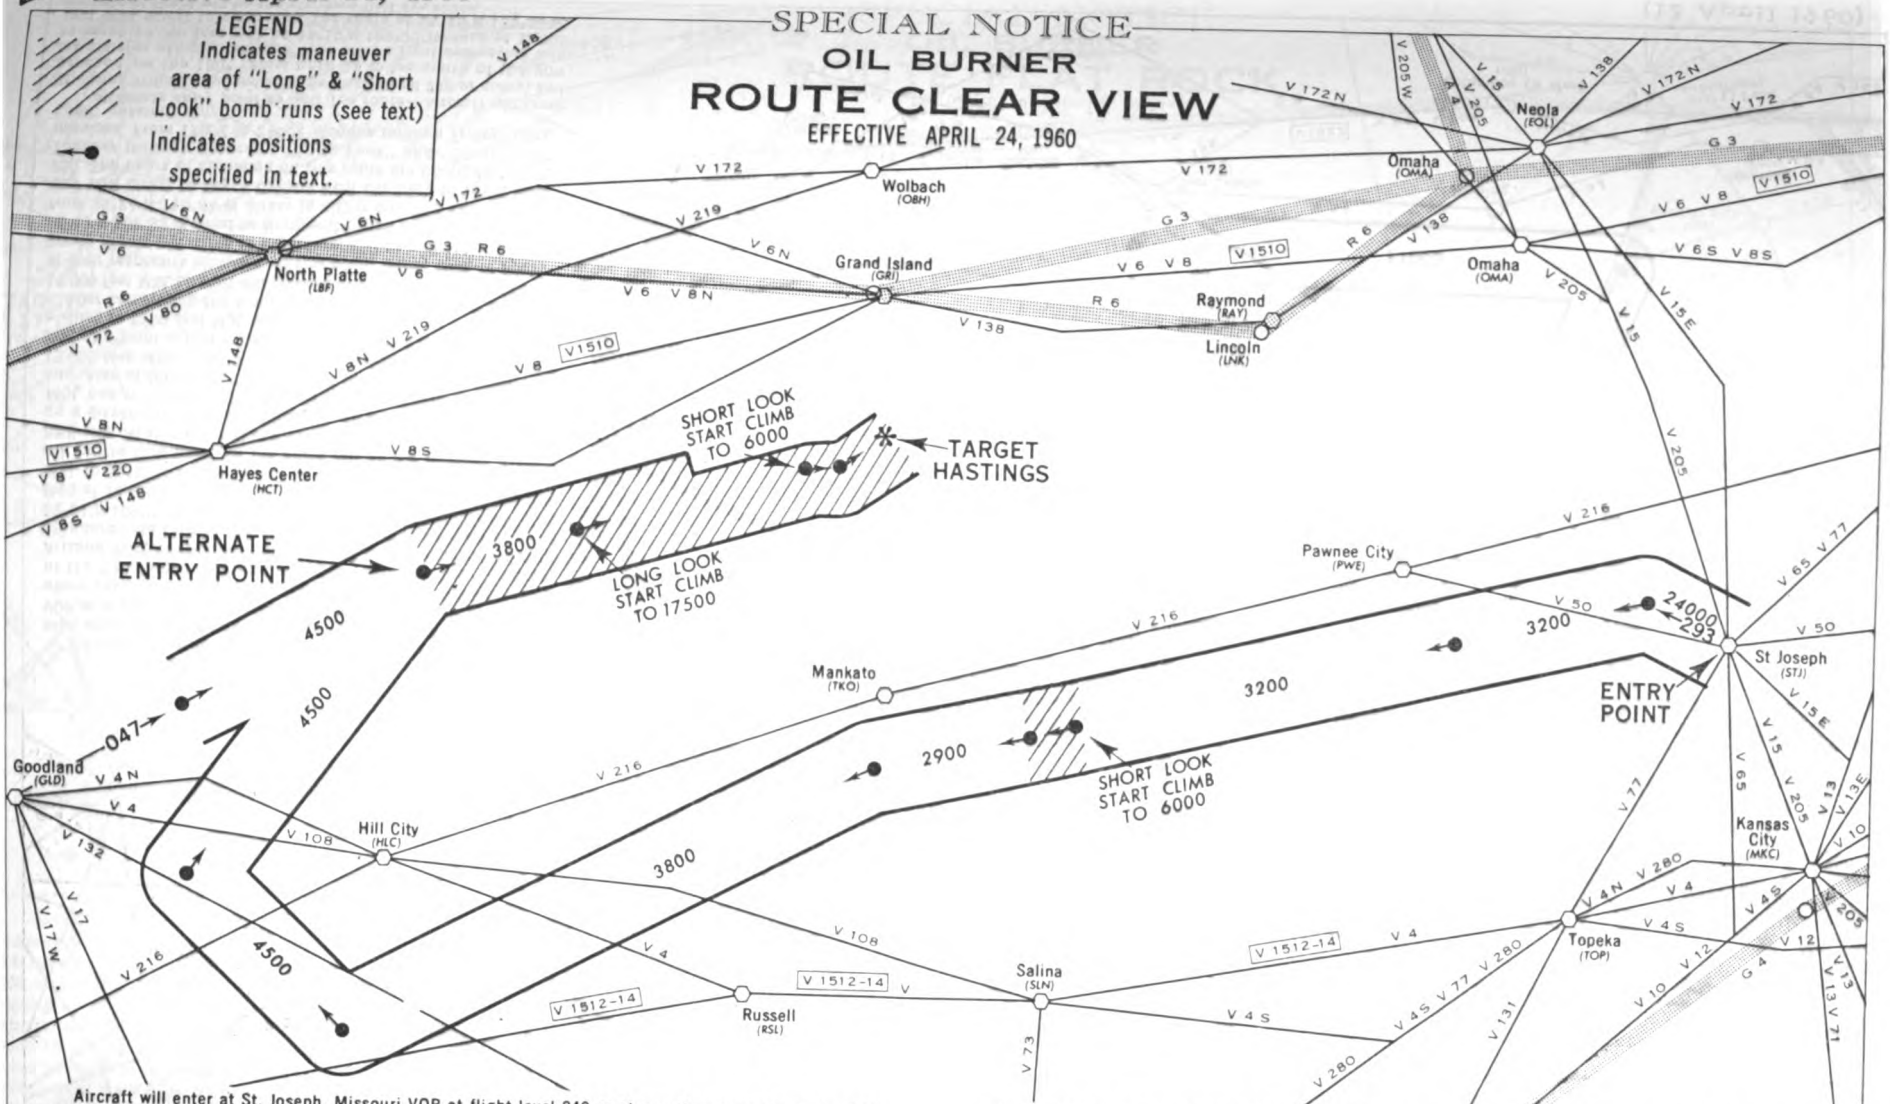
SPECIAL NOTICE

OIL BURNER

ROUTE DERBY HORSE

NOTE: Derby Horse route will be cancelled on May 1 & replaced on May 2 by Ivory Tower route. See p. 112.

Aircraft will enter at Augusta, Georgia, at 23,000 feet MSL or above; then proceed via the 175° radial of the Augusta VOR maintaining altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49′N-82°26′W; then start a right standard rate turn to a true course of 092° at 33°06′N-82°30′W to entry point of the low level route at 33°05′N-82°10′W, and at 2000 feet MSL turn right to intercept the 175° radial of the Augusta VOR to 32°50′N-82°04′W; then turn right to intercept Victor Airway 70 Westbound; then via Victor Airway 70 to Evergreen, Alabama VOR; then at 2000 feet MSL via the 283° radial of the Evergreen VOR to 31°32′N-87°31′W; then at 2000 feet MSL to 31°42′N-88°06′W; then at 2000 feet MSL to 31°40′N-88°26′W. At this point, "Short Look" missions will climb, on a direct course to the RBS site at 31°35′N-89°09′W, so as to reach 5000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 5000 feet MSL. "Long Look" missions will start a climb at 31°40′N-88°26′W, on a direct course to the RBS site, so as to **reach 16,000 feet MSL at a point 16 nautical miles from the RBS site; then cross the RBS site at 16,000 feet MSL.**



After completing the simulated bomb runs, "Short Look" missions will make a right turn to a true course of 096° at 31°43′N-89°09′W, proceed via the true course of 096° until passing the 180° radial of Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding to the intersection of the McComb VOR 068° radial and the Meridian VOR 160° radial to continue climbing in a non-standard one minute holding pattern making all turns to the left, Southwest of the intersection on the 068° radial of the McComb VOR.

"Long Look" missions will follow the same procedure after the bomb run, starting their climb from 16,000 feet MSL after passing the 180° radial of the Meridian VOR. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday. The route width on this route is limited to 10 statute miles, 5 statute miles either side of course.

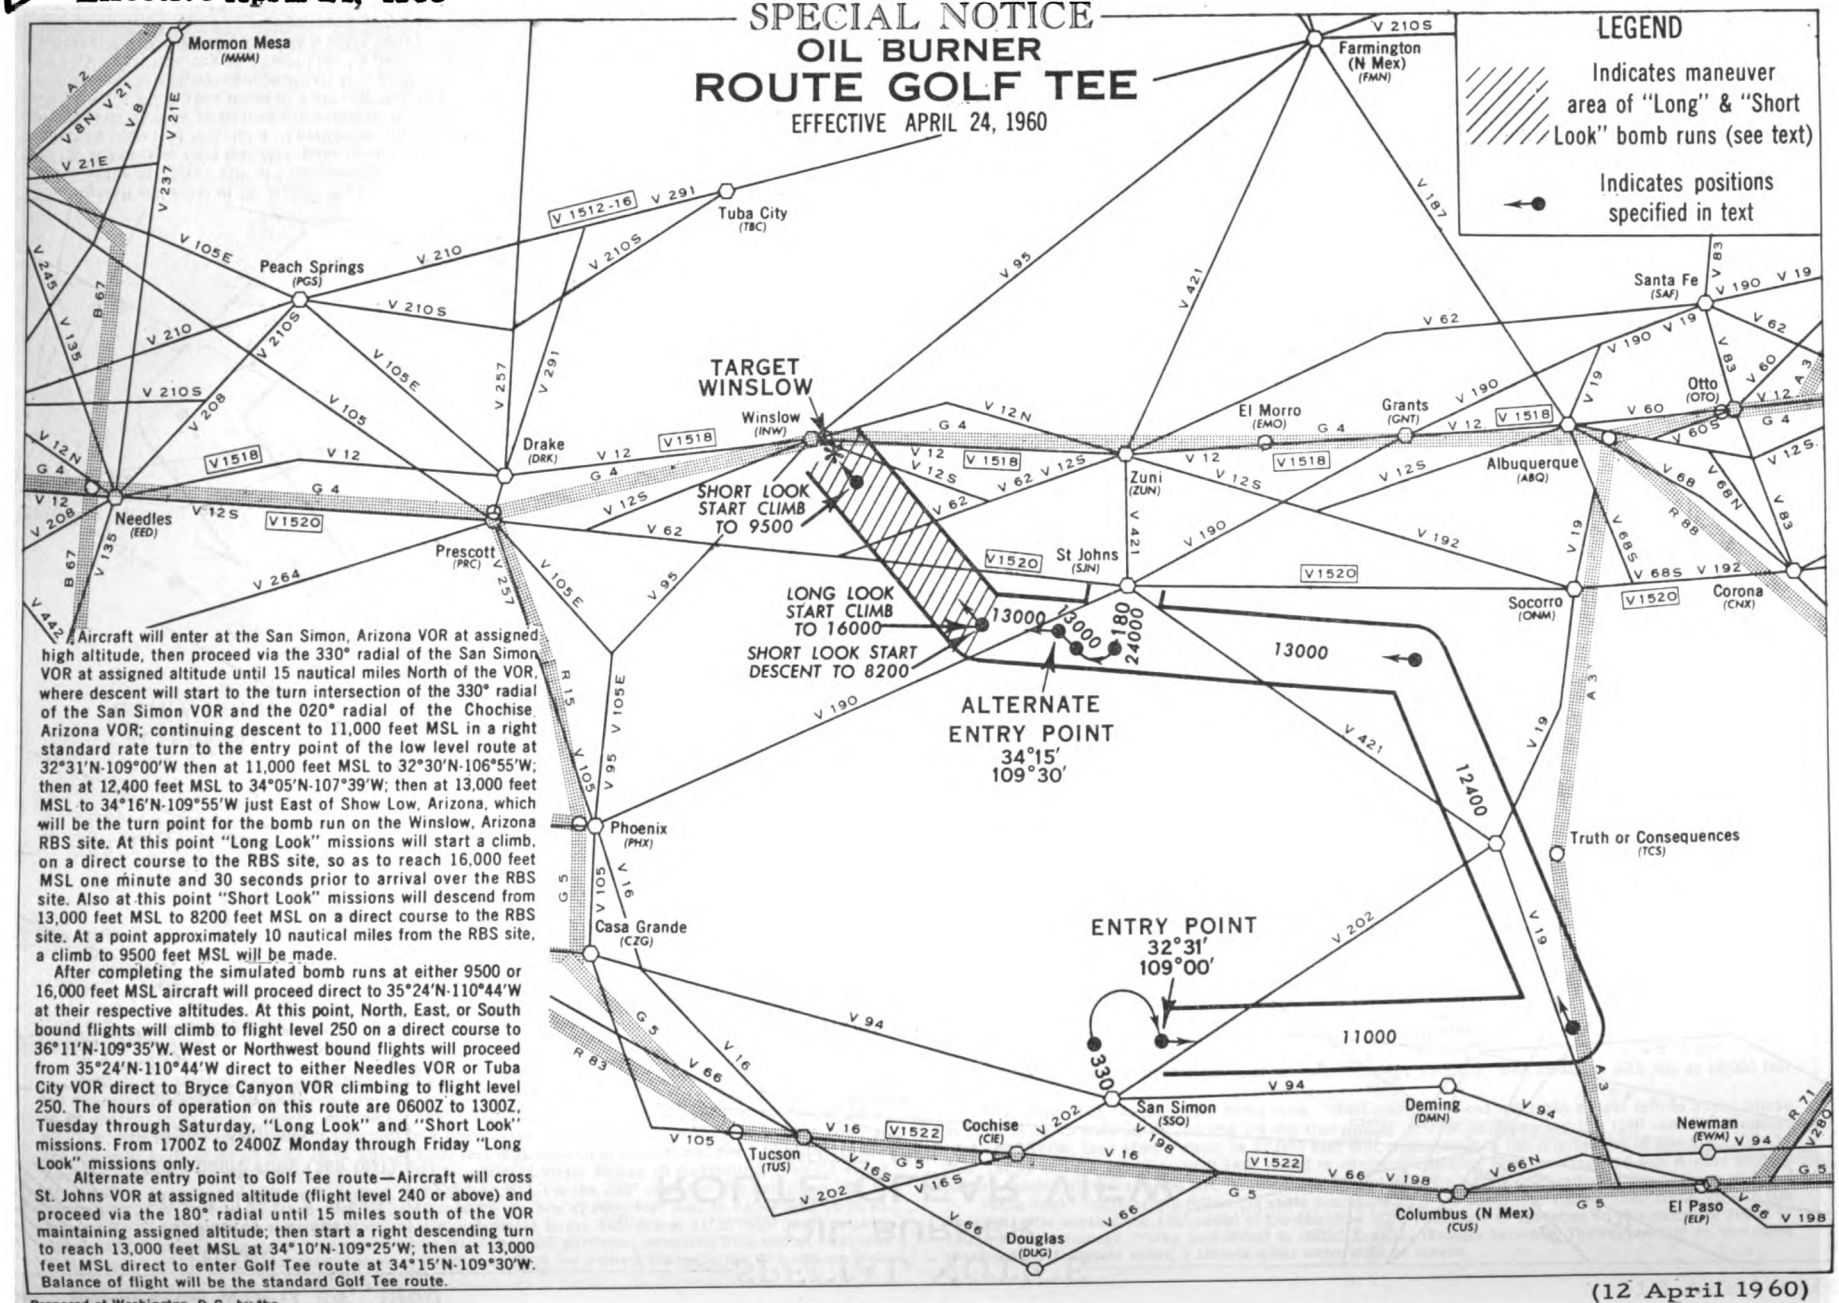
(12 April 1960)

SPECIAL NOTICE
OIL BURNER
ROUTE CLEAR VIEW
EFFECTIVE APRIL 24, 1960



Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.

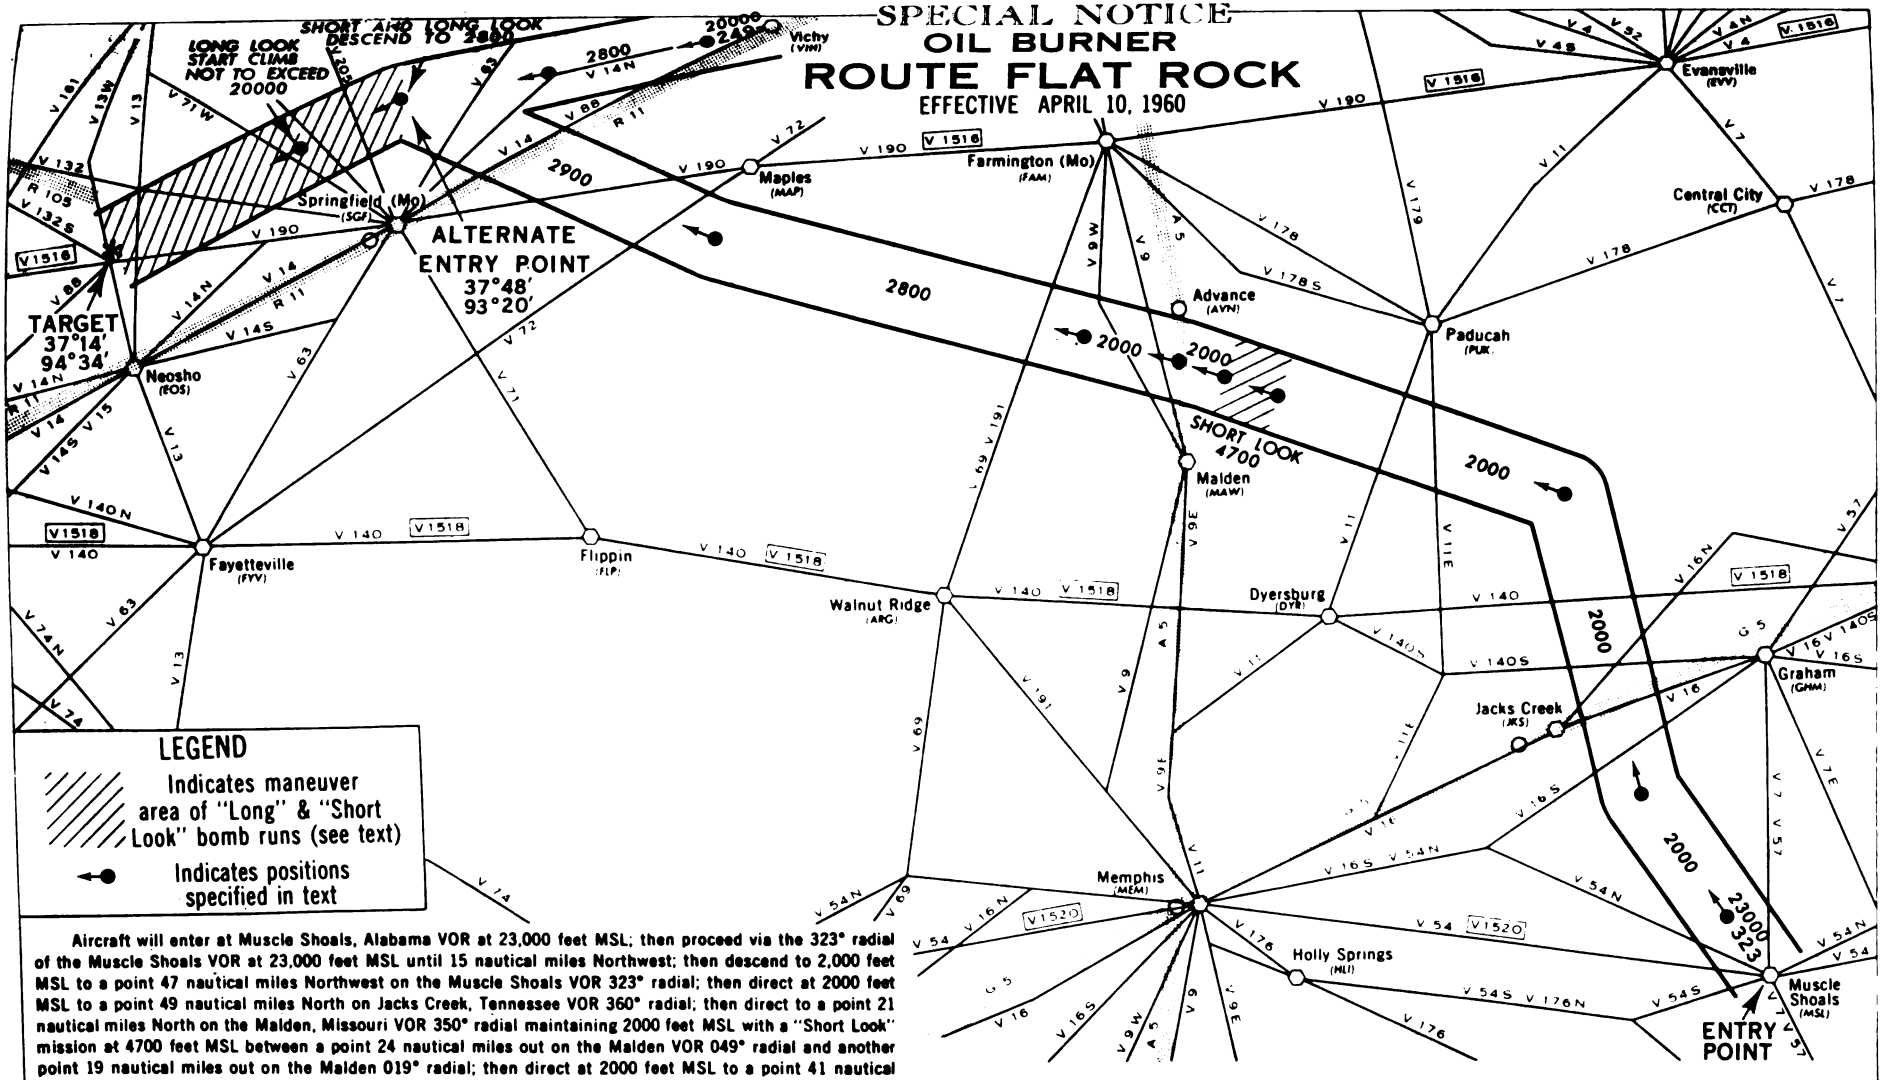
Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

✓ **Effective April 24, 1960**

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE APRIL 24, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Chochise Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31′N-109°00′W then at 11,000 feet MSL to 32°30′N-106°55′W; then at 12,400 feet MSL to 34°05′N-107°39′W; then at 13,000 feet MSL to 34°16′N-109°55′W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs at either 9500 or 16,000 feet MSL aircraft will proceed direct to 35°24′N-110°44′W at their respective altitudes. At this point, North, East, or South bound flights will climb to flight level 250 on a direct course to 36°11′N-109°35′W. West or Northwest bound flights will proceed from 35°24′N-110°44′W direct to either Needles VOR or Tuba City VOR direct to Bryce Canyon VOR climbing to flight level 250. The hours of operation on this route are 0600Z to 1300Z, Tuesday through Saturday, "Long Look" and "Short Look" missions. From 1700Z to 2400Z Monday through Friday "Long Look" missions only.



Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10′N-109°25′W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15′N-109°30′W. Balance of flight will be the standard Golf Tee route.

(12 April 1960)

OIL BURNER
ROUTE FLAT ROCK
EFFECTIVE APRIL 10, 1960

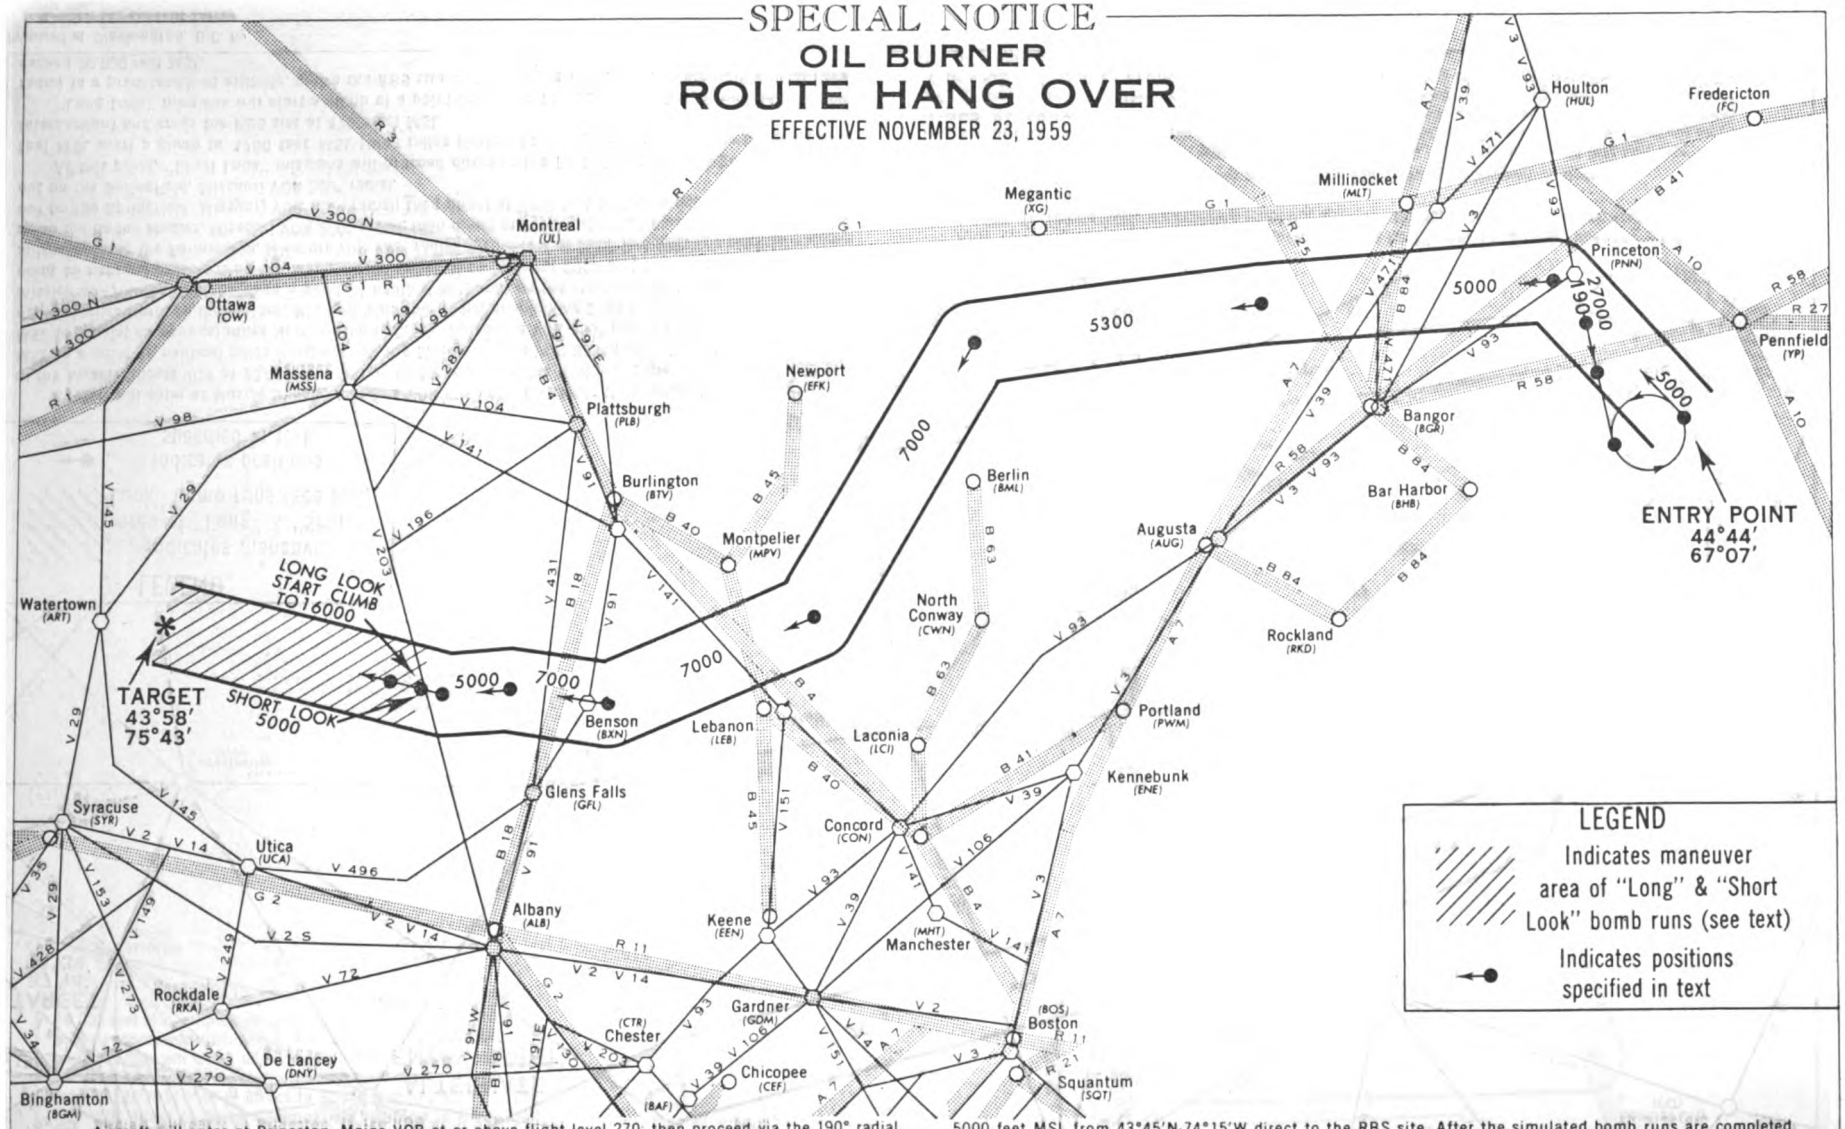
SPECIAL NOTICE
OIL BURNER
ROUTE FLAT ROCK
EFFECTIVE APRIL 10, 1960

Aircraft will enter at Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR at 23,000 feet MSL until 15 nautical miles Northwest; then descend to 2,000 feet MSL to a point 47 nautical miles Northwest on the Muscle Shoals VOR 323° radial; then direct at 2000 feet MSL to a point 49 nautical miles North on Jacks Creek, Tennessee VOR 360° radial; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point, "Short Look" missions will proceed direct to the RBS site at 37°14'N-94°34'W, at 2800 feet MSL start a climb to 4700 feet MSL three miles North of the Joplin low frequency beacon (Waco Intersection) and cross the RBS site at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.



The hours of operation on this route are 0500Z to 1300Z, Tuesday through Saturday.

Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

SPECIAL NOTICE
OIL BURNER
ROUTE HANG OVER
EFFECTIVE NOVEMBER 23, 1959

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08'N-67°39'W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56'N-67°36'W at or above 20,000 feet MSL; then continuing descent to 44°39'N-67°32'W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44'N-67°07'W; then to 45°19'N-67°49'W at 5000 feet MSL; then to 45°16'N-69°30'W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08'N-71°09'W; then climb to 7000 feet MSL to 44°03'N-72°04'W; then to 43°42'N-73°12'W at 7000 feet MSL; then to 43°45'N-73°45'W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44'N-74°07'W; then to 43°45'N-74°15'W at 5000 feet MSL; then to 43°46'N-74°25'W at 5000 feet MSL; then to the RBS site at 43°58'N-75°43'W. "Long Look" missions will start climb at 43°45'N-74°15'W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45'N-74°15'W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13'N-75°38'W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

(12 April 1960)

Effective May 2, 1960

SPECIAL NOTICE

OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE MAY 2, 1960

NOTE: This route not effective until May 2 - meanwhile use the Arrow Point route.

ATTENTION: From May 2, 1960, thru June 3, 1960, B-47 jets flying over this route will increase their airspeed from 280 to 390 kts IAS at a point West of the Huron, S.Dak. VOR and will make their "Short Look" at 425 kts IAS.

LEGEND
Indicates maneuver area of "Long" & "Short Look" bomb runs (see text)
Indicates positions specified in text.

SHORT LOOK START CLIMB TO 6100

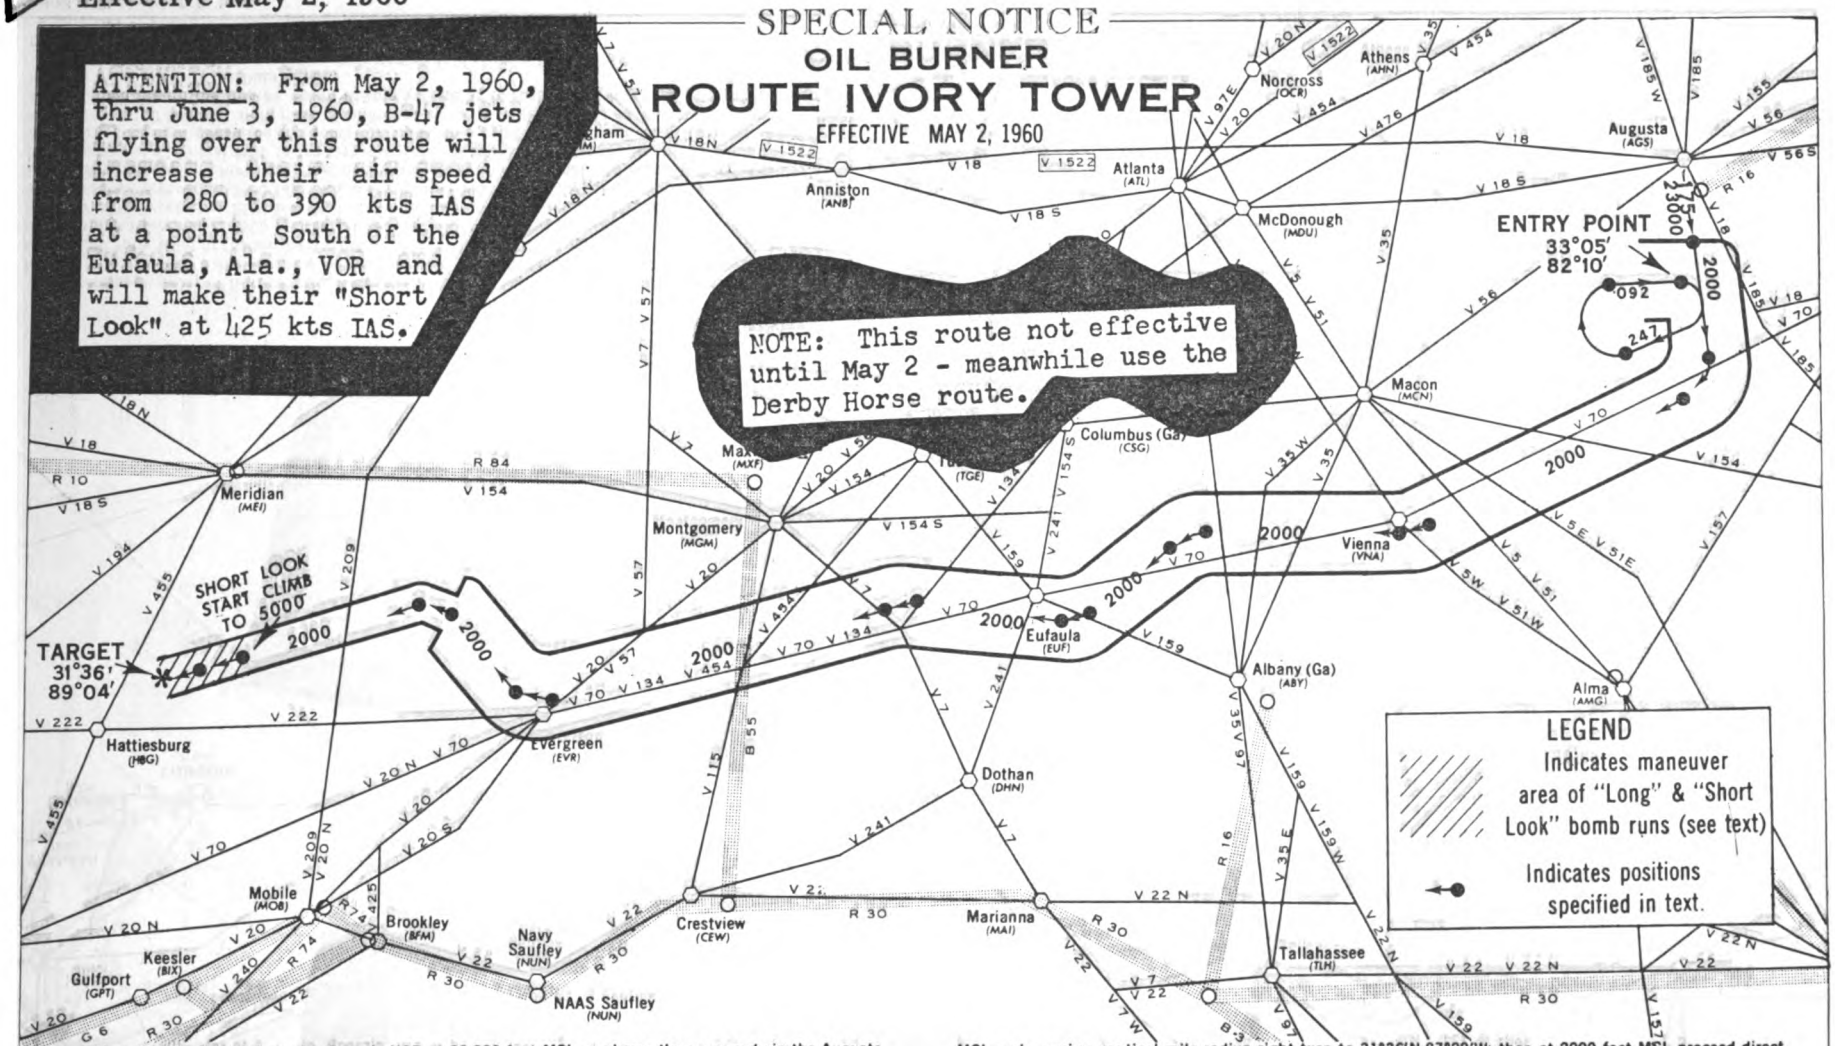
TARGET 46°56′ 100°39′

ENTRY POINT 42°11′ 99°35′

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11′N-99°35′W; then proceed at 4500 feet MSL to 43°44′N-99°45′W; then proceed at 4500 feet MSL to 44°38′N-99°05′W; then proceed at 3500 feet MSL to 45°18′N-99°51′W; then proceed at 3500 feet MSL to 46°30′N-99°18′W; then proceed at 3500 feet MSL to 46°56′N-99°18′W; then proceed at 3500 feet MSL to 47°03′N-99°30′W; then proceed at 3500 feet MSL to 46°59′N-100°17′W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57′N-100°31′W; then proceed at 6100 feet MSL to the target at 46°56′N-100°39′W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

Prepared at Washington, D. C., by the U. S. Coast and Geodetic Survey



(12 April 1960)

Effective May 2, 1960

SPECIAL NOTICE
OIL BURNER
ROUTE IVORY TOWER
EFFECTIVE MAY 2, 1960

ATTENTION: From May 2, 1960, thru June 3, 1960, B-47 jets flying over this route will increase their air speed from 280 to 390 kts IAS at a point South of the Eufaula, Ala., VOR and will make their "Short Look" at 425 kts IAS.

NOTE: This route not effective until May 2 - meanwhile use the Derby Horse route.

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 175° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°10'W, and at 2000 feet MSL, turn right to intercept the 175° radial of the Augusta VOR to 32°47'N-82°04'W. Aircraft will then make a nine nautical mile radius right turn to 32°37'N-82°12'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 0000Z to 1600Z Tuesday through Saturday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(12 April 1960)

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

Unless otherwise noted, all tracks will be flown at 360 knots true airspeed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated. NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Half-moon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

Edwards Air Force Base, California

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	34-32-00 34-52-30	119-23-00 119-49-35	From 8 miles NW of Meiners Oaks to 7 miles SW of New Cuyama in San Rafael Mts.
23	36-19-40 36-20-00	118-04-50 118-42-25	From about 3 miles W of Cartago to about 3.25 miles SSW of Calhoun Pk. in Sierra Nevada range
23B	36-10-00 36-29-00	118-12-00 118-40-00	From 4 miles NW of Craig Pk to 2 miles E of Paradise Pk. in Sierra, Nevada range.
32	34-03-00 33-58-30	120-30-00 119-54-25	From 3.5 miles W of San Miguel I to about 3.75 miles beyond Santa Rosa I.
44	33-15-45 32-45-25	118-21-15 118-20-20	9 miles S of Long Pt. light to 4 miles S of Pyramid Head light.
51	35-04-00 35-10-00	117-19-00 117-56-00	From California City to the western tip of Harpers Dry Lake.
63	35-40-45 36-08-50	119-43-10 119-57-20	3.5 miles from Lost Hills Kern Co. Airport to about 4 miles WNW of Westlake Farms Airport.

Gust Plus Maneuver Round-Robin Flight (Edwards AFB)

Leg. No.	Distance (Nautical Miles)	Maximum S Speed (KTAS)	Description from Sectional Chart
1.	50	340	From Edwards AFB to 10 miles NE of the Fillmore Omni.
2.	15	500	From 7 miles SW of the Oxnard Rdo Bcn to the eastern point of Santa Cruz Island
3.	43	420	From the eastern point of Santa Cruz Island to the western point of San Miguel I.
4.	20	500	From the western point of San Miguel Island to 15 miles SW of Gaviota Omni.
5.	50	500	From 15 miles NW of the Gaviota Omni to 6 miles W of the Belridge (pvt.) Airport, and
	40	360	From 6 miles W of the Belridge (pvt.) Airport, via a point 5 miles W of the Lost Hills Airport to 7 miles E of Avenal Airport,
6.	70	340	From 10 miles east of Porterville to 10 miles S of Bishop.
7.	51	420	From 10 miles S of Bishop to the center of Owens Lake.
8.	88	260	From the center of Owens Lake to the Edwards AFB.

60. Flight between legs will be conducted in accordance with the Civil Air Regulations, Part 60. During the low-level operations, all airports will be avoided by 3 miles or more.

(Continued)

Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

✓ DIRECT COMMUNICATIONS - ARTCC/PILOTS-"Monitor Procedures"-In lieu of standard "contact" procedures, ARTCC controllers may clear pilots to "monitor" the frequency of the adjacent sector within the same center. The time or point at which the frequency change is to be made will be specified in the clearance. A pilot receiving such a clearance is required by CAR 60.47 to continuously monitor the frequency he is on until the time or point to change to the newly assigned frequency. At the stated time or point, the pilot will change to the new frequency and continuously monitor the new frequency making only required reports. There being no reports required, the pilot need only acknowledge subsequent clearances. The clearance to "monitor" a specific frequency does not preclude the pilot from initiating a communications contact if the pilot is in doubt as to whether two-way communications capability exists, or if an additional clearance or other information is desired. The following phraseology has been authorized for this procedure:

"(Aircraft Identification) MONITOR (Name) CENTER ON (Frequency) (Time or point), OVER"

Example: "BEECHCRAFT TWO ONE BRAVO, MONITOR WASHINGTON CENTER ON ONE TWO FIVE POINT ONE AT ONE SIX THREE NINER, OVER"

The following table provides a plan by which pilots may determine the frequency they will be expected to use when the sector discrete frequency (Priority One) has been specified, either in "monitor" or "contact" procedures, and two-way communications capability does not exist on the sector discrete frequency specified.

ALTITUDES BELOW 24,000 feet MSL.

First Priority	Assigned Sector Discrete
Second Priority	Air Carriers - Company Radio General Aviation - FSS on 126.7/120.7 Military Aircraft - ARTCC on 301.4-FSS on 135.9/135.0
Third Priority	Air Carriers - FSS on 126.7 General Aviation - FSS on 272.7 or ARTCC on 3-1.4 Military Aircraft - FSS on 272.7; if unable 255.4

FLIGHT LEVEL 240 AND ABOVE.

First Priority	Assigned Sector Discrete
Second Priority	Air Carriers - Company Radio General Aviation - FSS on 126.7/120.7 Military Aircraft-ARTCC on UHF area discrete - FSS on 135.9/135.0
Third Priority	Air Carriers - FSS on 126.7 General Aviation - FSS on 126.7-122.1/122.2 or VOR Military Aircraft - FSS on 272.7 or ARTCC on 3-1.4

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

YORK, KENTUCKY VOR SHUT DOWN: During shutdown use the following:

Bruin	None	----

✓ CONELRAD DRILL: On May 3, 1960, a Conelrad drill will be conducted between 1800-1830Z of all AM, FM, and TV stations within the continental U.S. (excluding Alaska). Aid to navigation from these stations will be unreliable during this period. All regular navigational aids (i.e., LF, OMNI and TACAN) will operate normally.

✓ NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 comprises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

their flight plan. ... TACAN (or DME) Equipped" in the remarks section of

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 43-22-30N, 94-04-00W, (entry-call Mason City Radio), 43-28N, 91-00W, 42-21N, 90-54-30W; 40-25N, 92-07-30W; 40-22N, 92-31W(end nav. leg) to target 40-14N, 93-36W. Note: for a bomb run only, entry reporting will be 41-00N, 91-45W(call Ottumwa Radio); remainder of route is identical with above.

Route 2-K-1: Start at 31-00N, 95-04W (entry-call Lufkin Radio), 31-55N, 95-24; 31-52N, 97-23W; 32-02N, 98-24W; 32-53N, 98-40W; 34-51N, 98-55W;(end nav. leg), terminate operations over Chickasha, Okla. Note: for a bomb run only, entry reporting point will be 34-00 N, 98-48W (call-Wichita Falls Radio); remainder of route is identical with above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg), 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-Q-3: Entry point 35-18N, 88-00W (Entry reporting point -Jacks Creek Radio); 36-34N, 88-12W; 37-20N, 91-42W; 37-33N, 93-23W (end nav. leg); to target Joplin, Mo.

Route 2-R-2: Start at 35-38N, 99-11W; to start climb point 36-12N, 98-14W; to termination 36-45N, 98-11W. Entry reporting point- Sayre Radio.

Route 2-R-3: Start at 36-22N, 92-14W; to 36-26N, 93-50W. Entry reporting point-Springfield Radio.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 2-T-1: Entry point 33-19-30, 92-32-00; to termination point 32-39, 91-08.

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

HARTFORD, CONN. VOR SHUTDOWN: During shutdown use the following:

EXISTING AIRWAYS	SUBSTITUTE ROUTE STRUCTURE	MEA
V3: HFD VOR-Millbury VHF Int.	HFD/LMFR Amber 7 to Int Boston VOR 271° M radial	As published Amber 7, 4000 Westboro VHF Int.
HFD VOR-ILT VOR	HFD /LMFR Amber 7 to point of Int ILT VOR 072° M radial to ILT VOR	As published

Daley	TYS VOR 025° M radial TRI VOR 311° M radial	6,000
Westbourne	TYS VOR 351° M radial CSV VOR 045° M radial	7,000

IMPORTANT NOTICE - NEW FREQUENCY ASSIGNMENTS

Commensurate with FAA's efforts to improve the overall air traffic control communications system and to relieve congestion on the existing communications channels, an additional five megacycles of spectrum space is being made available to the aeronautical user effective July 1, 1960. In order to obtain maximum utilization of these additional radio frequencies, FAA is initiating a program of new frequency assignments within the band 118-135 MC/S at 0800 GMT on July 7, 1960.

This implementation invloves several hundred frequency changes throughout the United States, not including Alaska and Hawaii. To facilitate the users' transition to the new frequencies and to provide the greatest advance notice of the specific changes, we are presenting the following tabulation in terms of location, traffic control function, new frequency to be activated July 7, 1960, and existing frequency. Further, note also that many frequencies now assigned (shown in the "old frequency" column) have either been changed or will serve a different function.

LEGEND: H - High Altitude
I - Intermediate Altitude (Non-Radar Sector)
Ir - Intermediate Altitude (Radar Sector)
A - Center Area Discrete

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Station, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant SS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

The locations provided with the above services follows:

FOREIGN EXCHANGE Location	Number	FSS Providing Service
Charlotte, North Carolina	ED 2-7262	Hickory, North Carolina
Kerrville, Texas	CL 7-7295	Junction, Texas
Burbank, California	TH 6-0400	Los Angeles, California

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D.C. (Attention: W-200).

(This does not apply to hearing aids)

PREFERRED ROUTES

The following preferred routes were effective April 12, 1960. Generally, the route commences and terminates at fixes on or near the perimeter of the terminal area, unless the preferred route essentially overlies the airport and aircraft would normally be cleared directly on course. Terminal area charts should be consulted to determine the normal route between the airport and route starting/terminating fixes. At those locations where radar is utilized, the pilot may receive radar vectors to/from these fixes.

Official location identifiers are used in the route description for VOR's. L/MF facilities are identified by the identifier and type, e.g., HEM/LFR, SRI/RBN. Intersection names are spelled out. Where two facilities or an intersection and a facility follow in succession, the route is direct.

All preferred routes are listed alphabetically under the name of the departure metropolitan area. Where several airports are located within a metropolitan area and each airport requires a different preferred route, such listing is alphabetized in parentheses following the metropolitan area.

NOTE: This list will remain in effect until the next effective date which will be published approximately July 5, 1960. Revisions to this list will be published in intervening issues of the Airman's Guide through June 21, 1960.

FEDERAL AIRWAYS, CONTROL AREAS, CONTROL AREA EXTENSIONS, CONTROL ZONES, REPORTING POINTS, POSITIVE CONTROL ROUTE SEGMENTS AND JET ROUTES:

(Note: All bearings and radials are TRUE unless otherwise indicated.)

Effective 0001 EST 2 June 1960:

(1) Federal Airway: VOR 4 (Seattle, Wash., to Herndon, Va.) amended as follows: In the text, delete "Lexington, Ky., omnirng stn, including a S alternate and also a N alternate via the Int. of the Louisville omnirng 083° T and the Lexington omnirng 294° T radials;" and substitute therefor: "Lexington, Ky., VOR, including a N alternate via the Int. of the Louisville VORTAC 083° T and the Lexington VOR 294° T radials and also a S alternate via the Int. of the Louisville VORTAC 113° T and the Lexington VOR 251° T radials;".

(2) Federal Airway: VOR 94 (Hassayampa, Ariz., to Monroe, La.) amended as follows: (a) In the caption delete "(Hassayampa, Ariz., to Monroe, La.)." and substitute therefor "(Gila Bend, Ariz., to Hobbs, N. Mex., and Abilene, Tex., to Monroe, La.)." (b) In the text delete "From the Hassayampa, Ariz., VOR via the Gila Bend, Ariz., VOR; Casa Grande, Ariz., VOR;" and substitute therefor "From the Gila Bend, Ariz., VOR via the Casa Grande, Ariz., VOR;".

(3) Control Areas: VOR 94 (Hassayampa, Ariz., to Monroe, La.) amended as follows: In the caption delete "(Hassayampa, Ariz., to Monroe, La.)." and substitute therefor "(Gila Bend, Ariz., to Hobbs, N. Mex., and Abilene, Tex., to Monroe, La.)."

(4) Federal Airway: VOR 461 (Gila Bend, Ariz., to Buckeye, Ariz.) added to read: "From the Gila Bend, Ariz., VOR to the Buckeye, Ariz., VOR."

(5) VOR Control Area: VOR 461 (Gila Bend, Ariz., to Buckeye, Ariz.) is added to read: "All of VOR Federal airway No. 461."

(6) Control Area Extension: (Phoenix, Ariz.) amended as follows: In the text delete "on the S and W by VOR Federal airway No. 94;" and substitute therefor "on the S by VOR Federal airway No. 94, and on the W by VOR Federal airway No. 461;".

(7) Federal Airway: VOR 218 (Rochester, Minn., to Pontiac, Mich.) amended to read: "From the Rochester, Minn., VOR via the Waukon, Iowa VOR; Rewey, Wis., VOR; Rockford, Ill., VOR; Int. of Rockford, Ill., VOR 136°T and the Naperville VOR 290°T radials; Naperville, Ill., VOR; Keeler, Mich., VOR; Lansing, Mich., VOR; to the Int. of the Lansing VOR 091°T and the Flint, Mich., VOR 140° T radials."

(8) Control Areas: VOR 218 (Rochester, Minn., to Pontiac, Mich.) amended to read: "All of VOR Federal airway No. 218."

(9) Reporting Points: VOR domestic reporting points amended to read: "In the text add: Rewey, Wis., VOR and Waukon, Iowa, VOR."

(10) Three-mile radius zones amended as follows: In the text add: Concord, Calif.: Buchanan Field (lat 37-59-20N, long. 122-03-20W).

(11) Control Area Extension: (Promontory Point, Utah) amended to read: "That airspace S of Promontory Point bounded on the N by VOR Federal airway No. 6, on the E by VOR Federal airway No. 21, on the S by VOR Federal airway No. 32, and on the W by a line extending from lat 40-51-30N, long. 112-56-30W, to 41-00N, 112-56-30W, to 41-00-00N, 112-45-00W, to 41-12-25N, 112-45-00W; and that airspace N of Promontory Point bounded on the N by VOR Federal airway No. 288, on the E by VOR Federal airway No. 257 and on the S by VOR Federal airway No. 6."

(12) Federal Airway: VOR 131 (McAlester, Okla., to Chanute, Kans., and Emporia, Kans., to Topeka, Kans.) amended to read: "From the McAlester, Okla., VORTAC via the Okmulgee, Okla., VOR; Tulsa, Okla., VORTAC; to the Chanute, Kans., VOR. From the Emporia, Kans., VORTAC to the Topeka, Kans., VOR."

(13) Control Areas: VOR 131 (McAlester, Okla., to Chanute, Kans., and Emporia, Kans., to Topeka, Kans.) amended to read: "All of VOR Federal airway No. 131."

(14) Federal Airway: VOR 3 (Key West, Fla., to Presque Isle, Maine) amended as follows: In the text delete "Int. of the Florence VOR 008° and the Raleigh VOR 220° radials; and substitute therefor "Pinehurst, N. C., VOR;"

(15) Federal Airway: VOR 39 (South Boston, Va., to Presque Isle, Maine) amended as follows: (a) In the caption delete "(South Boston, Va., to Presque Isle, Maine." and substitute therefor "(Pinehurst, N. C., to Presque Isle, Maine.)." (b) In the text delete "From the South Boston, Va., VOR via the Gordonsville, Va., VOR;" and substitute therefor "From the Pinehurst, N. C., VOR via the South Boston, Va., VOR; Gordonsville, Va., VOR;".

(16) Control Areas: VOR 39 (South Boston, Va., to Presque Isle, Maine) amended as follows: In the caption delete "(South Boston, Va., to Presque Isle, Maine.)." and substitute therefor "(Pinehurst, N. C., to Presque Isle, Maine.)".

(17) Federal Airway: VOR 155 (Augusta, Ga., to Washington, D. C.) amended as follows: In the text delete "point of Int. of the Raleigh VOR 220° and the Florence, S. C., VOR 008° radials;" and substitute therefor "Pinehurst, N. C., VOR;".

(18) Reporting Points: VOR domestic reporting points amended as follows: In the text delete "Pinehurst Int.: The Int. of the Raleigh, N. C., omnirng 220°T and the Florence, S. C., omnirng 008°T radials."

(19) Federal Airway: VOR 230 (Salinas, Calif., to Fresno, Calif.) amended to read: "From the Salinas, Calif., VOR via the Los Banos, Calif., VOR; Int. of the Los Banos 086°T and the Fresno, Calif., VOR 258°T radials; to the Fresno VOR."

(20) Federal Airway: VOR 25 (San Diego, Calif., to Ellensburg, Wash.) amended as follows: In the text delete "Int of the Red Bluff omnirng 018° T and the Klamath Falls omnirng 181°T radials;" and substitute therefor "Int of the Red Bluff VORTAC 015° T and the Klamath Falls VORTAC 181°T radials;".

(21) Federal Airway: VOR 122(Crescent City, Calif., to Klamath Falls, Oreg.) amended as follows: (a) In the caption delete "(Crescent City, Calif., to Klamath Falls, Oreg.)" and substitute therefor "(Crescent City, Calif., to Lakeview, Oreg.)". (b) In the text delete "From the point of Int. of the Medford, Oreg., omnirng 176° T and the Klamath Falls, Oreg., omnirng 273°T radials; to the Klamath Falls, Oreg., omnirng stn." and substitute therefor "From the Int. of the Medford, Oreg., VOR 176°T and the Klamath Falls VORTAC 268°T radials via the Klamath Falls, Oreg., VORTAC; to the Lakeview, Oreg., VOR."

(22) Control Areas: VOR 122 (Crescent City, Calif., to Klamath Falls, Oreg., VOR) amended as follows: In the caption delete "(Crescent City, Calif., to Lakeview, Oreg.)".

(23) Federal Airway: VOR 222 (El Paso, Tex., to Evergreen, Ala., and Norcross, Ga., to Gordonsville, Va.) amended as follows: In the text delete "From the Norcross, Ga., VOR via the Int. of the Norcross VOR 014° and the Toccoa VOR 233° radials;" and substitute therefor "From the Norcross, Ga., VOR via the Int. of the Norcross VOR 026° T and the Toccoa VOR 230°T radials;".

(24) Federal Airway: VOR 157 (Key West, Fla., to Florence, S. C., and Wilmington, N. C., to Washington, D. C.) amended as follows: In the text delete "to the Washington, D. C. TVOR." and substitute therefor "to the Washington, D. C. VOR including a W alternate from the Richmond VOR to the Washington VOR via the Int. of the Richmond VOR 348°T and the Brooke VORTAC 187°T radials, Brooke, Va., VORTAC, Int. of the Brooke VORTAC 045°T and the Washington VOR 189°T radials.".

(25) Control Areas: VOR 157 (Key West, Fla., to Florence, S. C., and Wilmington, N. C., to Washington, D. C.) amended as follows: In the text delete "west alternate." and substitute therefor "west alternates."

(26) Federal Airway: VOR 295 (Miami, Fla., to Cross City, Fla.) amended as follows: In the text delete "Orlando, Fla., omnirng stn;" and substitute therefor "Orlando, Fla., VOR, including an E alternate from the Vero Beach VOR to the Orlando VOR via the Int. of the Vero Beach VOR 342° T and the Orlando VOR 099°T radials;".

(27) Control Areas: VOR 295 (Miami, Fla., to Cross City, Fla.) amended to read: "All of VOR Federal airway No. 295 including an E alternate."

(28) Federal Airway: VOR 16 (Los Angeles, Calif., to Boston, Mass.) amended as follows: In the text delete "including a S alternate via the Int. of the Mineral Wells VOR 094° and the Dallas VOR 233° radials;" and substitute therefor "including a S alternate via the Int. of the Mineral Wells VORTAC 094° T and the Dallas VORTAC 229°T radials;".

(29) Control Zone: (Columbus, Ohio)amended to read: "Within a 5-mi radius of the geographical center of the Port Columbus Airport (lat 39-59-34N, long. 82-52-50W) and within a 5-mi radius of the Lockbourne, Ohio, AFB (lat 39-48-51N, long. 82-55-56W.) including the airspace within 2 mi either side of a direct line extending from the Columbus RR to the Lockbourne AFB, within 2 miles either side of the Port Columbus ILS lclzr E course extending from the Port Columbus Airport 5-mi radius zone to the Port Columbus ILS OM, and within 2 mi either side of the Lockbourne AFB ILS lclzr NE crs from the Lockbourne AFB 5-mi radius zone to the Lockbourne AFB ILS OM."

(30) Control Area Extension: (El Paso, Tex.) amended to read: "That airspace within 5 mi either side of the 008°, 165° and 302° T radials, of the El Paso, Tex., VOR, extending from the VOR to points 21 mi N, 20 mi SE and 37 mi NW, including the area bounded on the N by lat 32-00-00N, on the E and S by VOR Federal airway No. 280 and on the W by a line 5 mi E of and parallel to the 008° T radial of the El Paso VOR and excluding those portions which would overlie Restricted Areas R-209, 210 and 211 and that portion outside the United States."

(31) Control Area Extension (Charleston, W. Va.) amended to read: "Within a 35 mi radius of the Kanawha County Airport, Charleston, W. Va.(lat 38-22-21.5N, long. 81-35-34.6W), including the airspace W and NW of the Kanasha County Airport, bounded on the E by VOR Federal airway No. 133, on the S by VOR Federal airway No. 4, and on the NW by VOR Federal airways No. 45 and No. 44."

(32) VOR/VORTAC Jet Route: VOR/VORTAC Jet Route No. 10 (Los Angeles, Calif., to New York, N. Y.) is revoked.

(33) VOR/VORTAC Jet Route: VOR/VORTAC Jet Route No. 36 (Fargo, N. Dak., to Peck, Mich.) amended to read: "From the Fargo, N. Dak., VORTAC via the Minneapolis, Minn., VOR; Nodine, Minn., VOR; Milwaukee, Wis., VOR; the Int. of the Milwaukee VOR 088°T and the Peck VOR 269°T radials; to the Peck, Mich., VOR."

(34) VOR/VORTAC Jet Route: VOR/VORTAC Jet Route No. 38 (Duluth, Minn., to Peck, Mich., and Philipsburg, Pa., to New York, N. Y.) amended to read: "From the Duluth, Minn., VOR via the Green Bay, Wis., VORTAC to the Peck, Mich., VOR. From the Philipsburg, Pa., VORTAC via the Allentown, Pa., VOR to the New York, N. Y. (Idlewild), VORTAC."

(35) VOR/VORTAC Jet Route: VOR/VORTAC Jet Route No. 39 (Crestview. Fla., to Dayton, Ohio) amended to read: "From the Crestview, Fla., VOR via the Montgomery, Ala. VORTAC; Birmingham, Ala., VORTAC; Int. of the Birmingham VORTAC 360°T and the Nashville, Tenn., VORTAC 191° T radials; Nashville, Tenn., VORTAC; Louisville, Ky., VORTAC; to the Dayton, Ohio VORTAC."

(36) Federal Airway: VOR 241 (Crestview, Fla., to Atlanta, Ga.)amended as follows: In the text delete "Int. of the Columbus omnirng 018° and the Atlanta omnirng 233° radials; to the Atlanta, Ga., omnirng stn.", and substitute therefor "to the Atlanta, Ga., VORTAC, including a W alternate via the Int. of the Columbus VOR 011°T and the Atlanta VORTAC 233°T radials."

(37) Control Areas: VOR 241 (Crestview, Fla., to Atlanta, Ga.) amended to read: "All of VOR Federal airway No. 241 including a W alternate.

(38) VOR/VORTAC Jet Route: VOR/VORTAC Jet Route No. 2 (San Diego, Calif., to Jacksonville, Fla.) amended as follows: In the text delete "Int. New Orleans 078° and Mobile, Ala., 224° radials;" and substitute therefor "Int. of the New Orleans, La., VOR 071°T and the Crestview, Fla., VOR 259° T radials".

Effective 0001 EST 6 April 1960:

(1) Federal Airway: VOR 41 (Pittsburgh, Pa., to Youngstown, Ohio) amended as follows: In the text delete "The portion of this airway which lies within the geographic limits of, and between the designated altitudes of, the Youngstown, Ohio, (Youngstown Mun. Arpt.) Restricted Area/Military Climb Corridor (R-541) is excluded during its time of designation."

(2) Federal Airway: VOR 276 (Navarre, Ohio to Monmouth, N.J.) amended as follows: In the text delete "The portion of this airway which lies within the geographic limits of, and between the designated altitudes of, the Youngstown, Ohio (Youngstown Mun. Arpt.) Restricted Area/Military Climb Corridor (R-541) is excluded during its time of designation."

(3) Federal Airway: Blue 15 (Akron, Ohio to Hubbard, Ohio) amended as follows: In the text delete "The portions of this airway which lie within the geographic limits of, and between the designated altitudes of, the Youngstown, Ohio (Youngstown Mun. Arpt.) Restricted Area/Military Climb Corridor (R-541) are excluded during the restricted area's time of designation."

(4) Control Area Extension: (Youngstown, Ohio) amended as follows: In the text delete "The portions of this control area extension which lie within the Youngstown, Ohio, (Youngstown Mun. Arpt.) Restricted Area/Military Climb Corridor (R-541) shall be used only after obtaining prior approval from the controlling agency."

✓ **RESTRICTED AREA AMENDMENTS:** The following Restricted Area Amendments shall become effective as indicated:

Effective 30 March 1960:

(Part 608 - Amendment 85)

(1) In Section 608.24, the Manhattan, Kans., Restricted Area (R-197) is amended by deleting "Surface to 30,000' MSL" and substituting therefor "Surface to 29,000' MSL."

Effective 6 April 1960:

(Part 608 - Amendment 90)

(1) In Section 608.43, the Youngstown, Ohio, (Youngstown Mun. Airport) Restricted Area/Military Climb Corridor (R-541) is revoked.

✓ **AIRMAN'S GUIDE CORRECTIONS:** Correct Airman's Guide Volume 14, Number 25 dated 16 February 1960, as follows:

(1) Page 70 under Federal Airways item (1) change effective date to read: 0001 EST, 30 June 1960.

Correct Airman's Guide Volume 15, Number 1 dated 15 March 1960 as follows: On-Request Reporting Points - designated effective 7 April 1960:
(1) Page 73 change item (30)to read: HAMLET, NEBRASKA, and (2) change item (52) to read: PERKINS, ARIZ(VHF) INT: 067° M rad Drake, Ariz. VOR.....

✓ **MEA CHANGES:** Effective 5 May 1960, the following MEAs are established: V-207, from Denver, Colo. VOR to Gill, Colo. VOR 7000'; Gill VOR to Pine Bluff Int., Colo. 7500'; Pine Bluff Int. to Scottsbluff, Nebr. VOR 7000'.

✓ **ON REQUEST REPORTING POINTS:** The following on-request reporting points have been established, modified, cancelled or renamed as indicated effective 5 May 1960:

ESTABLISHED:

(1) YORK SPRINGS, PA(VHF) INT: 204 M rad Harrisburg, Pa. VOR; 270 M rad Lancaster, Pa. VOR.
(2) BROWNSVILLE, PA(VHF) INT: 279 M rad Indian Head, Pa. VOR; 174 M rad Pittsburgh, Pa. VOR.
(3) CARPENTER, COLO(VHF) INT: 117 M rad Cheyenne, Wyo. VOR; 349 M rad Gill, Colo. VOR.
(4) BUFORD, WYO(VHF) INT: 238 M rad Cheyenne, Wyo. VOR; 119 M rad Laramie, Wyo. VOR.
(5) PINE BLUFF, WYO(VHF) INT: 081 M rad Cheyenne, Wyo. VOR; 016 M rad Gill, Colo. VOR.
(6) LOYAL, WIS(VHF) INT: 103 M rad Eau Claire, Wis. VOR; 256 M rad Wausau, Wis. VOR.
(7) FELT, OKLA(VHF) INT: 056 M rad Clayton, N. Mex. VOR; 312 M rad Dalhart, Tex. VOR.
(8) SABLE, FLA(LF) INT: SW crs. Perrine, Fla. LFR; 007 M brg from Marathon, Fla. Rbn. (Formerly compulsory reporting point.)
(9) SKIDMORE, TEX(VHF) INT: 312 M rad Corpus Christi, Tex. VOR; 011 M rad Alice, Tex. VOR.
(10) McAFEE, KY(VHF) INT: 112 M rad Louisville, Ky. VOR; 251 M rad Lexington, Ky. VOR.
(11) STATESVILLE, TENN(VHF) INT: 099 M rad Nashville, Tenn. VOR; 164 M rad Bowling Green, Ky. VOR.
(12) MEDFORD, ME(VHF) INT: 019 M rad Bangor, Me. VOR; 236 M rad Millinocket, Me. VOR.
(13) BROOKVILLE, PA(LF) INT: W crs. Philipsburg, Pa. LFR; 065 M brng to DuBois, Pa. Rbn.
(14) ROCKTON, PA(LF) INT: W crs. Philipsburg, Pa. LFR; 335 M brng to DuBois, Pa. Rbn.
(15) SAN JACINTO, TEX(VHF) INT: NE crs. Houston, Tex. ILS lclzr; 344 M rad Galveston, Tex. VOR. (This is in addition to the presently established San Jacinto Int.)
(16) WADSWORTH, NEV(LF) INT: NW crs. Fallon, Nev. LFR; NE crs. Reno, Nev. LFR.
(17) TAMPICO, TENN(VHF) INT: 150 M rad London, Ky. VOR; 050 M rad Knoxville, Ky. VOR.

MODIFIED:

(1) CLEARVILLE, PA(VHF) INT: 280 M rad St. Thomas, Pa. VOR; 146 M rad Johnstown, Pa. VOR.
(2)BUSHNELL, COLO(VHF) INT: 279 M rad Sidney, Neb. VOR; 198 M rad Scottsbluff, Neb. VOR.
(3) NUNN, COLO(VHF) INT: 345 M rad Denver, Colo. VOR; 300 M rad Gill, Colo. VOR.
(4) LOVELAND, COLO(VHF) INT: 320 M rad Denver, Colo. VOR; 251 M rad Gill, Colo. VOR.
(5) HUDSON, COLO(VHF) INT: 259 M rad Akron, Colo. VOR; 360 M rad Denver, Colo. VOR.
(6) EGBERT, WYO(VHF) INT: 081 M rad Cheyenne, Wyo. VOR; 205 M rad Scottsbluff, Neb. VOR.
(7) ST CROIX, ME(VHF) INT: 216 M rad Presque Isle, Me. VOR; 328 M rad Houlton, Me. VOR.
(8) EMPIRE, COLO(VHF) INT: 096 M rad Kremmling, Colo. VOR; 214 M rad Gill, Colo. VOR.
(9) CHINESE CAMP, CALIF(VHF) INT: 068 M rad Stockton, Calif. VOR; 094 M rad Linden, Calif. VOR.
(10) JACKSON LAKE, GA(VHF) INT: 087 M rad McDonough, Ga. VOR; 149 M rad Norcross, Ga. VOR.
(11) VINCENT, LA(VHF) INT: 109 M rad Baton Rouge, La. VOR; 252 M rad Picayune, Miss. VOR.
(12) MT HOLLY, PA(VHF) INT: 249 M rad Robbinsville, N.J. VOR; 182 M rad Yardley, Pa. VOR.
(13) PACIFIC, CALIF(VHF) INT: 305 M rad San Diego, (SAN), Calif. VOR; 265 M rad Oceanside, Calif. VOR. (Changeover Point- 48 nmi SE LAX).

CANCELLED:

(1) COUNTY, OHIO(VHF) INT.
(2) WEST POINT, N Y(VHF) INT
(3) TARENTUM, PA(VHF) INT.
(4) ROCHELLE, VA(VHF) INT.
(5) PLACERVILLE, CALIF(VHF) INT.
(6) BURR OAK, MICH(LF) INT.
(7) HASTINGS, MICH(LF) INT.
(8) KINGWOOD, PA(VHF) INT.
(9) HEREFORD, COLO(VHF) INT.
(10) CARR, COLO(VHF) INT.
(11) GILL, COLO(VHF) INT.
(12) SAUSALITO, CALIF(VHF) INT.
(13) CASSODAY, KANS(LF) INT.
(14) TIDEWATER, FLA(LF) INT.
(15) PURGATOIRE RIVER, COLO(VHF)INT.
(16) McGUIRE, OKLA(VHF) INT.
(17) JOLLY, TEX(VHF) INT.
(18) FREEHOLD, N J(LF) INT.

(12 April 1960)

(19) MORRESBURG, TENN(VHF) INT. (20) YUMA, VA(VHF) INT. (21) WITT, TENN(VHF) INT.

RENAMED:

(1) CORAL, FLA(LF) INT: 030 M brng from Key West, Fla. LFR; 313 M brng from Marathon, Fla. Rbn. (Formerly Narl Int.)

HOLDING PATTERNS: The following holding patterns have been established, modified or cancelled as indicated effective 5 May 1960:

ESTABLISHED:

(1) DALTON, OHIO(VHF) INT: direction of holding - W on 281 M rad Navarre, Ohio VOR; direction of turns - right; time - 1 min; MHA - 2500'.

(2) EMPORIA, VA(VHF) INT: direction of holding - SW on 205 M rad Hopewell, Va. VOR; direction of turns - right; time - 1 min; MHA - 2000'.

(3) COUNTY, OHIO(VHF) INT: direction of holding - E on 284 M rad Chardon, Ohio VOR; direction of turns - right; time - 1 min; MHA - 2500'.

(4) DALHART, TEX VOR: direction of holding - N on 350 M rad; direction of turns-right; time - 1 min; MHA - 5200'.

(5) DALHART, TEX RBN: direction of holding - SE on 120 M brng from Rbn; direction of turns - right; time - 1 min; MHA -5200'.

(6) STATESVILLE, TENN(VHF) INT: direction of holding - E on 099 M rad Nashville, Tenn. VOR; direction of turns-right; time - 1 min; MHA - 3000'.

(7) ESLER, LA RBN: direction of holding - NE on 030 M brg from Rbn; direction of turns; right; time - 2 mins; MHA - 1500'.

(8) SAN JACINTO, TEX(VHF) INT: direction of holding - NE on NE crs. Houston, Tex. ILS lclzr; direction of turns - right; time - 2 mins; MHA - 1600'. (This is in addition to the presently established holding pattern.)

(9) TAMPICO, TENN(VHF) INT: direction of holding -NE on 050 M rad Knoxville, Tenn. VOR; direction of turns-right; time - 2 mins; MHA - 4000'.

MODIFIED:

(1) ROCHELLE, VA(VHF) INT: direction of holding - NE on 239 M rad Casanova, Va. VOR; direction of turns-left; time - 1 min; MHA - 4000'.

(2) POPE, N C RBN: direction of holding - NE on 228 M inbnd brng; direction of turns-right; time - 2 mins; MHA - 2000'.

(3) POPE N C VOR: direction of holding - NE on 048 M rad; direction of turns-left; time-2 mins; MHA - 2000'.

(4) TEMPLE, GA(VHF) INT: direction of holding - W on W crs Atlanta, Ga. ILS lclzr; direction of turns-right; time - 1 min; MHA - 2700'.

(5) JACKSON LAKE, GA(VHF) INT: direction of holding - E on 087 M rad McDonough, Ga. VOR; direction of turns-right; time - 1 min; MHA - 3000'.

(6) BRITTON, TEX VOR: direction of holding - SW on 200 M rad; direction of turns-right; time - 1 min; MHA - 2600'.

(7) JOSHUA, TEX(VHF) INT: direction of holding - E on 255 M rad Britton, Tex. VOR; direction of turns-left; time - 1 min; MHA - 2000'.

(8) ATLANTA, GA VOR: direction of holding - W on 265 M rad; direction of turns-right; time - 1 min; MHA - 2300'.

(9) LORAINE, TEX(VHF) INT: MHA - 5800'.

(10) WEBB, TEX(VHF) INT: MHA - 5000'.

CANCELLED:

(1) CATOMA, ALA(VHF) INT: direction of holding - E on E crs. Dannelly, Ala. ILS lclzr; direction of turns-right; time - 1 min; MHA - 2000'.

(2) MONTGOMERY, ALA VOR: direction of holding - SE on 138 M rad; direction of turns-right; time - 1 min; MHA - 1700'.

(3) KENT, ALA(VHF) INT: direction of holding - NE on 046 M rad Montgomery, Ala. VOR; direction of turns-right; time - 2 mins; MHA - 2000'.

(4) CENTRAL, ALA(VHF) INT: direction of holding - NE on 025 M rad Montgomery, Ala. VOR; direction of turns-right; time - 2 mins; MHA - 1700'.

(5) FORT DAVIS, ALA(VHF) INT: direction of holding - E on 085 M rad Montgomery, Ala. VOR; direction of turns-right; time - 2 mins; MHA - 2000'.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about 1 month, making former prints obsolete for aviation use. Keep orders to a minimum until new edition is printed.

Albuquerque	Los Angeles	Brownsville Local
Austin	Phoenix	WAC 64
Corpus Christi	Prescott	WAC 135
Dallas	Roswell	WAC 192
Douglas	San Diego	WAC 304
El Paso	San Francisco	WAC 364
		WAC 470

NEW EDITIONS

A new edition or new chart for the charts listed below is now available. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

Standard Aeronautical Charts - dates shown are release dates.

Charlotte	4-4-60	WAC 62	3-23-60	WAC 468	4-4-60
Jacksonville	4-4-60	WAC 309	3-22-60	JN 45	4-4-60

Instrument Approach Procedure Charts and Radio Facility Charts released since 21 March 1960

AL 125 ADF/ILS R9 — Duluth Airport, Minnesota
AL 134 RNG/ADF/ILS R22/VOR/VOR/DME — El Paso International Airport, Texas
AL 163 RNG/VOR — Gage Airport, Oklahoma
AL 202 RNG/VOR — Howes Airport, South Dakota

RF/L/MF Terminal Area - Detroit, Philadelphia
RF/VOR Terminal Area - Chicago, Detroit, Philadelphia

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

GBG	Galesburg, Ill., Galesburg Airport (Identifier change from 3GB)
TAY	Taylor, Fla. (Identifier change from 2TY)
XAI	Annette Island, Alaska, Test VOR (Assignment)
XHB	Hinchinbrook Island, Alaska, Test VOR (Assignment)
XNM	Nome, Alaska, Test VOR (Assignment)
XMG	McGrath, Alaska, Test VOR (Assignment)
2CR	El Paso, Tex., Westside Airport (Name change from Cristo Rey Airport)
2JN	Jane, Ala., Intersection (Assignment)

✓ CHART CORRECTIONS: World Aeronautical Chart 363, 29th edition, dated 8/21/59, realign VOR Airways 105 and 135 to follow the 126° radial from the Beatty VOR, and change bearing figure from 120° to 126°.

✓ ATLANTA/JACKSONVILLE/NEW ORLEANS ARTCC BOUNDARIES: Effective 5 May 1960 the Atlanta/Jacksonville/New Orleans ARTCC boundaries are amended as follows: (1) ATL-JAX boundary-SW and W along southern bndry of V-70 to 31-37N, 86-24W, to 31-30N, 86-24W. (a) ATL-NEW boundary- from 31-30N, 86-24W, to 31-30N, 86-36W to 31-45N, 86-45W to 31-45N, 87-30W. (3) NEW-JAX- from 31-30N, 86-24W to 30-58N, 86-25W.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Volume 13 dated December 1959, as follows:

Radiated Test Signals:
(1) Page 15 add, *St Louis, Missouri (Lambert 111.0 mc).

VOR Receiver Check Points:
(1) Page 15, Bakersfield, California (Meadows Fld)-change to: 127°; over runway 30 at altitude of 1200'..

FAA and WB telephone numbers:
(1) Page 37, Crestview, Florida - change FAA telephone number to: MUrray 2-2305.
(2) Page 37, Marianna, Florida - change FAA telephone number to: HU 2-2300.
(3) Page 38, Greenwood, Mississippi - change WB telephone number to: GL 3-2631.
(4) Page 38, Springfield, Missouri - change FAA telephone number to: UN 2-3588.
(5) Page 39, Dickinson, North Dakota - change FAA telephone number to: 22-4-2989.
(6) Page 40, Junction, Texas - change FAA telephone number to: HI 6-2561.

FAA VHF/DF Stations:
(1) Page 44, add Crestview, Florida

Standard Broadcast Stations:
(1) Page 95, La Junta, Colorado KBNZ - change call letters to: KBZZ and coordinance to: 37-59-29, 103-34-38.
(2) Page 101, Silver City, New Mexico KSIL- add elevation: 6156'.
(3) Page 101, Clovis, New Mexico KICA - change call letters to: KVER.
(4) Page 103, Fargo, North Dakota WDAY- change elevation to: 1173'.
(5) Page 104, Chester, Pennsylvania WDRF - change call letters to: WEEZ.
(6) Page 106, Corpus Christi, Texas KATR - change call letters to KCTA.
(7) Page 106, Galveston, Texas KGBC - change location to: 1.9 nmi NNW lat 29-18-51, long. 94-48-16 and elevation to: 223'.

Index of Restricted Areas:
(1) Page 110, delete R-423 Esler Field, La and add R-431 Camp Claiborne, Alex, La.

Flight Test Areas:
(1) Page 119 add (1) Farmingdale, N. Y. -Republic Airport; (2) Bethpage, N. Y. -Grumman-Bethpage Airport; and (3) Calverton, N. Y. -Grumman-Peconic Airport - See this issue of Airgi page
(2) Page 121 add Morton, Texas-Cochran County Airport - See this issue of Airgi page

ATC Procedures:
(1) Pages 74, 75 and 83 - See this issue of Airgi page

RADOME MOUNTED GLIDE PATH ANTENNAS: Simultaneous operation of airborne radar and glide path receiver produces deflection of the glide path crosspointer, resulting in a glide path indication which is difficult or impossible to fly. Until compatible mounting and use is perfected, pilots are cautioned to turn the weather radar to "standby" or "off" when conducting an approach utilizing the glide path portion of the Instrument Landing System.

✓ MEA CHANGES: Effective immediately the MEA on V-9W from Raymond Int., Miss. to Jackson, Miss. VOR is 2900'.

✓ MEA CORRECTIONS: Correct MEA Amdt. 59, effective 5 May 60: V-25E from Triton Int., Calif., to Pacific Int., Calif., should read 3000' instead of 2500'.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

NOTE: Please destroy copy of Reno, Nevada Proc. No. ILS-16, Amdt. 1, Effect. 1 Jan. 60, issued with Transmittal Letters No. 60-11, dated 17 March 60.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots
Wright-Patterson LFR	LOM	Direct	3000	T-dn	300-1	300-1	200-½

AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 1200 Z on the above date. For later information consult Teletype NOTAMS.

NOTAMS page 3

Special Notices page 25

IMPORTANT NOTICE: Nation-wide changes in FAA's ATC communications July 7. See p. 53

FEDERAL AVIATION AGENCY

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction

G - Guards

CIVIL USE OF MILITARY FIELDS: U.S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D.C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual, Volume 13, dated December 1959.

Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

REMEMBER!

VFR CRUISING ALTITUDES ARE ODD THOUSANDS PLUS 500 FEET BETWEEN 0° AND 179° MAGNETIC: EVEN THOUSANDS PLUS 500 FEET BETWEEN 180° AND 359° MAGNETIC. CAR 60.32 (a)

WASHINGTON, D.C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D.C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570.49"-No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

PENETRATION OF RESTRICTED AREAS: Unauthorized flight is not permitted within a Restricted Area during the time of use and between the altitudes noted in the tabulation on the back of Sectional Aeronautical Charts issued by the U.S. Coast and Geodetic Survey or in the Flight Information Manual. Application for flight authorization should be made to the controlling agency.

"SHUT DOWN" OR "UNUSABLE" NAVIGATIONAL FACILITIES: Navigational Facilities which are notamed as being "shut down," or radials of a VOR notamed as "unusable" should not be utilized for navigational purposes. Pilots planning IFR flights should check all available information during pre-flight planning to ensure their proposed flight plan will not require use of facilities during the period of "shut down," as Air Traffic Control will be unable to approve such flight plans. During periods of prolonged "shut down, "revised MEA's and/or alternate routes are established for designated airways, utilizing adjacent facilities. This information is contained in appropriate NOTAMS and the Airman's Guide.

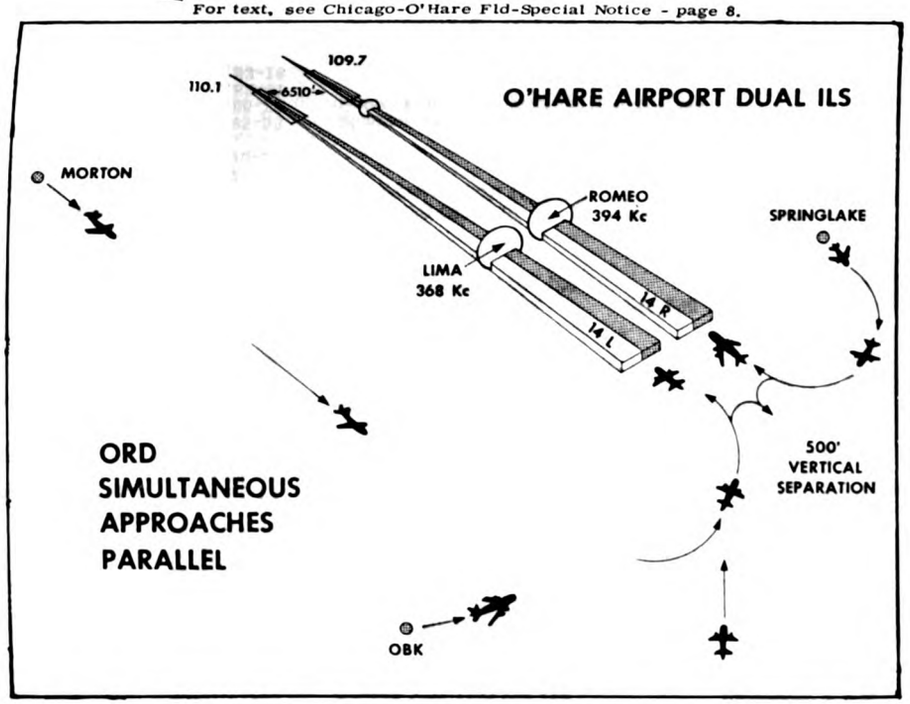
TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L/MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Chicago, (Joliet), Ill.	350 kc, 257 kc
Indianapolis, Ind.	266 kc
Los Angeles, Calif.	332 kc
New York, N.Y.	209 kc
Washington, D.C.	332 kc
Boston, Mass.	382 kc
Cleveland, Ohio	344 kc
Denver, Colo.	379 kc
Fort Worth, Texas	365 kc
Pittsburgh, Penna.	254 kc
Boise, Idaho	359 kc
Cincinnati, Ohio	335 kc
Wichita, Kansas	332 kc
Milwaukee, Wisconsin	242 kc

*Operating on test basis.



INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D.C. (Attention: W-200).

(This does not apply to hearing aids)

For text, see Chicago-O'Hare Fld-Special Notice - page 8.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is May 8, 1960.

B-66 GUST SURVEY PROGRAM: Beginning on or after February 25, 1960, and terminating on or before June 30, 1960, the Douglas Aircraft Company will conduct an aircraft structural survey program. Flight operations will be conducted in a B-66 type aircraft, with USAF identification markings, at altitudes of 200, 600 and 1,000 feet above the surface, during daylight hours only and when the visibility is 5 miles or greater and the ceiling is 3,000 feet or greater.

Unless otherwise noted, all tracks will be flown at 360 knots true airspeed or less and will be approximately 30 nautical miles in length. FAA Flight Service Stations, within whose advisory service area a "gust survey" track exists will, prior to each flight, broadcast information that "B-66 Gust Survey" operations are in progress and the specific tracks to be flown will be enumerated. NOTAM's specifying date, time, place and duration of the operations will be disseminated.

During any special flight activities which require preoccupation by the pilot with cockpit duties that would prevent adequate vigilance outside the cockpit, competent observers in the aircraft, a chase aircraft or other equivalent arrangement will be provided and maintained to insure adequate vigilance for other aircraft.

Tracks to be flown by base of operations are listed below:

Kirtland Air Force Base, New Mexico

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11A	32-51-05 33-19-25	105-35-00 105-47-15	3 miles from Sacramento Lookout Sta. to 3.25 miles from Sierra Blanca Pk. (12003').
11B	32-54-00 33-20-00	105-51-00 105-38-00	Rotated 49° clockwise with respect to Track 11A.
22A	38-00-00 38-22-00	106-44-00 106-17-45	7 miles from 13725' Pk. near Half-moon Pass to 4.5 miles from Ouray Pk. (13955)
22B	37-56-00 38-21-00	106-22-00 106-43-00	Rotated 102° clockwise with respect to Track 22A.
52	36-40-00 36-10-05	108-40-35 108-35-50	6 miles from Shiprock Airport to about 5.5 miles ENE of Sheep Springs.
62	37-31-35 38-00-00	105-53-50 106-06-15	4 miles from Alamosa to 5.5 miles from Saguache.
71	34-29-15 34-51-00	105-02-40 105-39-00	Over Joffre (11 miles SE of Vaughan) to 6 miles SSE of Santa Rosa.

Shaw Air Force Base, South Carolina

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	35-02-30 34-46-30	82-41-00 83-13-30	7 miles WNW of Brevard south of Tower to 6 miles NNE of Clayton.
21	35-15-20 34-57-00	82-51-00 83-20-00	From 9 miles north of Pickens to 8 miles west of Walhalla.
31	33-55-00 33-52-30	78-01-00 78-36-30	From southern edge of Southport on heading to Conway, to 4 miles NE of Crescent Beach.
41	33-45-20 33-42-30	78-01-00 78-36-40	From 9 miles south of Cape Fear River outlet to 15 miles east of Myrtle Beach.
61	34-31-30 34-02-00	80-32-30 80-34-00	From 2 miles SE of Kershaw to 7 miles NW of Shaw AFB.
81	34-07-40 34-10-30	77-57-40 78-33-30	From 3 miles south of Wilmington on W bank of Cape Fear river to 6 miles SSW of Lake Waccamaw.

Edwards Air Force Base, California

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
11	34-32-00 34-52-30	119-23-00 119-49-35	From 8 miles NW of Meiners Oaks to 7 miles SW of New Cuyama in San Rafael Mts.
23	36-19-40 36-20-00	118-04-50 118-42-25	From about 3 miles W of Cartago to about 3.25 miles SSW of Calhoun Pk. in Sierra Nevada range
23B	36-10-00 36-29-00	118-12-00 118-40-00	From 4 miles NW of Craig Pk to 2 miles E of Paradise Pk. in Sierra, Nevada range.
32	34-03-00 33-58-30	120-30-00 119-54-25	From 3.5 miles W of San Miguel I to about 3.75 miles beyond Santa Rosa I.
44	33-15-45 32-45-25	118-21-15 118-20-20	9 miles S of Long Pt. light to 4 miles S of Pyramid Head light.
51	35-04-00 35-10-00	117-19-00 117-56-00	From California City to the western tip of Harpers Dry Lake.
63	35-40-45 36-08-50	119-43-10 119-57-20	3.5 miles from Lost Hills Kern Co. Airport to about 4 miles WNW of Westlake Farms Airport.

Gust Plus Maneuver Round-Robin Flight (Edwards AFB)

Leg. No.	Distance (Nautical Miles)	Maximum S Speed (KTAS)	Description from Sectional Chart
1.	50	340	From Edwards AFB to 10 miles NE of the Fillmore Omni.
2.	15	500	From 7 miles SW of the Oxnard Rdo Bcn to the eastern point of Santa Cruz Island
3.	43	420	From the eastern point of Santa Cruz Island to the western point of San Miguel I.
4.	20	500	From the western point of San Miguel Island to 15 miles SW of Gaviota Omni.
5.	50	500	From 15 miles NW of the Gaviota Omni to 6 miles W of the Belridge (pvt.) Airport, and
	40	360	From 6 miles W of the Belridge (pvt.) Airport, via a point 5 miles W of the Lost Hills Airport to 7 miles E of Avenal Airport.
6.	70	340	From 10 miles east of Porterville to 10 miles S of Bishop.
7.	51	420	From 10 miles S of Bishop to the center of Owens Lake.
8.	88	260	From the center of Owens Lake to the Edwards AFB.

60. Flight between legs will be conducted in accordance with the Civil Air Regulations, Part 60. During the low-level operations, all airports will be avoided by 3 miles or more.

(Continued)

Patterson Air Force Base, Ohio

Track No.	Location Lat.	Location Long.	Description from Sectional Chart
61	39-52-40 39-27-00	83-18-45 82-58-25	Over London reporting point to crossing of route 23, 7 miles north of Chillicothe.
91	39-06-00 39-36-30	84-03-00 84-03-00	3 miles N of Williamsburg to 2 miles W of Spring Valley.
101	39-02-10 39-03-50	83-02-40 83-41-15	Crossing of Scioto River 1 mile SE of Jasper to intersection of route 62.
41	41-34-40 41-49-00	82-52-00 83-27-00	10 miles NW of Sandusky over tip of Lake Erie to point 14 miles west of Carleton omni.

DIRECT COMMUNICATIONS - ARTCC/PILOTS-"Monitor Procedures"-In lieu of standard "contact" procedures, ARTCC controllers may clear pilots to "monitor" the frequency of the adjacent sector within the same center. The time or point at which the frequency change is to be made will be specified in the clearance. A pilot receiving such a clearance is required by CAR 60.47 to continuously monitor the frequency he is on until the time or point to change to the newly assigned frequency. At the stated time or point, the pilot will change to the new frequency and continuously monitor the new frequency making only required reports. There being no reports required, the pilot need only acknowledge subsequent clearances. The clearance to "monitor" a specific frequency does not preclude the pilot from initiating a communications contact if the pilot is in doubt as to whether two-way communications capability exists, or if an additional clearance or other information is desired. The following phraseology has been authorized for this procedure:

"(Aircraft Identification) MONITOR (Name) CENTER ON (Frequency) (Time or point), OVER"
Example: "BEECHCRAFT TWO ONE BRAVO, MONITOR WASHINGTON CENTER ON ONE TWO FIVE POINT ONE AT ONE SIX THREE NINER, OVER"

The following table provides a plan by which pilots may determine the frequency they will be expected to use when the sector discrete frequency (Priority One) has been specified, either in "monitor" or "contact" procedures, and two-way communications capability does not exist on the sector discrete frequency specified.

ALTITUDES BELOW 24,000 feet MSL.

First Priority	Assigned Sector Discrete
Second Priority	Air Carriers - Company Radio General Aviation - FSS on 126.7/120.7 Military Aircraft - ARTCC on 301.4-FSS on 135.9/135.0
Third Priority	Air Carriers - FSS on 126.7 General Aviation - FSS on 126.7-122.1/122.2 or VOR Military Aircraft - FSS on 272.7; if unable 255.4

FLIGHT LEVEL 240 AND ABOVE.

First Priority	Assigned Sector Discrete
Second Priority	Air Carriers - Company Radio General Aviation - FSS on 126.7/120.7 Military Aircraft-ARTCC on UHF area discrete - FSS on 135.9/135.0
Third Priority	Air Carriers - FSS on 126.7 General Aviation - FSS on 126.7-122.1/122.2 or VOR Military Aircraft - FSS on 272.7 or ARTCC on 301.4

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

PREFERRED ROUTES CORRECTIONS: Correct Airman's Guide Volume 15, Number 3 dated April 12, 1960.

(1) Page 120, Atlanta-Idlewild- change "CSO" to read: "GSO".

(2) Page 121, Detroit (Metro. or Willow Run)-La Guardia delete V122. Denver to Idlewild change V10W to read:" IOW".

(3) Page 122, (1) Jacksonville-Norfolk change "EKN" to read: "FKN". (2) Newark-Louisville change "V25L" to read: "V251". (3) Los Angeles to Idlewild chg "10W" to read: "IOW".

(4) Page 123, Newark to: (1) Pittsburgh add to read: SSB V232 V58; (2) Rochester change to read: STW V153 V29 V34; (3) Syracuse change to read: 153 M rad SAX-SAX V249W Exeter V2S. Pittsburgh to: (1) Baltimore delete V119 V276; (2) Boston add to read: V119 V276 V35 V2 Revere.

(5) Page 124, Pittsburgh-Columbus delete V276 V1. Portland-Oakland change to read: V23 RBL V25 Geyserville V27 V137 OAK. San Francisco to: (1) Chicago; (2) Denver; (3) Idlewild-change "Benicia" to "Crockett".

U. S. ENTRY AND DEPARTURE REQUIREMENTS - Page 125 of Flight Information Manual Volume 13 (dated December 1959), change first sentence of paragraph one, column 2 to read as follows:

"For Buffalo-Niagara Falls Area, apply to the Supervisory Inspector at the Peace Bridge at Buffalo or to the Supervisory Inspector at the Rainbow Bridge at Niagara Falls."

RADOME MOUNTED GLIDE PATH ANTENNAS: Simultaneous operation of airborne radar and glide path receiver produces deflection of the glide path crosspointer, resulting in a glide path indication which is difficult or impossible to fly. Until compatible mounting and use is perfected, pilots are cautioned to turn the weather radar to "standby" or "off" when conducting an approach utilizing the glide path portion of the Instrument Landing System.

CONELRAD DRILL: On May 3, 1960, a Conelrad drill will be conducted between 1800-1830Z of all AM, FM, and TV stations within the continental U.S. (excluding Alaska). Aid to navigation from these stations will be unreliable during this period. All regular navigational aids (i.e., LF, OMNI and TACAN) will operate normally.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

ILS SENSITIVITY ADJUSTMENTS: At a number of facilities in the United States, ILS localizer course width will be reduced from 5 degrees to 4 degrees in the near future. Individual facility NOTAM's will be published as these changes occur.

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

Van Nuys Airport, California
Los Angeles: California

...ARTCC on 301.4

...performed as these changes occur.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting lower level training exercises at night without navigation lights on aircraft. These exercises will be conducted in the vicinity of [illegible] and will [illegible] and will [illegible] and will

✓ ATC PROCEDURES - Page 74 of Flight Information Manual Volume 13 (dated December 1959) revise the section titled "OTHER REPORTS" to read as follows:

1. The time and altitude/flight level reaching a holding fix or point to which cleared.
2. When vacating any previously assigned altitude/flight level for a newly assigned altitude/flight level.
3. When leaving any assigned holding fix or point.
4. When leaving final approach fix inbound on final approach.
5. When an approach has been missed. (Request clearance for specific action, i.e., to alternate airport, another approach, etc.)

✓ ATC PROCEDURES - Page 78 of Flight Information Manual Volume 13 (dated December 1959), revise the second paragraph under "APPROACH CONTROL" to read as follows: "PILOTS WILL BE CLEARED BY THE AIR ROUTE TRAFFIC CONTROL CENTER TO CONTACT APPROACH CONTROL AT A SPECIFIED TIME OR POINT. Note: See page 74 for reports to be made without request."

✓ RADAR - On page 29 of Flight Information Manual Volume 13, dated December 1959, replace subtopic Air Traffic Control Radar Beacon System (ATCRBS) with the following:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft-reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control(ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route-High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil and military pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification. An aircraft with a transponder not having coding capability (Basic Mark X) will be indicated by adding the words "no code" in the "Remarks" section of the flight plan.
7. Aircraft departing from within a United States domestic control area to point outside the United States will comply with 6 above. Transponder equipped aircraft entering a United States domestic control area from outside the United States will, when making the first radio report to the United States air traffic control center, advise of availability of such equipment by adding the word/s "transponder" or "no code transponder," as appropriate, to its identification.

ATC PROCEDURES - On page 80 of Flight Information Manual Volume 13(page 80 dated Feb. 29, 1960) add as a continuation of the first paragraph entitled RADAR TRAFFIC CONTROL: ATC radar procedures provide more expeditious service to IFR aircraft than can be provided by other means. At locations where such procedures are used all aircraft desiring to operate IFR are subject to control in accordance with radar separation standards. Non-radar procedures will be used when deemed advisable by Air Traffic Control

ATC PROCEDURES - On page 73 of Flight Information Manual Volume 13 dated December 1959, under first paragraph entitled POSITIVE CONTROLLED AIRSPACE add:

f. Information on observed radar targets will not be provided to aircraft operating within positive controlled airspace.

ATC PROCEDURES - Two Way Radio Failure - On page 74 of the Flight Information Manual Volume 13 (dated December 1959), under "En Route Procedures"- column 2-change paragraph 1 line 3 to read: "flight at the altitude(s) flight level(s) last assigned by Air Traffic Control,". Paragraph 2 (a) line 2 to read: "he will continue flight at the altitude(s) flight level(s) last assigned by Air Traffic Control,". Paragraph 2 (b) line one substitute word "approach" for "clearance".

ATC PROCEDURES - On page 83 of the Flight Information Manual Volume 13(dated December 1959) under paragraph titled "Airport Traffic Control Communications Procedures Aircraft Departing" column 2 amend 2nd and 3rd paragraphs to read:

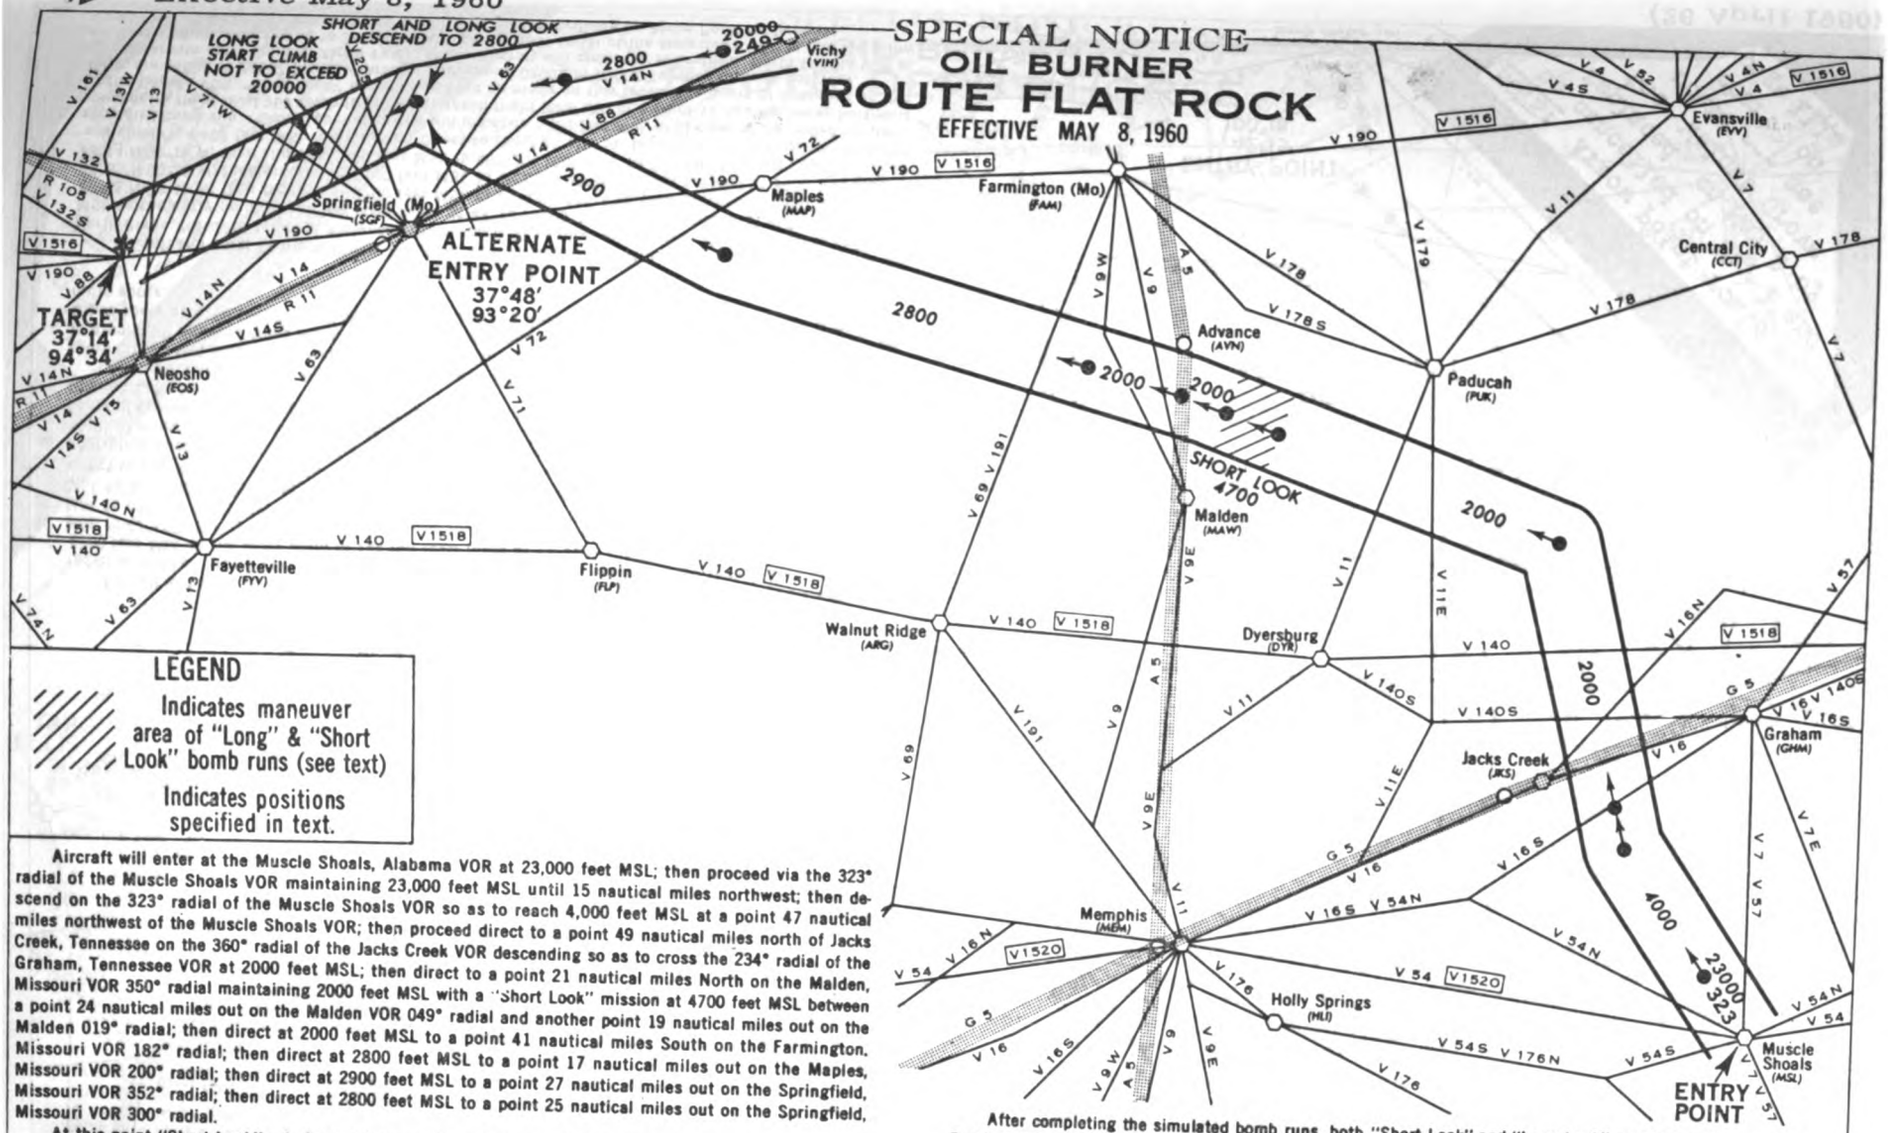
"Tower: ATC CLEARS BEECHCRAFT ONE THREE ONE FIVE NINER TO THE CHICAGO MIDWAY AIRPORT, VIA VICTOR EIGHT, MAINTAIN EIGHT THOUSAND, OVER."

"Aircraft: BEECHCRAFT ONE THREE ONE FIVE NINER IS CLEARED TO THE CHICAGO MIDWAY AIRPORT, VIA VICTOR EIGHT, MAINTAIN EIGHT THOUSAND,OVER."

ATC PROCEDURES - On page 75 of the Flight Information Manual Volume 13 (dated December 1959), column I, amend paragraph 3 (b) to read: "Where approved military jet penetration procedures have been published for the airport of destination, holding by military jet aircraft will be accomplished at the last assigned altitude or flight level in accordance with the holding procedure depicted on the jet approach and landing chart for that airport."; and add the following: "NOTE"- Detailed approach and landing procedures, approved for military jet aircraft, are published in the U.S. Air Force-U.S. Navy "Flight Information Publication-Terminal--High Altitude" by the Aeronautical Chart and Information Center, St. Louis, Missouri."

ATC PROCEDURES - On page 75 of the Flight Information Manual Volume 13 (dated December 1959), under paragraph titled "Shuttle" amend sub-paragraph (b) to read: "Where approved military jet penetration procedures have been published for the airport of destination, military jet aircraft will descend to initial penetration altitude or flight level while executing the holding procedure depicted on the jet approach and landing chart for that airport."

ALTIMETER SETTINGS - VFR FLIGHTS: In order to maintain proper separation between IFR and VFR cruising altitudes, it is essential that VFR pilots keep altimeters corrected in accordance with altimeter setting issued by nearest weather reporting station. Current altimeter settings are available to VFR pilots from FAA Flight Service Stations, Airport Traffic Control Towers, and aviation broadcasts.



CAUTION-AIRCRAFT ARRESTING BARRIERS AT JOINT USE MILITARY/CIVIL AIRPORTS: Aircraft Arresting Barriers are installed at some joint use military/civil airports. Pilots, particularly those of the light propeller driven category of aircraft are advised to operate with caution while operating near or over a lowered barrier. Aircraft operations at minimum practical power settings and taxi speeds are recommended until clear of the arresting barrier system.

NAVIGATIONAL WARNING - USAF OPERATION "OIL BURNER": USAF (Strategic Air Command) is conducting low level navigational flights in B-47 and B-52 jet acft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the actt climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during the times specified for each route.

Effective May 8, 1960
